Britain will stay firm in currency turmoil

By Frances Williams and Christopher Thomas

The British Government will tand by its "hands off" policy towards sterling in what promises to be a further bout of turmoil on foreign exchange markets after the unprecedented rise of the dollar to an all-time devalued against the dollar. high against the pound last

expected, tomorrow's British rates are boosting the dollar at money supply and government the expense of their economies. money supply and government borrowing figures for July show a big improvement on the poor

Japanese central banks to stop little success despite their economy, pumping of some \$2bn into the However foreign exchange markets.

tails, gaining ground against the European currencies and the yen and hurting the competitiveness of British industry.

With Europe now taking more than half Britain's ex-ports, a high pound would would put at risk the still uneven and fragile recovery. In these circumstances, officials argue that efforts to bolster the pound's value against the dollar and hence other curriencies would scarcely be appropriate, even though a fall in the pound will inflate the cost of imported

The Government's resolve likely to be tested to the limit weeks. During the weekend several more currencies, including the Saudi riyal, were

On Saturday President Rea week.

Ministers see no reason for British interest rates to rise to protect the pound. This view is had by rejecting European likely to be reinforced if, as claims that high Us interest at the protect the pound. This view is had by rejecting European claims that high Us interested towards of the protect of the protect

In his weekly national radio broadcast, the President said: It is not the interest you earn Nor do they intend at present from holding a currency that to join the concerted intermatters most. It is the confivention by European and dence you have that the value of your money will not depreciate from higher inflation." He cited the dollar's rapid climb against from higher inflation." He cited virtually all other currencies - a the strong dollar as evidence of move which last week met with the growing strength of the US

However, the latest US money supply figures, released Until this intervention put late on Friday and showing pressure on sterling, the pound monetary growth still well had clung to the dollar's coat above target, have increased above target, have increased fears that US interest rates may rise further, putting more upward pressure on the dollar. Many analysts believe that high US interest rates - underpinned by the huge federal government deficit which is cornering the lion's share of available funds will keep the US currency strong well into 1984, the presidential election year.

In New York, several analysts predicted yesterday that the big banks might follow a few prime lending rates from 10.5 to 11 per cent during August.

closes nuclear station

tion, which began feeding electricity into the National Grid eight days ago, has been closed because of a water leak.

But the Central Electricity Generating Board emphasized that the fault did not occur in the Hartlepool plant's nuclear section, which was "functioning perfectly". A spokesman said the fault was in the turbine

housing and posed no danger. The water leak was discovered last Friday and repairs are expected to take a week. Minor alterations will be carried out at the same time.

Hardepool, an advanced gascooled plant, was nine years behind schedule when it started producing electricity last Sun-

The shut-down is a further blow to the CEGB, which recently admitted that the orignal £250m cost of the power tation had risen to £680m and that it would have to operate at full power for at least 30 years before it covers costs. The environmental group

Friends of the Earth yesterday called for a ban on proposed development of the bird refuge at Seal Sands on the Tee estuary, a 400-acre area near the Hartlepool power station. Mr Christopher Rose, a

member of the group said: "Reclaiming Seal Sands for Petro-chemical complexes would be sheer folly. The whole of Teeside could become one enormous time-bomb.

No government in its right mind would allow reclamation for chemical works right beside a nuclear power station. The atom plant has no effective protection from external blasts and the unsheduled shut-down simply shows the unreliability of complicated technologies." Seal Samds is in the hands of the Tees and Hartelpool Port

Water leak | Nalgo aims to disrupt private health care

By Our labour reporter

Militant action against the private health sector is being planned by the National and local Government officers' (Nalgo).

The union executive met at the weekend and drew up fresh proposals to disrupt facilities outside the National Health Nalgo hopes to enlist the heip

of the other unions in the NHS with amendment to a motion planned for the TUC Congress

The amendment calls on trade unionists to refuse applications for private hospitals and to "black the administration and allocation of private pay beds.

It also urges non-cooperation with the progress of hiving-off state hospitals and services to private medicine and refusal to cooperate with non-NHS hospitals or any plans which mean The amendment seek to "beef

up" a motion aircady on the priliminary agenda from the National Society of Metal Mechanics, which expresses concern at the growth of private medicine and calls on the next Labout Government to return to the state all privatised facilities.

Mr Geoffrey Drain, general secretary of Nalgo, said yester-day that he was sure that the motion would be passed by the Congress as amended.

"We think our amendment beefs up the motion and makes it more fundamentalist. We are against all private growth of privatization", he said.

The executive also voted to support a system allowing all unions with more than 100,000 members to qualify for a seat on the TUC General Council.

Privatization report, page 4

Asbestos code may amount to ban

New asbestos restrictions proposed by a committee of the nternational Labour Office in Geneva are so strict that this could make it almost impossble for industry to use any derivative of the mineral.

The code of practice is intended to form the basis of a binding international convention on the handling of asbestos, but sets such rigorous standards for occupational health that some experts believe it could mean a total ban. The ILD denies that it wants that.

If the convention came into force, and Britain passed legislation to implement it, it could affect industries not so far involved in the controversy, because it proposes to add a form of asbestos known as tremolite, to the list of controlled substances. The three main forms of the

mineral recognized as health risks in Britain are crocidolite (blue asbestos), probably the most dangerous and banned for several years, chrysotile (white) and amosite (brown).

Tremolite has not been recognized as a serious hazard

in the United Kingdom and was excluded from the Asbestos Regulations 1969, which form the basis of present controls. It is widely used in the rubber and paper industries for smoothing and finishing.

The code has been drafted by

an ILO committee and will be vetted by the governing body in November. with publication probable early next year. ILO definitions are widely accepted as benchmarks by member

Controversy has arisen over sections like those on asbestos cement, where the code says dropping or dragging of cement sheets "should be avoided". Woven asbestos materials, it says, should be cut, not torn, it calls for the resealing of rope ends when lengths have been cut from a coil of aspestos rope

lagging.
These and other provisions have been condemned as unrealistic by such critics as Mr Douglas Sanderson, national officer with the building workers' union. UCATT, and the official responsible for health and safety.

The dropping of asbestos cement sheets on building sites son believes, and lack of supervision and monitoring means that such provisions "just could not be carried out".

Mrs Nancy Tail secretary of the Society for the Prevention of Asbestosis and Industrial Diseases (SPAID), said: "The code shows just how dangerous asbestos is. To allow its continued use you have to have regulations which are so con-stricting that they cannot be put into practice."

But the claims have been denied by Dr Robert Murray, former medical adviser to the TUC, who helped to draft the

Murder claims checked

By Our Crime Reporter Detectives are searching through files on missing people and reports of unidentified corpses after claims by a man that he has murdered seven or eight vagrants in and around London during the past few He made his claim while

being interviewed by police last week on another matter and he has already appeared in court charged with a serious offence. He told police he had killed the vagrants in various ways, but could not identify his victims. Officers are not sure how seriously to take his claims,

but they are checking records to find any details which corroborate his story. London's vagrants are often known by nicknames, which makes the police's task extremely difficult.

Passport tip for black tourists

Seeing pink blamed on computers

Patients who complain that world has developed pink fringes are not necessarily either mad or ill, doctors have been told. They have probably spent too long with a computer.

The warning is given by four doctors from the Northwestern University in Chicago who say the effect is caused by a common type of visual display which uses luminous green characters on a dark background.

After a session at the computer ordinary white letters and lines on a contrasting background appear to have pink colour, and sheets of white paper, or a white wall, can

appear to have pink fringes.

The illusion, the doctors write in the New England Journal of Medicine, is known as the McCullough effect, and is a well-known phenomenon. Several hours at a terminal can produce a very striking after effect which can last a day or

Inger.

The illusion, the doctors say, is harmless. But with the proliferation of home and office computers and increasing attention being paid to possible health hazards from terminals. patients may consult their

Government told costs will rise if it privatizes building design

payer 20 per cent more than overstate" consultants' fees, using civil servants, according referring to "profit which is to a report which was presented to ministers last year but has only just been made public.

The Report of the Working Group on Design Costs was jointly commissioned in 1981 by the Property Services Agen-cy, which is responsible for government buildings, and by the Treasury, after Mr Michael Heseltine, then Secretary of State for the Environment, announced plans to privatize

more design work. Under the plans nearly two thirds of the design work of the Property Services Agency (PSA) would be farmed out, instead of just over one third. The staff of 2,500 architects, surveyors and engineers would be cut by 900.

The report from the working which reached Mr Heseltine last October, showed, however, that design costs in the four years to 1981 would have been a third more with the privatization scheme.

In the financial year 1980-81 design work done by the PSA design work done by the PSA A department spokesman which cost £47.7m would have said yesterday that the report cost £66.6m if farmed out to contractors; in the four years to 1981, the respective costs would have been £144.4m and £211.2m.

Threatened counties fight back

By David Walker Local Government Correspondent

Leaders of the threatened metropolitan counties are stepping up their campaign to secure the backing of local industralists and business executives for the counties'

They are encouraged by the recent admission by the Confederation of British Industry that the weights and measures and consumer protection work now done by the counties most remain a county responsibility.

The CBI's submission to the Department of the Environment on the future of the metropolitian counties, pressed for county-wide authorities for waste disposal, passenger transport, airports and strategic planning as well as er protection.

"I ne major task (isumer protection services is the enforcement of national trading standards legislation",

Government plans to use While the report says the private companies to design its difference might be reduced buildings could cost the tax- because of "a tendency to partly a reward for risk", it still believes the difference would be 10 to 20 per cent.

The Government's avowed is that privatization should take place only if it provided good value for money to the taxpayer.

It was not published by Mr Heseltine, nor by his successor, Mr Tom King, although there were attempts by MPs to obtain more information.

Mr Patrick Jenkin. present Secretary of State, had a copy of the report placed in the Commons Library, after MPs had dispersed for the summer

womomoT Miss Linda Cohen, assistant secretary, of the institution of Professional Civil Servants, which represents the designers, will seek an urgent meeting with Mr Jenkin to ask him to stop the rundown of PSA design staff.

had been published in the usual way on July 28 and would probably play a part in future discussions of manpower needs within the PSA.

New leads in hunt for girl's killer

Fresh leads are being investigated throughout Britain by detectives seeking the killer of Caroline Hogg, aged five, More than 100 people telephoned with information after the publication of two artist's impressions of a man or men the police want to interview. Edinburgh detectives are also waiting for video film to be flown from Australia. It was taken on the promenade, Portobello, near the girl's home. on July 8, the night she disappeared, by an ex Scot who now lives with her husband near Melbourne.

Mrs McKay, who cooperated in the council's investigation. denied giving any interview for the story, by John Kay of The Sun defence staff. She said some remarks attributed to her were totaliv untrue.

Mr Kenneth Donlan, The Sun's managing editor, said the Daily Mirror had had Mrs McKay "under its protection" and refused to let her talk to other reporters. The story was put together from previous quotations and an interview with the parents of her late

The Press Council upheld a complaint by Mrs Caroline Metcalfe, of Horn Lane, Wood-ford Green, Essex, that the newspaper published a fabricated interview, called a world exclusive, with Mrs McKay, which was a deception of its readers.

The Sun two-page spread featured interviews with the widow of Lieutenant Colonel H Jones and Sergeant McKay under a sub-heading: "World exclusive: Pride and the heart-

break of two VCs' widows".

The report complained of began: "VC's widow Marica McKay fought back her tears last night and said: 'I'm so proud of lan. His name will remain a legend in the history books for ever

On the same day the Daily Mirror also carried interviews with the two widows. The story about Mrs McKay, "My VC hero", was described as "Exclusive: A widow's own brave

Eleven days later, under the headline "The Sun sinks even lower", the Daily Mirror's comment column said: "The Sun is a lying newspaper ... Mrs McKay was in London at the time of the 'interview'. She

Mrs Metcaife told the Press Council that either The Sun or the Daily Mirror was lying and complained against The Sun. She said she had no independent evidence, but suggested

A "world exclusive" inter- that the council should make A fortnight later Mr Peter

McKay, widow of Sergeant Ian Hillmore's Pendennis column The council suggested to Mrs Metcalfe that it might be

courteous of her to tell Mrs McKay of her complaint because the VC's widow had not complained. No reply was received for two months and council wrote to Mrs Metcalfe, saying that it knew she had received the letter because of a distorted reference to it in the Pendennis column.

Mrs Metcalfe replied that she had sent the letter to The Observer. She had not heard from the editor of The Sun, who had been notified and wished to pursue the complaint. Meanwhile the council made

contact with Mrs McKay, who had doubts about the matter being reopened. The council decided that the complaint should proceed while appreciating that it was not made by Mrs McKay or on her behalf, and Mrs McKay cooperated in the

Mrs McKay told the council: "The only newspaper I gave an interview to was the Daily Mirror. They were my only contact with the press at the time the awards were made public." Mr Donlan said the decision

to put together available mat-erial from Mrs McKay was taken after the Daily Mirror refused to let her talk to The

The Press Council's adjudishe has any objection to its investigating the complaint. She said she has not. She has cooperated in the investigation and has denied giving the interview reported in The Sun, and has told the council some remarks attributed to her in it are

remarks attributed to her in it are totally untrue.

The "World Exclusive" interview with the widow of Sergeant lan McKay VC which The Sun boasted of baving obtained never took place. In pretending that it had, the newspaper practised a deplorable and, in these circumstance, insensitive deception on the public. In the main the story published in The Sur. main the story published in The Sur was a cobbling together of material previously published elsewhere. The compalaint against The Sun is upheld and the newspaper

Seoul air alert as pilot defects

Seoul (Reuter)- The pilot of a penetrating South Korean air Chinese MiG21 defected to space. South Korea yesterday setting off air raid warnings and arousing fears that the country was under air attack from North

The Defence Ministry said South Korean aircraft scrambled and escorted the Chinese aircraft to an unnamed air base where the pilot, the fourth to defect from China,

was being questioned.

He was later identified as Sun
Tiangin, aged 46, of China's test
air wing. South 'Korean authorities said he immediately asked to be sent to a third country. The state radio interrupted

programmes to say an enemy air attack was taking place west of Seoul but later said the alert was caused by the MiG21

The Spanish Governme The Spanish Government takes little comfort from the prospect that the country's vineyards will produce enough must to make about 850 million gallons of wine this year despite the prolonged drought. Agriculture Ministry officials are disturbed by the vastness of the predicted crop, since there is a price support programme under which the programme under which the state buys surplus wine for distillation into alcohol for general use. The bigger the crop, the more subsidies have to be paid out.

Theoretically the drought which has seared much of Spain for more than three years should have led to a smaller crop. The quantity expected, however, reflects the results of planting new vineyards in the 1970s, since the vines do not generally become fully pro-ductive until four to seven years after planting. The quantity also testifies to the existence of some unathorized vineyards and to the fact that a small percentage of Spanish farmers occasionally irrigate their crop,

of the better known districts: Growers in the sherry district are not terribly unhappy about predictions that vines there will yield only about 50 per cent of the usual volume. International sherry sale have remained more or less constant for the past few years after a boom in the mid-1970s which encouraged the planting of new vineyards and the construction of more bodegas. A bumper crop would only mean excess stock. Quality is fairly constant in this simblessed land, and traditional blending assures a igh standard in the sherries

shipped to market.

Jayewardene claims he has thwarted scheme to set up a dictatorship

From Michael Hamlyn Colombo

President Junius Jayewardene sits in his upper middleclass house in the elite Cinnamon Gardens area of Colombo and sombrely reflects on the ruins of the commercial centre. of the city.

Despite the spasm of race hatred which has left 300 people dead and countless homes and businesses destroyed he takes some grim satisfaction from the fact that the fit is over and the institutions of Government are still in place. "You see, you people think it was just a riot. It was not," he said throatily. "It was a revolution."

He feels like a man who has prevented George Washington from carrying through the American revolution or stopped Lenin in his tracks. For he has no doubt that the riot was part. of a plan to topple him from power and install a left-wing military dictatorship.

The wily President, who made himself both head of Government and head of state when he amended the constilution soon after he came to power, has won every election since. His most recent success was in the referendum which extended the life of the present parliament for another six vears, keeping him and his party in power until 1989 - short of a military coup.

The pattern of Sinhalese-Tamil race riots in Colombo is of a brief and vicious flare-up, a rigorous curfew and a sudden dying-down. This time there was no dying-down, for many

days. This time, the Government detected plain signs of deliber-ate organization. The rioters, sceking out Tamil homes and burning them, had a particularly detailed knowledge of who lived where and who owned

.-ininisi

and police would say: The Government cannot govern. We are taking over, and that's the end of one chapter."

The President - known to everyone throughout the island state as "J.R." - clearly finds his perch on his democratic throne uneasy. Though he affirms that "you can't take over and keep an army in power unless the people are with you," he is plainly anxious about left-wing infiltration of the armed forces, and also about the effect of the continuing Tamil terrorist action in the north.

He thinks that another mistake was not to outlaw talk of separatism as soon as it appeared, for he has been made to appear dangerously soit on Tamils to the hardliners in his own Cabinet and in the armed services. He has, in fact, done much towards satisfying Tamil aspirations.

He has prompted action to make Tamil an official language of the country, the devolution of central powers to district councils and the solution of a bitter dispute over admission to universities. He would have conference convened earlier last month that if the Tamil United Liberation Front (TULF) would withdraw, or at least postpone, a demand for the independence of Eelam, the Tamil-inhabited area in the north and east of the country, other blessings would

follow. Mrs Bandaranaike locked the down of law and order, rebels up. But in 1977 the electorate did what the JVP had

from offfice. Ms Jayewardene, the new Prime Minster, opened the jail door to the IVP leaders. "I wanted to give them a arena," he said ruefully. He smiled "Looking back, it looks

as though I made a mistake." According to the President the idea was for the revolutionaries capitalize on the ill feeling between Sinhalese and Tamils then to create ill feeling between Sinhalese and Muslims. There were a few attacks but not successful, he said. They also hoped to store up ill feeling between Buddhists and Christians. Again there were a few attacks, but not successful.

If they had succeeded, then would have been by this time a fairly general conflagration. Then he said they aimed to attack the food stores and to destroy the food supplies.

"But", he said sadly, "the TULF boycotted the talks." When, therefore, mayben came to the streets and with the Army restive, he took the opportunity to take tough measures against separatism.
To the outsider it looked as though he were being unnatu rally hard on the Tamil population, but, as he put it The Tamils were the victims, I had to protect them. I knew any words of conciliation or advice to the rioters were useless.

"My purpose was to destroy any backing the political leaders of the riot had - any mass backing, which we have done."

The result was the sixth amendment to the constitution, which passed through Parliament on Thursday, depriving people of their civil rights, property and much else if they publicly espoused the cause of a separate state.

The amendment is tantamount to proscribing the TULF and it remains to be seen how the party will react. It would be pleasant to think that the TULF would adapt to the new situation, and continue to work within the democratic system but experience has shown that whenever moderates come forward within the Tamil community the terrorists drive them back:

Post-Falklands Argentina: Part 1:

Public prefers the peaceful path

In the first of two articles on Argentine thinking on the Falklands, our Buenos Aires correspondent, ANDREW THOMP-SON, examines the mood of politicians

and the public On current form, the forthcoming elections here will begin to change attitudes over the Falkland Islands dispute. The polls will be held on October 30, and a new civilian government will be in place by the end of January, 1984.

Argentine politicians are convinced that the return to constitutional rule is a vital precondition for the formulation of credible foreign policy. "After seven years of military rule, we are going to have to rebuild our international relations at all levels." said Señora Elsa Kelly, a foreign

relations expert of the Radical Party. Señora Kelly recognizes that the country's chronic political instability, with its history of coaps and foreign policy Uturus, has damaged its ability to act seriously in the international arena.

She flatly rejects the familiar argument of successive military governments: "In my party, we don't believe that our country's had international image is caused by an had international image is caused by an anti-Argentine campaign", she insists. The first priority, she says, is to reestablish the rule of law within the country, and

thereafter formulate domestic and foreign policies which are democratic, in that they will reflect the desires of the majority of

When it comes to analysing last year's war, the politicians are at a disadvantage, because there has still been no full domestic post-mortem. The Artentine version of the Franks Commission report has yet to be produced. The inter-forces commission, presided over by retired General Benjamin Rattenbach, is completing its investigations, but it is doubtful if it will be published in full. Most politicians are convinced, in any case, that the next congress will organize its own investi-

Despite this, there is a willingness to reexamine and reinterpret the historical record. Señor Leopoldo Tettamanti, a former ambassador and Foreign Ministry official belonging to the Peronist Party, is convinced that "both the Argentine and the British people saw last year's war, which cnt short so many young lives, with horror. It is not yet the right moment to analyse the responsibilities of both governments, but certainly, none of them is free from

and five protesters were arrested when they tried to

break through. Spectators ap-

into an improdent war, in both political and military terms". Britain, on the other hand, was guilty of "insisting on maintaining control of part of our territory". Now, he says, "It is time to think of the future."

One of the key factors in determining Argentina's position in the future is public opinion, which the politicians say has been ignore or manipulated by military regimes. Surprisingly, there have been few opinion polls on the issue of the South Atlantic. Nevertheless, the indications are that the majority of the population continues to demand sovereignty over the Falkland Islands, and wants it achieved by peaceful

The next government, the politicians are convinced, needs to demonstrate to Argentine public opinion - and not least to the armed forces - that democracy and peaceful diplomacy can achieve successes in the South Atlantic where the Galtieri brand of militarism could not. The focus of the current debate is therefore how to get the British Government to agree to serious

Tomorrow: A formal cessation

Cuba wants **Salvador** settlement

Havana (AFP) - A negotiated settlement in El Salvador is crucial if the Central American crisis is to be resolved, President Fidel Castro, said here.

Speaking to French journalists at the end of a three-day visit by M Claude Cheysson, the French Foreign Minister, the President said that to forget El Salvador would be to betray the Salvadorean people. He thus ended speculation that Cuba might agree to stop supporting Salvadorean guerrillas in exchange for a relaxation of pressure on Nicaragua's Sandinista regime.

"The heart of the Central American problem lies in El Salvador, even if US policy has been to focus attention on Nicaragua," he said.

In spite of a "change of rhetoric" by the US Government since the Contadora countries (Mexico, Panama, Venezuela and Colombia) began mediation attempts, the presence of warships off Nicaragua on training exercises showed nothing had changed. President Castro said.

 MANAGUA: Nicaragua has faith in the Contadora peace efforts but will prepare for the worst, Señor Daniel Ortega, the commemorating those who died junta leader, said here (Reuter in the trenches here during the reports).

Zanu to rule forever, says Mugabe

Harare (AP) - Mr Robert Mugabe, the Prime Minister of Zimbabwe, marked the founding of his ruling Zanu party's 20th anniversary yesterday with a renewed pledge to create a one

one-party state. Mr Mugabe told several thousand cheering supporters in Harare's Parliament Square: "A one-party state is what we want and that it shall be."

He said Zanu should govern forever", and when Zanu became the only party only card-carrying members would be allowed as MPs.

UAE envoy to be reappointed

After a delay of nearly three months, the reappointment of Mr Muhammed Mahdi Al-Tajir as Ambassador of the United Arab Emirates in London is expected to be announced shortly (Rodney Lowton

Mr Al-Tajir was Ambassador in London for 10 years until he resigned last year. In May, when letters of credence for his reappointment were presented. they were rejected by the Foreign Office.

Fans fight

Calais (AFP) - Several people were injured at Guines near here on Saturday in a fight between English and French football supporters after a "friendly" match between Calais of the French third division and English second division team Crystal Palace.

Even quicker than Airmail. Far cheaper than couriers.

There are any number of alternatives to Swiftair, the Post Office's worldwide express airmail service.

Trouble is they're either not as fast or a good deal more expensive (check out the Couriers' prices, but only if your heart can stand it). Quite simply, Swiftair gives you the fastest possible delivery service at the price.

For a handling fee of just £150 on top of the normal airmail rate, you get specialpriority in the UK, with items handled separately to give them a flying start.

And in some countries of destination they are even delivered by special messenger. All as part of the Swiftair

You can send letters and packets up to two kilograms. Just take them to your nearest post office or arrange for them to be included in your usual collection. If you believe that time is money, it's worth considering that you will be saving both. Swiftair

SPECTRUM

Next month, doctors are meeting in London to form the British Holistic Medical Association, indicating a growing acceptance of the alternative medicine. This first of three articles looks at what the Prince of Wales recently described to the BMA as "those ancient and unconscious forces so vital to our unity with nature"

If the mind is fit, the body will cure itself

were a Harley Street nabob, but he is a stition and Ignorance", as a "lunacy". GP in private practice, and his practice is homeopathy.

"I did orthodox medicine for twenty significant, not merely because it starts - I used to think that all staked a fresh claim for the recognition hosteopaths were potty." Why did he switch? "It all rather happened. I to be called) as an alternative and a suppose at first I just wanted more serious one, to conventional western arrows to my quiver." When he first medicine. It also threatened to underintroduced homeopathy the reaction mine western medicine's foundations was immediate:"I lost in turn, two by casting doubt on the hallowed patterns, and two-thirds of my principles of physiology, patterns, That was in 1969; eight years The existence of for he was in such demand that he had to retire from the NHS.

Now he is getting patients from other GPs. "Some say it's codswallop, but some tell patients, 'At least it's harmless: why not?" And some ask him: "Look, can you have a go with

ian Hutchinson tells a similar story iron a different angle. He is president of the British Chiropractors Association. When he began to practise thereen years ago, few members of the public had even heard of chiropractic and patients only came to him as a last resort. No longer . . .

The changes over the past ten years? People come to see me much sooner with their problems. The age group I'm treating on the whole is much younger. And I'm treating more aguse conditions - of manual workers. i r example.

The attitude of doctors, too, has changed. "Quite a few doctors refer patients to me; I have lectured to GP training groups; at my practice over the past few years we've held a number of meetings with an orthopaedic surgron." He would like to see chiropraci': recognized, as it is in the US, New Zagiand and other countries.

Recognized or not, the practitioners of the once derided "fringe medicine" are in demand. Twenty years ago they vice down and, to all appearances, out, swept aside by the triumphant march of medical science. Now, a combi-mition of disillusionment with orthodox medicine, in particlear with its drug-dependence, and the recognition that alternative therapies have something valuable to offer, has transformed their prospects.

The major breakthrough came ten cars ago, with the favourable report of three eminent US doctors on acupunc-

Righ West is director and Brian Inclis a trustee of the KIB Foundation controly to be renamed the Koestler Foundation), set up to raise support and funds for research into, among other things, alternative medicine. Their Alternative Health Guide is rublished by Michael Joseph (£12.50).

If you ring up to make an appointment with Dr Goodenough (not his real name: some of his colleagues are touchy about advertising) you will be told that there is a six weeks' waiting list. Nothing strange about that if he was a Harley Street nabole but he is a strange are turn, following a visit to China. Only a few years earlier acupuncture had been the chief but of medical jokers: in The Doctors' Dilemmas the leading US pharmacologist Louis Lasagno had dismissed it, in a chapter of "Superstrange" as a "lungue".

Vindication of the long-derided, millenia-old Chinese therapy was

The existence of "meridians" or "canals", as shown on acupuncture charts, had excited Lasagna's particular derision; they were shown, he jeered, only because "hitting imaginary canals is not a job to be left to the imagination. But if acupuncture works, can it be that the canals (into which needles are placed, according to the diagnosis) are real, but not material? If so, conventional physiology is missing a dimension. Alternatively, it may be that the imagination is involved in this, as in other therapies. Imole Coue, with his "every day, in every way, I get better and better" incantation, preached in the 1920s that the imagination can exercise a powerful, and sometimes decisive, influence over the body: but Coué had been laughed at.

The discovery in the mid-1970s of the endorphins, chemical messengers which apparently transmit the imagination's instructions to the body and are capable of relieving pain as if they were opiates, has raised the possibility that acupuncture, and perhaps other therapies, work psychosomatically, the body obeying the mind through a broadcasting system emanating from the brain, whose transmission system is only

gradually coming to be understood. he implications of this discovery have still hardly penetrated orthodox thinking. It effectively demolishes what generations of medical students have been taught as dogma: that the imagination can neither cause nor cure organic disease. And it is largely because of the profession's ability to come to terms with this body-blow that alternative medicine is now enjoying such an

unprecedented boom. Organic disease is what we say we cure, but don't", the maverick F. G. Crookshank wrote half a century ago. Functional disease is what the quacks cure and we wish we could." The great advantage the "quacks" of today have - purveyors of alternative therapies, in all their bewildering variety - is that the majority of today's disorders are functional, and consequently the

imagination of the patient can play a with their GPs. For example, according considerable, even a decisive part, in to surveys carried out by Taylor promoting cure.

Doctors until recently have tended to downgrade the imagination's role to "placebo" - useful to discover whether new drugs work by comparing their results with the effect of the placebos, or dummy pills, in controlled trials, but otherwise of no clinical import-

Now a few, notably Professor Herbert Benson of Harvard, have realized how important the placebo and the placebo effect can be in restoring health. For the most part. doctors have yet to agree. But to alternative therapists, the patients' imagination is their most poweriu ally. They know that hope and expectation on the patient's part, reinforced by rapport with the thera-

pist can work wonders. That patients are satisfied with what they get from alternative medicine has been confirmed by a report in the Consumers' Association magazine. Which," In its sample, "nine out of ten members said they would use again the form of alternative medicine they'd tried most recently. They didn't all claim to have been cured, but only 10 per cent felt the treatment had been

Strictly for the birds

(and bees)

servably outweigh joys, I have

rejuctantly added sex educator. This

is after reading Carol Lee's book, The Ostrich Position, to be pub-

lished on September 29 by Writers

Here is a story of dogged and often desperate heroism on the part

of the author who, as a Family Planning Association-trained sex educator, travels from school to school trying to make sense of the sexual confusion which is as much a

part of the growing child's life as pimples and blushing. As Carol Lee slinks in through the school gate, she knows that she is "less welcome than a pest control officer". In her

eight years of teaching, most of the schools' heads and deputy heads have refused to meet her and, at one

school, the biology mistress, alarmed at her pupils' ignorance,

smuggled in our heroine under false

pretences, supposedly to talk about "Personal Hygiene".

It is not only head teachers who

make a sex educator's life as perilous

as that of a missionary fallen among lip-smacking cannibals. Carol Lee

has to face outraged parents and, often, disruptive behaviour from the

children themselves who, to cover

up their real feelings of embarrass-

Lee usually succeeds in getting her

quences, about which most of her students share age-old mistaken

ideas, such as "you never get caught

Possibly, the daughters of Mrs Victoria Gillick and other parents who deplore outside intervention in their children's sexual lives have received such careful and sensitive instruction at home that they will never walk into a relationship they can't handle. If so, they are part of a tiny minority, for nearly all the 1,500 schoolchildren Carol Lec

taught had not learnt anything about

sex from their parents; not even how a haby is born. When Miss Lee asked them to put on an impromptu

sketch showing how parents might react to a daughter's accidental

pregnancy, they acted out a dom-

sideways look at the British way of life

Dark tales are told by the older street musicians of a buskers' "elephants' graveyard" somewhere beyond Ruislip on the Piccadilly-line. The disappearing denim-clad Bob Dylan lookalikes and one-man bands take a single ticket to this ghostly station of no return, where the times are never changing and they can play out the last bars of "Subterranean Homesick Blues" just one more time. All archaeologists will find in years to come is the odd battered mouth organ and scores of accountant, something that would have the oneunfilled-in tax forms.

caverns of Leicester Square Tube station or Green establishment fear and loathing. The jaded Park, still picking out the old tunes on a painted musical palate of the city gent now expects 12-string guitar after depressing whole generations electronic wizardry and B Dylan has had to change

of commuters with endless Leonard Cohen songs. Mr Tambourine Man is a threatened species, nearly extinct. As the constables often told him, it's all over now baby, blue.

Who is responsible for ridding us of interminable nasal droning which so aptly complemented many a dreadful Southern Region rail journey? A revolution is afoot. The Tube-way armies of Dylans have been zapped by musicians using amplified sound systems, just as the old men in military uniform with a swearing parrot on their back were displaced from the cinema queues by the folk singers. Now, with a "ghetto blaster" tape machine, a classical saxophonist can fit an entire symphony orchestra at the bottom of the Northern Line escalator.

The new wave of busker fears not so much arrest as power failure or that the sound levels are wrong on his backing tape. He may even have an man band throwing himself underneath the wheels It's sad to see them go from the dusty Orphean of the next train to Wimbledon out of antitoo, or take the long and winding road to the buskers' graveyard.

That cobbled traffic-free precinct in Covent Garden is now a haven for buskers, who are all licensed; also something of an anathema to their footloose forbears. Today, backed by a trusty ghetto blaster "busking" can encompass anything from ballet to an impromptu Punjabi mime troup. The strolling player is back with a vengeance and quite often a council grant. There is no more squabbling for pitches.

Such squabbling marred my own single busking adventure. At school three of us set out with guitar, tambourine and a large bass drum borrowed from the cadet corps, a sacred military relic of many wars.

'Ere I wouldn't stand there, that's the Mighty Quinn's pitch," said a fat lady. Unfortunately one of us grinned when a smartly dressed dwarf announced that he was the Mighty Quinn, a juggler. He demolished the drum with his sizethrees and in a flurry of waist-high punches we were lucky to escape with our other instruments

It was also difficult explaining to the corps

Somme had met its end. Then busking was a jungle; now it is polite and ordered and there are even rotas in the Tube stations, written on the Underground maps. It is all so well mannered. The beadles (security men) of the Garden keep an almost loving eye on their artists, making sure that their bottlers (cash collectors) are not robbed and there are no unseemly arguments. The place has an aura of Victorian good fellowship and the strolling players often sport Equity cards.

With greater possibilities of sound and space the exotic acts, dancers, acrobats, patter-men and fire-caters from Paris, street acts of another age, have a new lease on life, while the folk singers are the ones out of time.

Mr Plod, the traditional enemy of busking, seems to take a more fatherly view of the amplified and classical acts. The denim brigade with songs of peace and protest were obviously hooligans. Now possession of an amplifier shows thrift, good sense and a respect for property though the courts recently drew the line at an Irishman who charmed an expensive python from his hat with a penny whistle. Times have not changed enough for live reptile musical acts yet.

Paul Pickering

With a smile and a song

HAMBURG HIGHLANDER Joachun von Usslav, 26 (below)

People think it strange d German from Hamburg and you can have a lot of rouble with the very retend to be Irish. I can ut on a pretty good Irish rcent because I worked or a bagpipe maker in reland, which was intersting except he never paid ne. The tartan is of the dueen's Own Highlanders and my act did not go own too well in Germdolf Hitler. So I decided ot feel embarrassed about

that in Germany. The kilt when they find out I am is showbiz of a sort and people like having their picture taken with you rouble with the very especially at the Tower of ationalist Scots. Then I London. I learnt the pipes when I was doing my community service as a conscientious objector in Germany. You have to do that if you don't want to fight. My family do not approve at all. They still have the German attitude that what one needs in life is a proper vocation. They ny. The German folk are very aristocratic and cene has been dead since puritan about things like that. I am learning to .) come over here and did repair musical instruments. at the London College of caring the kilt. What Furniture but that is more ondon did not need was of a hobby. I could not ondon did not need was hope to make money out of that. As it is this of that was not believe to make money out of that as it is this of that was my bills. ring guitar and I tried Pays my bills.

PUNK AND JUDY "Professor" Tony Pebble, 25 (above)

own puppers and learned the trade from a man in Brighton. Really I am an actor and got into this five years ago because I hated being out of work. I was educated at Shaftesbury and after my A levels went to Loughborough Theatre. But the street is more immediate. You have got to make an impression. You have got to hold their attention or they will just walk away. It is part of being a showman. My mother's a civil servant. and my dad's a doctor and what I do, now they

You can say I'm a punk understand it. People are Punch and Judy man very kind in this line of It's the oldest form of work and will teach you busking and I like it their skills. I was taught because Punch is an magic tricks by a lady with and taught her to escape from a straitjacket. I do a bit of fire-eating and stunt work on the side. There is no such thing as plagiarism because everything has been done before and my act is not that different from the one seen by Samuel Pepys. The trouble I have at the moment is getting a reliable female bottler. The girls I train always fall in love with nice young men. But I cannot complain with a bigger audience every day than any West

BRAZILIAN BUSKER Ricardo Reuter Ruas, 23 (abore)

For two months now I have been playing at Green Park. I am in England to study English and am Brazilian from am reading to be a vet. In Brazil we do not have buskers. A cleaning job I do in the evenings pays my tuition fees but this pays for my beers and theatres and things like that. It's good for me people and learning more English. People often find it funny when I sing in Portuguese because they cannot recognize the language. I use a little amplifier and I learnt the classical guitar in Brazil. Sometimes I do bossa

nova or folk songs and if a

friend comes with me we

do samba with an instrument called a paneiro. It's so good and cheers people up. Even the police here are so kind, not like competition among buskers for the places to play. They are friendly most of the time but sometimes things become nasty and it almost comes to a fight. I have played in Switzerany and Heidelberg is the most friendly place. After another two months I go home. I was married in Brazil. My marriage is finished but I have a little daughter and would like to take her an English setter dog when I return. I still plan to be a vet but I like Bob Marley started this. playing and they say

People think it funny Paulo. It was fantastic. when I start my act by That is why the act is very coming out of a dustbin, I circus-based but with a am all folded up inside certain cabaret Fellini feel and am charmed out by to things. I like the the saxophone like a snake grotesque side of the circus out of a basket. Nuria's so does Nuria, who had from Spain and does not been playing sax for one speak English and we met year but studied the flute when I was working over for eight years. We both there. It does make a like Spain; the audiences difference being a woman, are much warmer. When especially being a contor- we were there I had a tionist, as men heckle or monkey called Zeccinho come up afterwards. I try who was part of the act. I to make fun of the act's really did love him but he sensuality. My parents would jump on the audi-approve of what I am ence and he was not potty doing as my dad was in trained. foods. Recalling the years I spent spooning various types of goo into babies mouths, I am dubious of this. e. I have never once met a baby willing to embark on a calinary adventure; the tiniest spoonful of anything the least exotic ends up splat on the high chair tray and is followed by howls of outrage. Surely a few tins of unwholesome baby food annot do any permenent harm to a baby reared on the New Statesman who, as soon as it is out of pappies farmhouses in the Dordogue and other trappings of the good life. I think it should stick out for tinned apricot custard while it can.

Flavia Corkscrew is on holiday for two weeks.

AMPLIFIED ACROBATS Charlie Pakal, 32, Terry Cole, 24 (right)

I teach dance here and I was 23 years in Iran working with an acrobatic group; they did juggling as TV and in the nightclubs. But then in 1979 came the Ayatollah who did not like acrobatics or juggling or mightclubs or theatre. What is more we once put on a show for the Shah's birthday party and I had the personal letter of thanks in my house. The Ayatollah's men found it. I had to flee to political asylum. I teach the new acrobatic dancing at the Pincapple. But I love the atmosphere here and like imes do a Charlie Chap in act as a change.

unit to help create the atmosphere. I am the patter-merchant of the act and if I was really good we would not need music. But it's nice to have it in the background. You have to get a link between the audience and the show. I'm from Walthamstow but I learned acrobatics with a circus in Italy and a troup called the Medinas. My ambition was always to work in the circus and my parents are very prood of me. Before I started doing acrobatics I was working in a furniture factory making three piece suites. Everyone is licenseeing what the people feel sed to work here and there is bout my show. I some no trouble. I run 10 miles a sed to work here and there is day and Charlie is

THE TIMES DIARY

All clear

A relative of the composer of the world's best-known Christmas carol. Silent Night, will be coming to London later this month for an unscheduled premiere at the South Bank summer festival. H. K. Gruber, who steps in to replace a work by Oliver Knussen that will not be ready in time is a great-great-nephew of Franz Xavier Gruber who wrote the tune of Silent Night on Christmas Eve 1818 in the Austrian village of Oberndorf. The family connexion, says the contemporary Gruber, was revealed during he war when his mother was anxious to distract attention from some possible Polish ancesury. The link with the Christmas composer was sufficient to satisfy the Nazis that the Grubers need not be troubled further.

Point taken

The imperturbable John Timpson and Brian Redhead, presenting Radio 4's Today, read a letter from an indignant listener on Friday protesting at their habit of abbrevi-ating sentences by leaving out verbs. The correspondent deliberately wrote his protest with no verbs at all. "Point well made" said the radio rogues sympathetically. "Your complaint duly noted". Such sang

Unkindest cut

"Buy British." thought Menna Williams as she paid £3 extra to buy a pair of Wilkinson Sword pinking scissors rather than one "Made in Japan. Patriousm wilted, though, when her husband later found on the display card "Original Fiskars - a trade mark of Oy Fiskars Ab. Finland", and on the handles "Made in Japan". Still, Mrs Williams says. the scissors work better than her old pair which always functioned badly and only if held upside down. Those were made in Sheffield.

Girl talk

The latest prep-school vogue word in America is "awesome" as in "The Times Diary - isn't it awesome?" It is not too surprising, then, that the tycoon behind the Awesome Eyewear Company proves to be a girl of only 14. Mardella Brakke turned a \$1,000 profit in the last quarter, and when the president of Rainier National Bank refused her a \$5.000 loan on the grounds that it would be illegal for the bank to advance money to a minor without a parent's signed consent, she prevailed upon him to make the loan a personal one. American children, aren't the well, awesome?

Further speculation as to the title Gerry Fitt will take on entering the Lords is futile, as far as some of his former constituents are concerned. According to a graffitist in the Falls Road, it will be "Lord Flitt of Dock".

BARRY FANTONI

"You're looking terribly well haven't you been away?"

Self service

On an InterCity which came to a halt on its journey north the guard announced: "Ladies and contlemen, we apologize for the delay. There is engineering work ahead. Do not stick your head out of the window. There is machinery alongside. If it knocks your head off, you will have to go back and fetch it yourself".

On the wild side

The World Wildlife Fund's annual report shows in its accounts an exceptional item debited over the past two years and totalling well over £200,000. Although that item is elaborated no further in the accounts themselves, supporters of the fund are welcome to ring up and inquire. They will be told that the mystery figures represent the cost of relocat ing WWF headquarters in 1981 from offices in the City 10 Godalming, so unpopular a move that more than 20 of the staff of 35 refused to go along with it and had in he paid off. "I think that when companies are vaguely embarrassed about things they do tend to describe them as exceptional, giggles a

1100S here 25 laid-back beagle, the spiritual leader, manipulator, benefactor and mascot" of the Peanuts gang, and the play itself as the canne counter-attack to Cain. Teddy kempiter, who played Smike in the Royal Shakespeare Company's Nicholas Nickleby on Broadway, plays the prodigious pup "exactly as he sees himself - a cynical, with and crudite human being". Modest, too.

A private life for the economy

The speed with which the Labour Party/ FIUC economic strategy has disintegrated in the weeks following the schenal destion gives Mrs Thatcher a remarkable opportunity to carry through the significant structural changes to the economy which British business wishes to see. Britain has unexpectedly acquired a commitment to the social market economy which extends to all significant political forces, for, as Peter Shore has pointed out, two out of four of the candidates for the Labour leadership seem. to assume that Labour cannot regain power

before 1993.
Of course, Labour economics spokesmen will continue, for a time, to advance policies based on the TUC Economic Review for job creation through vast public spending. dramatically increased social benefits; renationalization; and restoration of trade union legal immunities. But the foundations and credibility of these policies have been knocked away by Roy Hattersley's accept-ance of the principle of privatization in his approach to council house sales; by Neil Kinnock's acceptance of the reality of continuing membership of the European Community; and by Peter Shore's declared aim to try to win back for Labour the upwardly mobile workers and their families who have gained tangible benefits from Mrs Thatcher's market economy."

So how should Mrs Thatcher entreuch the social market economy in her first year of the new Government? As a first priority she should speed up nationalized industry privatization. In it is the key to the success of her Medium Term Financial Strategy. engage in bilateral falks with ministers, even There are at least £10 billion worth of public on the most sensitive areas of traditional sector assets which could be realized in the union power, makes it a good time to re-

by Walter Goldsmith

Government's current term. Revenues averaging £2 billion a year would allow the Freasury to underwrite a tax-cutting strategy that is seriously behind target; and make a 25p in the £ basic rate of income tax.

Privatization on this scale would latroduce benefits in increased competition and duce benefits in increased competition and demonopolization, a reduction in the public sector's share of the gross domestic product and new chances for individual equity ownership and lower taxes. Most important of all, it would allow Nigel Lawson, the Chancellor, to announce in November a Medium Term Taxation Strategy to parallel Medium Term Taxation Strategy to parallel the MTFS and bolster ministerial tax-cutting enthusiasm.

At the same time Mrs Thatcher should induce Mr. Nicholas Ridley, the taxmen's political master, to call off their drive to reclassify large numbers of the self-em-Played as PAYE-paying employees. On Mr Ridley's own admission, this quiet initiative has, since 1979/80, snuffed out some 100,000 potential small businesses.

Mrs Thatcher's second major drive should be to seize her chance to step up the pace of trade union law reform. Norman lebbit would be well advised to bring forward his aim to make remaining union immunities conditional on the observance

of agreed or reasonable disputes procedures. Mrs Thatcher should advance on a third front. The preparedness of union leaders to engage in bilateral talks with ministers, even examine the future of ossibled pripartite economic forums like Neddy, the National 4. Economic Development Council. Neddy has been talking fruitlessly for

years about the inadequacies of Britain's education system to provide vocationally skilled young people in the quantities 2 reviving economy will need Employers and unions have bewailed the problems at his the Government has launched a technical and vicontinual advention initiative. and vocational education initiative to provide opportunities for 14 to 18-year-olds. But scattered pilot schemes taking a few thousand youngsters are inadequate to meet a massive failure of the comprehensive educational system. In the new climate, Mrs. Thatcher could afford to make the scheme

nationwide.

If nationalized industries, union law reform and the remnants, of Britain's corporate state can be targetted now, Mrs Thatcher will have the time to tidy up important but tricky individual measures to liberalize the British economy. Occupational pension funds need legislative encouragement to open up the pensions market and strengthen the influence of individuals over

their pension capital.

Mrs Thatcher cannot do it all, Employers, too, must play their part. In the new atmosphere more flexible employee communication and bargaining arrangements can be introduced to fill the void left by the increasing irrelevance of old-style British trade unionism. Free enterprise in Britain has rarely had so propinious a climate in which to entrench the principles of a free economy. We would be foolish indeed to miss the chance. The author is director general of the Institute of

Gerald Kaufman

Sickness benefits for politicians

about Mrs Thatcher's medical about Mrs I natcher's medical pulletins by sondition, the unofficial bulletins by Mrs Bens Thatcher have outpanded that gentleman's parodies with case. "She's flat on her back, the Prime Minister's husband elegantly pronounced. "She is not working."

Come stale and in heromine stale and in heromine stale. Come on, be reasonable:"

Everyone is liable to sickness from time to time, and even the nation's political leaders are somewhat short of superhuman. What has focused particular attention on the Prime Minister's sick-bed is that; she being known as practically a non-stop activist, any parise in her headlong schedule arouses both comment and concern.

Politicians who never willingly take a break from politics are likely after a time to be forced by some external circumstance to accept an external circumstance of activities. Yet such a pause, planned voluntarily as a holiday or a subbatical, might have fended off external circumstances that caused the involuntary cessation of their devoted labours.
Politicians can indeed be divided into two groups; those to whom politics are their whole life, and those to whom politics are just one part - if by far the most important part - of a life that contains other

absorbing interests. Full-time politicians scorn alleged part-timers and dilettantes. How can so and so really be taking the job seriously if he will keep tearing off to the opera or a football match, or perhaps more suspect - writing novels or even poetry? Anthony Crosland aroused amusement, mos tly affectionate but in some quarters scornful, for insisting wherever he might be on watching Match of the Day. Many felt that Norman St John Stevas was consumed by frivolity because not only was he regularly seen at Covent Garden, but because he exacerbated his transgression by actually seeming to enjoy it.

Of course, someone entrusted with the responsibility and welfare of the nation must take the responsibility seriously. At the same time, he (or she) recognizes that the voters are not usually themselves thinking of him and what he does, and indeed prefer not to be bothered by him and what he does. Richard Crossman pointed out that politics is a minority pursuit, almost a hobby, to be compared, say, with

stamp-collecting.

If the politician wishes to be successful at his hobby he will come to understand those whose votes he seeks by sharing not only their concerns, but their interests. Those interests include gardening as well as the common agricultural policy; the latest divorce scandal as well as divorce reform; the juicy murder as well as the ethics of capital punishment football and cricket come stale and, in becoming stale, risk losing balance in their jud-gment, "Always scribble, scribble, scribble, ch! Mr Gibbon" the Duke of Gloucester remarked reprovingly to the author of The Decline and

govern, govern, is not a good slogar for any Prime Minister. Doubtless the nation was intended to be reassured by the information that Mrs Thatcher would continue to be in charge of its affairs from her hospital bed. Many even of her most ardent supporters may well have asked themselves: "Can't she relax for a bit, even when she is ill?" Winston Churchill had his painting and bricklaying, Harold Wilson his golf, Edward Heath his sailing and music, James Callaghan his farm; and all, being more complete as people, were better prime ministers as a result. It will be a relief to know

Fall of the Roman Empire. Govern

that Mrs Thatcher has pastimes not contained in her red boxes. Similarly, Tony Benn might not have suffered from the illness that laid him low two years ago if he had paused in his seemingly endless and undoubtedly exhausting round of journeys and meetings and committees and pamphiets. Harriet Harman and Peter Hain recently wrote in Tribune about the need for Labour to abandon what they called resolutionary" politics: an ungainly djective for an awkward stance. There are people in the Labour Party who fail to understand that their preoccupation - sometimes obsession - with debating resolutions is not shared by most other people, and that it indeed separates

them from such people. Sadly, the time spent in drafting resolutions precludes them from meeting the people who, if met would shock them by explaining that such resolutions often bear little relationship to their own daily lives.
Politics is such an absorbing pursuit for its practitioners that they find it difficult to believe that they can grow stale. However, they can; they do; and they become worse politicians because of it.

I hope Mrs Thatcher recovers speedily and completely from her ailment; but that ailment is possibly the hest thing that has happened to her for a long time. Let the files and folders want. She will obtain great benefit from the records and tapes which - the source, again, is her musband - have lately been beguiling her enforced leisure.

The author is Labour MP for Manchester Gorton.

Leslie Plommer on the background to the Seychelles elections

Victoria, Seychelles Road and on towards the president's house in the green hills behind the capital to the steep roadside where "the accident "happened or "the to the state-press law of

diminishing stories; three days elapsed before the news that was burning the Seychelles grapevine -the islands' most efficient institution - appeared as two short uninformative sentences inside the official Nation newspaper. But by that time two fresh, flower-covered graves had appeared in the Mont Fleuri cemetery outside town to confirm the rumours - one of these graves containing the body of a certain Michael Hoffman, no lover of the one-party government of President

Albert Rene.
Murdered by the army in a night ambush, the whisperers said while the official version blamed a fallingout among thieves. A soldier named by a survivor was nowhere near the scene, President René told The

Whatever the truth, "the accident a fortnight ago was the latest illustration of two facts of life behind the splendour of the Seychelles the soveringent's fitting tors lead a hazardous existence; and most Seychellois lear the worst in such eases of their socialist govern-

ment and its army. There are political disappearances and strange deaths in these islands, and the knock on the door in the middle of the night," said a western diplomat who broadly endorses the Rene segiment at the

The disquiet and sense of repression persist beneathin, the surface despite the fact that, as many observers agreed; the average in habitant has derived "immense social benefit from this government". coup attempts. God's present presi-dent and his radio station and airport are under permanent guard. by foreign troops. Mr. René is perhaps mindful that when, as prione minister, he seized power while Mr Mancham was away in London, it was done with only 35 armed amateurs. Photographs from the time show the bemused group learning how to load guns in a backroom operation which today's party literature has transformed into "people's revolution",

Now 120 Tanzanian troops and 60 North Korean advisers and soldiers constitute the nation's bodyguard, backed by an unsteady local army which has doubled to 800 in four years; a militia of 1,000 to 1 500 which also acts as an intelligence network; and an assortment of Cuban-trained security men, pistols tucked discreetly in leather handbags.

The Koreans, tough professionals in smart dark green uniforms, who keep well out of sight, are filling a growing gap left by the unpopular Tanzanians, whose local brawing and sales of guns and drugs have alienated the islanders.

Tanzanian numbers have been run down from a peak of the 400 who put down the August 1982 domestic army mutiny which left nine officially dead, and according to President Rene, 50 Seychellois officers and soldiers still detained. But the Panzanian presence is still crucial for the government: "What Ifear is a Sergeant Doe situation", one source said, "Someone who comes from nowhere within the Seychelles army. He could hold this place with 30 trained men."

President Rene for his part, says he fears a core of 50 civilian plotters in the islands. And the local populace, denied informal outers for expression, suffer from a general apprehension they cannot diagnose. apprenension they cannot diagnose. Even the young, who generally support the governing Seychelles People's Progressive Party its candididates stamped back into the National Assembly on a yes-no ballot over the weekend - look over they shoulders as they say: "Nobody trusts anybody in the Seychelles."

"For the past two years people have tended to be more afraid".

President René said. A small, impressive man aged 47, who qualified as a barrister in London after an abortive run at the priesthood, he distinguishes himself from most leaders in the African region by an almost miraculous absence of rhetoric and bombast.
"These fears ... I don't know what
has happened. I can't put my finger

The midnight knock on the door is one reason, in a country alive with informers. The : President; whose desk bears a sign saying, "What a beautiful day, Trust some bastard to louse it up", gets a daily resume of who is saying what about the government.

For complaints, the only official outlet is through the increasingly tenralized party, which reaches into every national organization. But ministers dispute the widespread view that it has ceased to function as a conduit for dissatisfaction, while conceding that some militants alienate by pedding rhetoric they understand only dimly as Marxism.

Yet until "the accident". Seychel-lois recently had started to feel more free, with new signals of moderation emanating from the government. of chaos in secondary education, and in a Cabinet that covers the ideological spectrum the hardline left-wing Foreign Affairs Minister, Mr Jacques Hodoul, was shuffled aside in favour of the island's ultimate political animal, Dr Maxim Ferrari, a gynaecologist.

Smooth of tongue and round of feature, the doctor, who advances his own bedside theory of diplomatic success. The women of this island taught the frankriess and humanity — has with his balanced approach to non-alignment put the joy back into diplomacy for western

cavovs in Victoria. Things were going in the right direction: more pragmatism and less rhetoric", one of them said, looking back to before the recent murders. Now the gap between what is said and what is done has once again become the government's biggest political problem.

ment, which has set a record for blunders-per-minute since June 9, the White Paper on public transport in London is dreadful. It is so bad that one feels Tom King, the transport minister ought to be allowed to take it back and start again. It is almost like the offering of one of those overwrought examination candidates who, without being aware of what he is doing, sits down and writes his name and address for

And that, in a sense, is all it amounts to. All the key questions in relation to London's transport system - who is to pay for it, who will run it how will London Transport link with British Rail are answered by: "refer to the Secretary of State for Transport, the

But of course we all know that Tom King himself did not write it. A

Another quarter, scattered throughout is taken up with something about efficiency. Without access, apparently, to that hatdbook in discreet circulation among company chairmen: Useful Phrases for the Annual Report, the hapless draughtsman falls back on frequent recycling of his rather limited business vocabulary: "highly competent management", "effective management", "better manage-ment" clear objectives", "clear goals and measurable objectives".

Rt Hon Tom King, 2 Marsham St, SW1; Tom King, 2 Marsham St, SW1; Tom King, ..."

civil servant did. What brief was he given? One wonders. Apparently no more than the most casual of remarks over the ministerial shoulder one Friday afternoon. "London Transport? Oh, yes, we need the White Paper out right at the beginning of the hols - no sooner. Just say we're taking LT over. We can work out the details later... Oh. I know" (popping his head back round the door) "put in something about efficiency and privatization. That'll please the Boss." One can pity the poor individual

who got lumbered with this task. Scratching his head, totally stumped, gazing out over sweltering London this hot July, he seems to have drifted down to the Embankment to seek inspiration from the snatches of promotional patter blaring out of the river boats bearing their captive audiences down to Greenwich. The nation's centre of trade, commerce and tourism . . . hub of the country's passenger transport ... every day some seven million journeys largest of its kind in the world. 240 route miles. This sort of background blurb gets the writer going and takes up about a quarter of the whole seven-page document.

clear objectives and tight financial disciplines, and so on and so on. Certainly the writer protests alto-

Even judged by the standards of gether too much about the need for compelence of the present Govern-

With a third quarter of the document devoted to waving away the knotty questions I listed earlier (with promises of "consultation", "arrangements", "inechanisms, "further study"), there is thus only a dilarter devoted to the Government's concrete proposals. And they are concrete like the stuff crumbling under all our motorways. They have been reviewed elsewhere, and recently on this page most tren-chantly by Jim Daly. They are timorous, un-thought out, unwork-able and undemocratic.

But even more serious than their appalling wrongness is a fundamental worry about the political direction we are going in. Sitting where I do, I witness daily how political realors of both right and left are inevitably driven by the very force of their convictions 10 centralize - 10 pull decisions up from where they should most sensibly be taken. The sternly monetarist Government feels it must take over the running of local services. The strongly socialist education committee feels it must intervene in the way schools are run. Quite apart from the liberal and democratic objections to this way of carrying on, there is the basic question of competence. Put.bluntly. do the people up there know what they are talking about?

I have in front of me, next to the White Paper, the GLC officers' brief to members, prepared (within hours) as a response to it. Disregarding the merits of the case, and simply comparing the two documents for readability, relevant information and substantiated argument, the contrast is startling. They are as poorly matched as Bjorn Borg and the winner of the Buttin's Grandpas

How can this be? Our great Civil Service, reputedly the cream of the country's cintellect, steeped in its more than a century-old tradition of discriminating judgment, so completely outclassed by local officials? The answer must be that in any matter that involves public services there is nothing to match day-to-day contact with the representatives of the public Local government officers have to defend their documents and their proposals in public, to councillors who may very well be rude, stupid, quarrelsome and parochial, but they will not let them get away with ignorance of what life is like on the ground.

I am certainly not known as an uncritical supporter of the GLC. But all I can say after reading the White Paper is "Heaven save us from a public transport system run from Marsham Street".

Abele Talivald Jekob Thus begins (and thus goes on for 677 pages) a book which-I have just been sent; it contains nothing but a brief introduction and a list of names, from the very first page of it will be apparent that 'Abele" is a very common surname somewhere. So indeed it is in Latvia, for these are all Larvian names, and the book is published by the Latvian National Foundation in

Stockholm.

And what you may ask am I doing reviewing the Swedish edition of the Latvian telephone directory? Stockholm. Has the heat finally got to my brain, or is this some merry jest? Alas, no; any man with the smallest imagination, as he turns the pages of this extraordinary volume, could be pardoned for wishing that he had gone mad, nor is there, anything

funny about it.
Grodskis Eduard Grods
Ignats Grodskis Jadviga (son Romald, daughter Regina), Grolmusi Erik Ernest, Gromoits Gerbard, Gromovs Aleksandra, Gromovs Anastasia, Gromovs Apolonis, Gromovs Janis, Gromovs Jekab, Gromovs Lazar, Groms Peter

Gromulds Gerhard, Gromulds Natalija Grosbards Jekan, Grosbergs Albert.

Very well, what is all this about?

If the title of the book, These Names

Accuse, is not enough, the first

Acruse, is not chough, the met paragraph of the prefatory matter will provide the answer for those with the slightest knowledge of the history of our tormented time. This book is a list of names. It is also an endless grey line of prisoners forced to march through the streets of a conquered city. Those who did not abare their late should stop for a

moment on the sidewalk of history and occupation of the Baltic States watch them pass by. Can you feel would be solved. As it happened, he compassion towards this faceless grey multitude? Or does your compassion struggle continued until the 1950's arise only when you look at another human face and think - it could have been me, they could have taken me, they might some take me to march in these lines of prisoners? The entries in the book, each of

Which is meticulously accompanied by its owner's last known address, number some 30,000 which represents roughly 5 per cent of what would be the total if complete records were available. These 30,000 the "faceless grey multitude", are those Latvians known to have been deported, after the Soviet Union's seizure of their coutry in 1941, to the death-carrips of Siberia; further mass culling took place in 1945, 1946 and 1949, and the arrests have continued in smaller number, ever since (the most recent to be included in the catalogue was seized in 1978).

The more recent Baltic-States victims have included some dissidents, those heroic souls who have been engaged in the struggle to prise loose their country from the grip of the cruellest imperialism the world has ever seem, amid the unbroken silence of the United Nations Committee on colonialism and of those in this country who are most vociferous in denouncing the neo-colonialism of the multi-national companies. But the original mass roundups were of a different Stalin rightly understood that any

resistance to tyranny, or at any rate any resistance wider than the actions of a few brave men and women which offer only a moral example, needs leaders he reasoned no less correctly, that in societies as homogeneous and patriotic as the Baluc States, leadership could at prominent and respected in their communities, clergythen, doctors, businessmen, lawyers, army and police officers, teachers, so he concluded that if he took away and murdened as many offices ways and professional accordance of the concluded that if he took away and murdened as many of the concluded. murdered as many of such people as could be found, the problem of resistance to his invasion and

would be solved. As it happened, he was only partly right, for the armed singgle continued until the 1950's and the nationalist and independence movements ultimately arose in Latvia, Lithuania and Estonia anyway; but obviously the extermi-nation of so many potential opponents to Soviet rule must have weakened and delayed any form of opposition for many years. . Mundeciems Gunar, Munde-

tovskis Valter, Mundiciems Juris, Muduris Viktor, Munkevics Fricis, Munkevics Janis Visvaldis, Munkevics Karlis, Mukons Kazimir, Munters Vilis, Murans Aleksandr, Murans Aleksandr, Murans Edvard, Murans Vladislav, Muraska Karl, Murasko Peter, Murasko Vladis-I am myself of Lithuanian descent, from my father, this much-abbreviated Latvian list contains

two Levins, and no doubt when the Lithuanian equivalent is compiled there will be some on that, too; perhaps I had uncles or cousins in Stalin's Holocaust. But I do not think it is necessary to be related to evil's victims in order to protest against it, and I am quite sure that it is unnecessary to have a blood-tie with an innocent martyr in order to feel a bond of sympathy with a fellow human done foully to death. Ours is the day of the genocide,

from Hitler and the Jews to Sinhalese and Tamils, via an apparently endless list of examples, involving greater or lesser numbers, in between. Stalin's slaughter of the captive peoples of the Soviet Empire (Robert Conquest has provided the best brief account of this tragic story in his The Nation-Killers) is among the most dreadful, but there was more logic to it than to Hitler's Final Solution or the Hindu-Moslem and Moslem-Hindu massacres that followed independence for the subcontinent in 1947, and all Stalin's successors, though the mass extermi-nations no longer take place, have seen the same point and enforced it

the crack of doom? Yes, indeed it will For every entry in These Names Accuse, indeed for every victim whose name is now forever lost. there are two more Latvians determined that the cause for which they died - freedom, peace and Latvia - shall one day triumph. I am sure they are right; meanwhile. Zilinskis Vladislav. Zilvinskis Ignats. Zilvinskis Janis. Zins Feo-

dor, Zins Nikolajs, Zins Vladimir, Ziznevkis Vladimir, Ziva Jilijs Ziznevkaaja Olga, Zmuida, Vladislav. Zogots Janis. Zogots Stanislav, Zogots Vladislay, Zoldkovskis Al-fons, Zube Herman.

A PLAN BY ANY OTHER NAME

On Thursday newspaper front fill in the waste land within pages carried an advertisement which spoke winningly of modcrately-priced housing in lime-stone villages on the banks of the River Nene, mere minutes from executive desks. This, at the public expense, was Peter-borough Development Corporation boosting itself. Nothing controversial in that: The antecedents of Peterborough New Town are in the great plans for London produced by Sir Patrick Abercrombie in 1943-44 to set out a policy of attracting people and jobs from the capital to new and expanded towns many miles outside his metropolitan green belt.

Abercrombie's containment of the capital worked: London's 1939 boundaries are still effectively in place. Population and employment leap-frogged the green belt in ordered fashion to such planned, prosperous and cohesive towns as Northampton, Basildon and Basingstoke - and in unordered fashion to contribute to Thames Valley, North Kent and Essex sprawl: the affirmation of a pattern of commuting into London which is viable only on the payment of a large slice of that annual £600m public subsidy which keeps both British Rail in the South East and London Transport afficat.

Not many weeks ago the papers and commercial broadcasters carried the (publicly financed) notices placed by the London Docklands Development Corporation. These poured scorn on greenfield locations listant from the capital. They urged with the conventional wisdom of the era after the oil already drafted a circular to crisis the opening-up of the councils asking them to increase unknown but proximate territory beyond the West India building Now it seems there is Dock Road, and the recoloniza- an official recipe for nibbling at tion of the Isle of Dogs and the the green belts around London Beckton Marshes. The strategy, and the other metropolitan endorsed again by the Depart- areas, the contents of which - we ment of the Environment, is to hope for Mr Jenkin's sake - he

London. The Department of the En-

vironment last week advanced a third policy. A draft circular urges on district councils (which decide requests for planning permission) liberality towards house-builders on the fringes of green belt land. The Government seems now to be welcoming development not only within the urban core of London but on those prized acres of Kent, Surrey, Essex and Herts as well.

Of course the importance of the circular itself should not be exaggerated. It bears no executive force. Of itself it signals no radical departure from the Abercrombie or the 1947 system. that apparatus of constraints on development set in place by the Town and Country Planning Act. At worst it is an advance warning of how the Environ-ment Department may view appeals by builders

Until now the Government could be easily convicted of sending confusing signals to developers and planners alike. Mr Michael Heseltine came to office in 1979 fired (verbally) with animosity towards the town and country planning system in general and constraints on house-builders in particular. Much huffing and puffing ensued. But when it came to hard cases and, much more important, revision of the structure plans of the home counties, his bark was worse than his bite.

But now the locomotive effect of a booming construction industry is too cheering a prospect for ministers who see few other ways out of the economic doldrums. Mr Patrick Jenkin has the supply of land for house

has communicated to the MPs for Chingford and Barnet and Surrey whose constituents will

be most affected. There is a case for revision of green belt boundaries; considerable tracts of the land are neither green (sc. used for agriculture or accessible open space) nor much of a worthwhile girdle. The fact of green belt designation has been too often used by the home counties as a mere blocking device in an effort to redirect developments elsewhere and keep up local property values. But shooting holes in the green curtains around London and the other city regions is justified only if there is some dramaturgy or (breathe the word softly) plan in the background. A conspectus of the entire south-east region might allow Mr Jenkin wisely to judge that development in Sevenoaks is justified for the better preservation of attractive land in Buckinghamshire. For that Mr Jenkin needs a plan and all he has is the congeries of county plans and the remnants of 1944.

Since the culling of the quangos in 1979-80 killed the last planning organization covering the south east, there is no single body to provide a regional view; the authority responsible for London's strategic planning, the Greater London Council, is shortly to die as well. Where does Mr Jenkin go, beyond his civil servants with their conflict-ing departmental responsibilities, for an assessment of the commercial effects of the M25's completion - when pressure on green belt land for retailing will

become intense? That there exists no current plan for London's physical future is worrying if it means competing demands on land will be settled ad hoc and with regard only to parochial circumstance, There is apparently no appreciation in Whitehall of the need for a wide review of town and country planning for the urban regions and the capital.

PREVENTING ANOTHER MASSACRE

The redeployment of Israeli generate greater pressure on hope for is to mitigate some of forces in Lebanon is now clearly Syria to do likewise. In fact, to the worst effects and to prevent imminent. Work has begun on judge by Mr McFarlane's receptortification of what is to be the tion, in Damascus yesterday, the new front line, along the Awali effect will if anything be the river, and logistics and support opposite. units are already being pulled back from the existing lines. In addition, Israeli forces have begun closing down the bases. and barracks of the Lebanese. Phalange in the area south of the Awali.

The political implications of these moves can be variously assessed. The Lebanese government does not like them officially (and no doubt sincerely) because it fears the new Israeli line will be more permanent than the old, but also because it has serious doubts about its own ability to enforce order, let alone law, in the territory from which Israel is to withdraw, particularly the Chouf mountains.

In favour of the move, Israel herself and (more hesitantly) the United States are arguing that the withdrawal should not be seen as a final partition of Labanon but as a step towards implementation of the Israeli-Lebanese agreement of May 17. under which all Israeli forces are to be withdrawn from Lebanon. President Reagan has even tried to convince himself that the sightof Israel "starting to move" will ferm at least the best one can ready to move.

in Lebanon have reached a stalemate in which the country is likely to remain partitioned and violence in most parts of it is likely to continue. In addition to the various intra-Lebanese conflicts, there is already considerale armed resistance to Israeli occupation in the south, and it is likely that similar resistance to Syrian occupation will now develop in the north. Yesterday's explosion in Baalbek could perhaps be an early example of it. If so, the Syrians can be relied on to react with even greater brutality than the Israelis against the local population, which is already caught in the crossfire between rival Palestinian forces in the Bekaa, and between allies and opponents of Syria in the

northern city of Tripoli. All this bloodshed results from such an inextricable mixture of domestic and foreign forces that it is hard to say what degree of responsibility the international community bears for it or (which amounts to the same thing) what if anything the rest of the world

A classic case of a foreseeable and preventable outrage was last year's massacre at Sabra-Chatila, home in Hampstead. He was aware after the over-precipitate withdrawal of the multinational force which had supervised the evacuation of PLO forces from Beirut. President Reagan rightly recognized at the time that America's word was thereby dishonoured, since Mr Habib, through Lebanese intermediaries, had assured the PLO both that Israel would not occupy West Beirut and that Palestinian civilians would be protected.

Since then Phalangists and other right-wing Lebanese groups have continued to harass, evict and on occasion assassinate Palestinian civilians in southern Lebanon. The Israelis, with varying assiduity, have held this activity in check but there is a real danger that their withdrawal to the Awali will be followed by a new massacre, since some five to seven thousand Palestinians, mainly women and children, are still living in the area to the north. Unfortunately neither the will not the ability of the Lebanese army to prevent this can be taken for granted. The can do to stop it. In the short multinational force must be

HOME TRUTHS FOR GENERAL JARUZELSKI

The cosmetic lifting of martial aw has done little to make the Januzelski regime more acceptable to the Polish people. Underground leaders of the banned trade union movement Solidarity have declared their mtention of continuing the struggle for civil rights; they dismiss the repeal of martial law us an attempt to mislead the ublic and inveigle the West into fling sanctions. A leaflet signed

by Zbigniew Bujak and four other fugitive Solidarity leaders calls for a two-hour boycott of public transport in Polish cities on August 31 to mark the anniversary of the 1980 Gdansk agreement between Solidarity and the Government.

General Jaruzelski will doubtless take counter-measures even if he can think of nothing better than giving party and government officials time off to ride on the buses - but the regime remains in the weak position of responding with repressive measures to the actions of the population and eems quite unable to offer positive leadership at times of crisis. The fate of the party commission appointed two years ago to examine the causes of political strife is highly instruc-

Headed by Professor Hieronim Kubiak, a man of relatively liberal views the commission submitted a report blaming the recurrent crisis in Polish life on

the official media. Professor post as Party Secretary for Cultural Affairs and recently expressed doubt as to whether the report could ever be published in full by the party-controlled media. It condemns the centralized system of authority for initiating a "tendency to react with brute force to the protests of the working class"; and reveals that, despite later claims to the contrary, General Jaruzelski did not oppose the use of troops to suppress the 1970 demonstrations.

Having examined the major crises of the past, the commission accused the central leadership of incompetence, lack of understanding and of paying no more than lip service to the institution of socialist democracy. Empty propaganda about achievements had irritated the population and "had a detrimental effect on the intellectually inadequate leadership, who chose to use manipulation rather

than strategy as a way forward". The report states that the bureaucracy became a self-generating clique with an intense aversion for any reforms that might lead to replacement or loss of privileges. Important posts were filled with party members sciected by a process of personal connexions that paid little atten-

bad government rather than tion to competence or moral subversion by "Western espio- fibre: "The people who joined nage agencies" as is claimed in the party were without ideological commitment but had an Kubiak was dismissed from his ambition to climb the ladder of privilege." The chasm between rulers and ruled was deepened.

> The suppression of the Knbiak report follows inevitably from the fact that its main criticisms are still relevant not only in Poland but also in the USSR and other communist states. A major point is that the absence of any mechanism for democratically changing top leadership leads to 'autocratic practices" by which power remains firmly in the hands of the party leader. When top party and government posts are held simultaneously by one person "incompetence cumulates at twice the rate". It was the incorrect policy of party and government leaders, not external circumstances, which turned difficulties into crisis in the past, and will cause clashes between people and regime in future years also.

The Kubiak report is only one of the many documents which make the latest issue of the British journal Survey indispensible reading for those who wish to understand the situation in Poland today. Not until materials such as these can be openly published and discussed in Warsaw can there be hope for any genuine reform of the economic and social structure.

LETTERS TO THE EDITOR

Questions on tougher prison regime

From Mr Martin Wright From Professor J. E. Thomas

Sir. The Conservative Party confer- Sir, Peter Evans's report (August 2) ence may be tempted to echo of Mr Jonathan Uzzell's dissertation demands for "tougher" prisons, is of more than passing interest. In it since hanging has been decisively we are reminded of the role of Mr rejected. Such demands should be Leo Abse in the formulation of the resisted, not from misguided sympathy for criminals, but for reasons

of justice and prodence.
The problem of dealing with highsecurity prisoners, however, will remain. Either the 200 to 300 of them must be dispersed among the 2.400 top security prison places, which imposes unnecessary (and therefore unfair) restrictions on the low-risk prisoners who fill the remaining places; or they must be concentrated in one or two small units where many would be far from their families, facilities would be limited, and if they fell foul of staff or other inmates, there would be nowhere to move them to, as the Advisory Council on the Penal System rightly pointed out.

The women's wing in Durham prison, incidentally, combines claustrophobic security and cramped conditions for both high and low-

security women prisoners.

If concentration prisons were introduced it should not be before. the Prison Department had introduced better means of mediating minor disputes and adequate redress for major ones, including unrestricted access to lawyers, MPs, and independent doctors.

Scure, secret punitive insti-tutions are prone to alluses. Paradoxically, the longer the prison sentence, the better the physical and disciplinary conditions must be if prisoners are not to become like the time bomb which illustrates Peter Evan's article (August 2).

Repressive measures degrade us who inflict them, provide amongnition for subversives, and provoke other prisoners into joining protests. Many of these problems would be reduced if, instead of trying to refine punishments, we looked for ways of requiring offenders to make absends. Yours sincerely

MARTIN WRIGHT. 107 Palace Road, SW2

Brush with the law ...

From Mr John Hadfield Sir, How often one hears people say: "Nowadays it isn't safe to walk the streets of London after dark". May I quote an example?
One of my relations, a quiet

young man, on leave from a teaching assignment in the Sudan, met some former colleagues in North London one Friday, and spent a convivial evening with them. About midnight he was walking alone towards his parents' but was walking in a straight line, neither singing or shouting, nor breaking up the surrounding property. He had not spoken to anyone since he had left his friends.

A police car came alongside and he was asked to accompany, the police to the station. He asked why. Whereupon the police threw him to the ground and handcuffed him. tightly and painfully behind his back (the weals on his wrists were still visible four days later). Whilst in this position a policeman demanded that he admit he had been driving a car. This he denied, as he had not

driven a car for two years. He was then taken to the police station and charged with being drunk and disorderly. He admitted that he had had too much to drink. but protested that in no way had he been disorderly. Asked to read and sign a statement put before him he asked for his spectacles to be given back to him. as he couldn't read without them. The policeman in charge said. "That's your stiffude, is il", held on to the spectacles, and pushed the young man into a cell for

the night. He appeared before the Bench on the following Monday morning,

Future of ILEA

From Mr L. J. Norcross. Sir, Ronald Butt's suggestion (fea-ture, July 21) that the Government should consider the option of direct problem of what to do about the ILEA, following the abolition of the GLC, is one which might well

command widespread support.
It would meet the wishes of many teachers, parents and others who would like to see the preservation of a unitary authority (and there are countless educational arguments for not devolving responsibility to the boroughs), while presenting a real opportunity for removing education from the arena of doctrinaire party political contention.

Like law and order, education is an issue about which there is a fair measure of consensus (among parents, at least, if not among educationalists!). Direct elections

From Mrs Antonia Hunt

Sir. In his article on Uganda (July even murdered." ...

This passing reference hardly gives readers an inkling of the scale of the illegal detentions of unarmed civilians practised by the Ugandan quently "disappearance" in military custody, nor of the alleged deliberate

Among the many prisoners who have "disappeared" are Beatrice Kyomugisha, a university lecturer, arrested by soldiers at her university reportedly detained and tortured in

expression. If required to vote on that one issue. I have little doubt that the electorate of inner London would (regardless of general party loyalty or affiliation) decisively reject politically extreme and doctrinaire policies. An ILEA created by borough

could provide the means by which

this consensus could be given

nomination (in effect, by nomination from party caucuses) unlikely to be very different in composition from the existing authority, and would not be directly accountable to anyone. I am not alone in hoping that the Govern-ment will give the matter very serious consideration before issuing its White Paper.

Yours faithfully. LAWRENCE NORCROSS. Headmaster. Highbury Grove School, Highbury New Park, N5. July 22.

Detained in Uganda

18) Charles Harrison mentions that President Obote is "widely accused of being ... indifferent when his political opponents are harassed or

army (Amnesty International has estimated that hundreds of civilians are detained in military custody at any one time), nor of the reports of their subsequent torture and frekilling of many of the victims.

Kireka military barracks and never seen since; and Dan Etole, executive committee member of the Uganda Red Cross, who was arrested with two others by soldiers on October 7, 1982, taken to Nile Mansions Interrogation Centre, Kampala, whence he and the two others disappeared".

On July 8 Amnesty International issued an ingent appeal on behalf of a lawyer. Pius Kawore, who was arrested by the military police in April, 1983, in the magistrates' court, where he was conducting his case. He was reportedly tortured in detention and is currently said to be held in Mbuya military barracks, Kampala, although the authorities have not acknowledged his arrest and detention. Will he, too, "disap-

Modest proposals on work for all

Sir, I was pleased to see the recent

leners in your columns (Messrs Hodgkinson and Bennion, July 28, and Mr Eden-Green, August 3) showing that these gentlemen understand the real nature of the phenomenon we call unemploy-

I pointed out to the Cambridge Cropwood conference in 1976 that Mr Absc had given us a vital clue, in his autobiography, to the mystery as to why the dispersal policy was implemented in the face of opposition from almost everyone, including governors, and the Prison Officers' Association. From the implementation of this policy has come riot and brutality as well as with each of us working less and less as each day passes. gratuitous restriction on non-category A prisoners who are located in

In our book on the Hull prison riot of 1976, R. Pooley and I explored the relationship of this policy to the riot. We also discussed the relationship of Mr Abse and the formulation of the policy.

dispersal prisons.

recommendation of the Radzino-

wicz report of 1968 that category A

prisoners should be dispersed.

Mr Abse's account is at least frank. He was he wrote totally prejudiced", and his embarkation on a diversionary tactic was "cynically decided". Indeed, And this "prejudice", and a decision in advance of any inquiry which ignored the experience of staff and the wellbeing of prisoners, has left, the prison service in a sorry state. The revelation of such cyalcism in policymakers at least makes policymaking intelligible. It also illustrates again upon what weak foundations policy may rest.

Many will hope :Peter Evans is right: that the dispersal policy is at least to be seriously challenged. l am, your obedient servant.

J. E. THOMAS. University of Nottingham. Department of Adult Education, 14-22 Shakespeare Street, Nortingham.

in written form; stating he had been suspected of being involved in a motoring incident, and as the police approached him he was seen to "threaten a passing motorist with clenched fist." (He was trying to thumb a lift.). When being arrested he was alleged to have used "bad language." (He had merely expostulated rether unbernently).

when the only evidence offered was

lated rather vehemently). On legal advice the young man pleaded "Guiky", because if he had contested the case it would have had to be adjourned and he was due to return to his job in Africa in a

fortnight. He was fined £25.
Until this occurred I had read with scepticism the frequent press reports of "police harassment". Now am not so sure. Thank goodness Bertie Wooster and his festive fellow-members of the Drones Club are not living at this hour. York faithfully. JOHN HADFIELD,

side of the coin? A short time ago my father-in-law died suddenly on holiday in Comwall whilst we were also on holiday in the north of Scotland. This resulted in at least three

police forces having to make separate inquiries and visits and throughout all of them displayed the utmost patience, sympathy and assistance which I should be glad to place on record. Yours.

EDWARD BLACKWOOD, . Tarland. 1A Balmoral Road, Andover, Hampshire. August 4.

1946 that a determined effort was made by two young amateur wine makers to revive Sussex as a serious producer of cider.

fourth largest producer of cider in

From Mr Ronald W. Davis

It is obviously clear to them, as it is to me, that a completely new attitude to the work contribution required of each of us has now to be developed. I am not sure how this can be done and it would be presumptuous of me to think that I could solve the problem alone. However, one thing, I believe, is clear, we, as a society, can generate all the wealth we need, and more.

Equally clearly, we have not begun to produce a social system to take advantage of this state of affairs. The frequency of the use of the slogan, "putting the people back to work" shows the lack of appreciation of the situation, often

by those who aspire to high office. I submit that the proper philos-ophy must be that we create the wealth required in the most efficient way, using the least amount of all resources, including the time and effort of people. This has been, for

many years, the principle task of engineers and of many scientists. There is nothing holy about being employed for 35 or 40 hours each week and yet many influential people seem to think that only this level of application to work is acceptable and proper. Applying this argument, about 85% of the active population are used to produce all the wealth required by everyone. The other 15% is "doled" a pittance of that wealth while the 85% use their collective muscle to get an ever

bigger share. While those charged with managing our society, and those who aspire to do so, appear not to understand the situation, your previous correspondents all appreciate the problem and some offer solutions. To this end, and to attempt to publicise and identify the problem, the Chester and North Wales Chamber of Commerce are organising an open conference in the autumn on the subject of "A future strategy for employment". It is hoped to have ministerial participation, together with authoritative spokesmen from both "sides" of industry.

While solutions are not likely to be easily found, with all the attendant problems of properly

applying aptitudes and abilities and defining responsibility, the problem will not be resolved unless a start is made. This we are modestly hoping to do.

Yours faithfully, R. W. DAVIS, Rosebank, Townfield Lanc. Mollington, Chester.

From Mr John Chaloner

Sir. It is alarming that Mr Alan Eden-Green (August 3) advances the principle of shorter working hours and thus paid jobs for all, in view of his important work for the Industry and Parliament Trust, a body that implicitly views both the political and practical sides of such matters. The clarion call for solving widespread unemployment by "div-vying out" the available work in this way has already been heard from the trade union movement and will probably be heard increasingly

loudly in time ahead because it

appears, on first sight, attractive and reasonable. Closer examination shows it fails to answer fundamental questions. What output will be achieved in the 20 hours proposed - the Japanese car production level or the UK output? Anyone involved in management of trade or industry will know that at all levels it is next to impossible to work out how two herdpersons can split milking the same cows, or two accountants can divide their duties. The imagination begins to boggle as one moves into the areas of police, hospitals, the

press and education. Would the country as a whole be prepared to accept 20-hour remuneration? That is the nub of the problem, in that we have all probably elevated our living standard expectations beyond our collective means. Beyond that lies the even more uncomfortable truth that, despite recent decades of equalopportunity education, we have not enough skilled and talented people among whom we could divide the work of our frighteningly complex

society in the manner proposed. In China I saw 30 men and women hand-hoeing cabbages and said that in my county a tractor and weed spray would do the job in an hour. My hosts politely enquired: "And what would the 30 workers do

then? Yours faithfully, JOHN CHALÓNER. Dudsland Farm, Cross-in Hand, Heathfield, Sussex.

Spirit of invention

May I make the point that the West Country does not have a total monopoly of cider making and that traditionally the South-east of England has made cider from a blend of cooking and dessert apples. Soon after the invasion in 1066

making cider on a commercial basis. In 1341 the Nonae Rolls recorded 80 parishes, in Sussex paying cider tithes or taxes. The seventeenth and eighteenth centuries saw a decline in cider making and in the late nineteenth century West Country production came back into prominence. It was not, however, until

August 4. England and the success of Mer down vintage ciders must be du great measure to the excel Bramley seedlings, Coxs, V and developed from the exp mental orchard at Teynham set in 1553 by Richard Harris, fruite to Henry VIII.

Yours faithfully. IAN HOWIE Chairman, Merrydown Wine plc, Horam Manor. Horam, Nr Heathfield, East Sussex.

From Mr N. J. Starling Sir, There is no mystery in the fa that the English, despite inventi the steam locomotive, have nev been great distillers of spirits. Sin the potential of steam power was first realized (by a Scotsman) from the observation of a boiling kettle the association in the English mine has always been with the great national drink – tea.

he Queen's College. Oxford.

Without honour From Mr M. B. Latev

Sir. No Wykchamist and no New College man in the Literae Huma-niores first-class honours list! Only two from Winchester and five from New College in the Greats honours list altogether, and of these two

One trusts that a close seismological watch is being kept on the tomb of William of Wykeham. Yours faithfully,

M. B. LATEY, 102A Philbeach Gardens, Earl's Court, S.W.5. August 3.

Surprise slip

females!

From Mr Martyn Goff

Sir, Your correspondent, E. Craddock (August 1), writes that I was persuaded by The Bookseller to slip them the complete list of titles submitted" for the 1982 Booker McConnell Prize.

Slip them? What an extraordinary suggestion, Sir! My press department was as surprised as myself by the appearance of that list in the organ of the book trade; and I wrote immediately to protest to the chairman of the Society of Moles (Arts Division) about it. Yours faithfully,

MARTYN GOFF, Director, National Book Leagne, Book House, 45 East Hill

Relatively speaking

From Alec Bristow

N. Eye. Suffolk.

Wandsworth, SW18.

Sir, Surely the word "whom" is now a pretentious archaism. The ordinary person's reaction to it is expressed in the following reported telephone conversation:

"To whom am I speaking?" "Sorry, wrong number. Nobody we know says whom." Yours sincerely, ALEC BRISTOW. The Grange, Thwaite.

The jobbers' cut

From Mr Jonathan Mervis

Yours faithfully,

N. J. STARLING,

Sir, Those who are worst hit by leaving the broker/jobber dual capacity intact are the multitude of investors in the large number of smaller companies quoted on the London Stock Exchange. There are currently about 1,300 companies, having a market value of under

£10m. As the munber of jobbers dealing in any one of these shares is reduced to no more than three, they operate a cartel on prices (more difficult to achieve on the bigger, more active shares where there is strong institutional pressure). In most cases they no longer hold more than a nominal amount in value of these shares on their books, so avoiding the risks which constitute the raison

d'être of their existence. So the jobbers will continue to take their cut (which can be over five per cent of the value of a transaction) as members of their own closed shop, and to provide a service no longer relevant, and potentially harmful, to those very businesses it has become fashionable to encourage.

Yours faithfully. JONATHAN MERVIS. J. P. Mervis & Co, 2 John St, WC!.

Intimations of mortality

From Mrs Victoria Wakefield

Sir, Your correspondent, Mr Latham (July 26) no doubt the glass of fashion thanks to his wife, should take heart. On the increasingly infrequent

occasions on which I anxiously ask my husband, "How do I look?" he has been heard to mutter, "well, it depends what you are going as" as he returns to the financial pages of The Times. Yours faithfully. VICTORIA WAKEFIELD.

Bramdean House, Bramdean, Hamoshire.

Science report

A slice of Europe on geologists' plates

By Clive Cookson, Technology Correspondent

Hundreds of geologists and in Scandinavia with some of lithosphere, into a number of geophysicists are preparing to scrutinize a slice of Europe rain in the world (about 3.000 running from the north of Sweden to the Mediterranean, in a cooperative project de- ranean region, signed to yield new information about the evolution of the Earth's continents.

The European Geotraverse is a 25m venture sponsored by the European Science Foundation and funded largely by national research councils (in Britain's case the National Environment Research Coun-

The geotraverse is a swothe of ground about one hundred kilometres wide and 4,000 kilometres long, running across eight countries. It starts

million years old) and runs to the young and active Mediter-The European team, coordi-

divided the traverse into northern, central and southern segments and devised a dozen integrated experiments for each. A wide variety of geophysical techniques will be used, including seismic soundings and measurements of magnetic and electrical conductivity.

The theory of plate tectonics postulates the division of the Earth's outer surface, or

rigid plates moving over an inner layer. That has been most successful in explaining the character and evolution of the younger lithosphere beneath the oceans but the nated by Professor Stephan Mueller, of Switzerland, has history of the continents remain relatively obscure. The immediate purpose of the European Geotraverse is to

study the geology of the Continent on a scale large enough to give information about all big variations across the lithosphere. The European Science Foundation hopes that the new evidence will eventually help to produce a more complete theory of continental

Although the United Kingdom does not lie on the path of the geotraverse, the Natural Environment Research Council has been involved in the project from the beginning and is encouraging British geologists to become involved in the experimental programme, which is expected to take seven years to complete.

"It is an ambitious project, requiring much diplomatic and managerial skill as well as scientific insight", the council says, "if plans work out, during the next decade we could see a revolution in understanding the geology of the continents as exciting as the development of plate tectonics in the 1960s."

Law Report August 8 1983

When chairman should consult

Peter Simper & Co Ltd v Cooke Eafore Mr. Justice Browne-Williamson, Miss M. Boyle and Miss

D. Ewing
[Judgment delivered July 25]

The chairman of an industrial ribunal who, sitting alone, ordered marked a part-heard complaint of unfair dismissel should start afresh before a differently constituted without consulting the lay members of the industrial tribunal.

The Employment Appeal Tribunal so held allowing an employee's cross-appeal on that ground, and allowing an appeal by the employeers. Peter Simper & Co. Ltd. from a decision of a Bristol industrial tribunal in February 1932 who granted an application for a review by the employee. Miss Susan Choke, of the chairman's decision that her complaint be reheard before a different tribunal.

A mark 35.

Mr Richard Harvey, QC and Mr Graeme Wood for the employers: Mr Roderick Denyer for the employee's complaint was heard for two days in December 1981, and was adjourned part-heard. Before the hearing was resumed the employers' solicutors asked the inhunal for a relearing in view of allegedly biased comments with part of the chairman. In January 1982 the chairman, sitting alone, directed that the case was not informed of the detailed allegations of bias and was not given the eppertunity of being heard.

The comployee's solicitors applied for a review hearing before a full

there was no power to review an interlocutory order and that the industrial tribunal had erred in so

industrial tribunal and the chair-The appeal tribunal held that

man's order was revoked.

The first question was whether the industrial tribunal had jurisdiction to review the chairman's order. Under rule 10 of Schedule 1 to the Industrial Tribunal (Rules of Procedure) Regulations (SI 1980 No 884), a tribunal had power to review "any decision". Paragraph 2 of the Regulations defined "decision" and it was clear that an interlocutory order was not a "decision" within the meaning of the rules.

Salter Rec & Co v Ghosh ([1971]

2 QB 597) established that the

chairman's order was an interlocu-tory order and it followed that there was no jurisdiction to review the chairman's order and the industrial tribunal's decision to review was bad in law. Mr Denyer had correctly con-ceded that had the chairman's order

been made by the full irribunal there would have been jurisdiction. But the question was whether a

chariman sitting alone could put an end to a hearing before a fally constituted tribunal. The rules were in such wide terms that it was impossible to say that it was outside the chairman's power.

But the chairman had to exercise his power on a judicial basis. An industrial tribunal consisted of three people with an equal voice and if an application was made to abort a hearing it was a decision to be taken by every member of the tribunal.

It was also contrary to natural issues that the chairman's order should be made without the employee having been given notice and a chance to be heard. The chairman's order would be set aside and the matter would have to go back to the industrial tribunal to back to the industrial tribunal to continue the hearing started in December 1981.

Reform Lord Justice Robert Goff and Mr Justice Forbes
[Judgment delivered July 29]

The amendment of section 2(1/4a) of the Criminal Appeal Act 1968 by services 4 of the Criminal Law Act 1977 by the substitution of the words "verdet of enlarging the jurisdiction of the Court of Appeal (Criminal Division) Under the jury and a conviction when considering whether a conviction was unsafe or unsatisfactory.

The Divisional Court so held in a reserved judgment and dismissed an aretical of the judge's substitution of the words "verdet to the judge's conviction when considering whether a conviction was unsafe or unsatisfactory.

The Divisional Court so held in a reserved judgment and dismissed an aretical of the judge's substitution of the words "verdet to the circumstances in which the jury at the first trial came to be discharged, and a retrial or the judge's to the case unsafe or unsatisfactory, which meant the conviction following the jury's at the first trial and his subsequent decision to order the guilty.

The Divisional Court so held in a reserved judgment and dismissed an aretical ordered.

reserved judgment and dismissed an subsequent decision to order the guilty.

It was the resulting conviction therefore which had to be unsafe or unsatisfactory. Criticism of a judge's everese of his discretion to discharge of this discretion to discharge a jury at an earlier trial, or of remarks made by that judge at that trial, could not of themselves lead to the conviction of the accused at the subsequent trial being unsafe

or unsatisfactory.

Accordingly, the Home Office's decision that the amendment would not affect the extent to which the Court of Appeal might be able to take account of the first trial was correct and the application would be

THE ARTS

Galleries: Michael Ratcliffe, in Vienna, reports on the flowering of exhibitions and entertainments to mark the tercentenary of the city besieged by the Turks

How devils became delights

It was almost as if the Viennese needed reminding. "Was ist der Türk?" demanded the Angustinian firebrand Abraham a Sancta Clara in the early 1680s, proceeding at once, as firebrands will, to provide the answer. The Turk was the very simulacrum of Antichrist, he was decadent filth, ein verdammter Weltstärmer, the hound of hell unchained.

Before many months were up, the hound of hell had stormed through Hungary, taken the suburbs of Vienna and was mining, with every sign of success, the walls below the Hofburg itself. The royal family had bolted, the Citizens were eating donkey and cat; nothing but the relief of Vienna from the north stood between the all-conquering Ottoman army and Louis XIV. conspicuously inactive but watchful on the far side of the Rhine. Europe, in the time-honoured phrase, held its breath

Vienna is celebrating the tercentenary of the traumatic second Turkish siege with a series of exhibitions and entertainments between now and the end of October. Asia begins not at the Landstrasse this summer but a mile or so away on the Karlsplatz, where the front of the Kunstlerhaus is smothered in the enormous and jubilant replica of a Turkish campaign tent, and a large exhibition, The Turks Before Vienna: Europe and the Decision on the Danube 1683, flows across the road into the austere Historical Museum of Vienna, whose show it actually is.

Booty - sabres and banners, rifles, lanterns, tobacco tins, travelling texts of the Koran, carpets, saddles, turbans and drums all left behind in the Turkish rout - has returned to Vienna from all over Europe, and been added. to maps, letters, diaries and paintings from the city collections and beyond. By far the most frightening objects on display belong not to the terrible Turk but to the uniforms of John Sobieski's Polish Hussars, loaned from the National Museum in Cracow: great feathered wings grow out of their backs like angels of death. In the simulated battle, and sole concession to bloodthirstiness, at the heart of the show, the Turks are culturally clobbered into the ground, like the Old Believers in Mussorg-sky's khovanshchina, by the brutal and triumphant imperative of baroque brass. Elsewhere, all is sobriety and

circumspection. Had Vienna fallen, perhaps The Most Christian King in Versailles would have delivered the decisive blow to Islam somewhere in Germany, with modest assistance from us; or perhaps he would have cooked up a deal with the Sultan beside which the

Turkish barber's shop, from Austria and the Ottomans

carve-up of "influence" at Yalta and Potsdam in our own time would have looked innocent indeed. Louis is represented in the Künstlerhaus by a boyish but resonant signature on the treaty concluding the Thirty Years War, and by a suitably mean portrain from the French national collections: the right arm is languidly extended in that conventional gesture of the time which becomes so familiar as you walk round this show.

Painters had a hard time of it honouring the great day with the human material to hand. None of them attempted to make Sobieski or the Emperor Leopold I look other than they were: the lumpen Sobieski, whose intervention was decisive, more like a steward than a king Leopold, whose depressing face follows you round from room to room, like a dog who knows its day will never come, as the hipped quintessence of Habsburg inbreeding. who would rather dress up and write operas than repel the Turk. (Two of his pieces - Il lutto dell' universo and Il figliuol prodigo - were given at the University Church in Vienna last month). In fact, the dog's day did

brilliance the victory he had done so little to achieve, but he never strode past pampered jades of Asia into the Grand Vizier's tent in the manner

He was still prudently way upstream when Poles, Lorrainers and Bavarians came bloodily down through the vineyards of the Wiener-wald in the nick of time. After fierce fighting, the overparted Turks fled -leaving behind them, according to Viennese lore, the coffee-house, the croissant, the horse-chestuat, the lilac, the Turkish bath and the military band, all marvellous embellishments of Austrian life to this day.

These benefits did not all arrive overnight, of course, but there has always been an ambivalence to Austria's relations with the mortal enemy in the East which has tempered her required militancy with quizzical delight. Within twenty years of the siege, a Turkish delegation to Vienna were charmingly pictured playing games outside their lodgings in the city; in the 1740s a Turkish ball as held in the Winter Riding School and Maria Therese was painted in Turkish dress. Alla turca, based on the firm thwack of the Janissaries' band, was a popular musical mode for more than half a century and "the magnanimous Turk" a stock figure of Rococo and early Romantic drama; fewer than a hundred years separate the hound of hell unchained from Mozart's Pasha Selim. The Turks before Vienna follows the popular memory of 1683" through these and other themes as far as the Jugendstil version of Theresian Ottomania: Alfred Roller's designs for Der Rosenkavalier in 1910.

We are a long way from 1683. Or are we? Like all large historical exhibitions, this one is subtly coloured by the context of today. We live in ecumenical times and expectations of detente. The Austrians, like the Swedes, strive for a creative nonalignment between the political systems which have replaced the seventeenth-century confrontation of Christianity and Islam, and this exhibition reflects these claims to cosmopolitanism with painstaking fairmindedness.

Not only does it stress the military and diplomatic contributions of the Poles and Vatican respectively to the relief of Vienna, it expands on the splendours of Ottoman civilization that would have been less than apparent to the towns and villages of Hungary and Lower Austria in 1683. To this end, a selection of Turkish textiles have been loaned by the

Girls making music, from The Turks Before Vienna

Fitzwilliam Museum, Cambridge, which are among the loveliest things to be seen in Vienna this summer, but the approach pulls the show in too many directions at once, particularly when the iconography of the main event is limited, as here. One representation of the breakthrough on the Kahlenberg, after all, is much like

More successful, because smaller and more single-minded, is Austria and the Ottomans at the National Library, which takes the theme of ambivalence and intelligent curiosity and sticks to it. Through nearly four hundred books, documents, letters and prints, this exhibition follows the history of a fascination from the fall of Constantinople in 1451 to the

wartime alliance of 1915: magnificent calligraphy, journals of men in the field, scenes of Turkish life.

"On trouve encore", wrote a privy councillor from Lorraine in his diary of the campaign, "des janissaires que les turcs va avaient laisse à la garde de 3 mil sacs de biscuits. On prit les janissoires et on distribua les biscuits a l'armée." And not before time, he added. One small incident in a very rough war, straightforwardly set down and read beneath the very summit of the Viennese Baroque which, but for the events of 1683, would never have flowered at all, Fischer von Eriach's incomparable library, brings the whole year to life. Three thousand sacks of biscuits and Austria Trium-

Law against justice

day that Frederick Warne, themselves, for whatever rea-Bedford Square publishers of son, to be depicted unfairly in Peter Rabbit and the other books, or who would simply animals in Beatrix Potter's like to have a go, to reach for a delicious menagerie, had been sold to S. Pearson & Son. owners of the Financial Times as well as of Penguin Books.

ipon was that, on the same day, circulation. If Mr Mockler, as a Messrs Warne made an unqualified apology in court for as legally he is, entitled 10 publishing a libel of the 92-year-publish his views about someold Lieutenant-General Sir one dependent upon the acci-John Evetts. They also paid his dent of whether that person is expenses and are to make an appropriate contribution to a charity of the General's choosing. Messrs Warne had, in Our Enemies the French by the military historian Anthony Mockler, published a book General questioned Evett's judgment and ability in 1941 when he was a divisional commander during the dispute between Britain and the Vichy French in Syria, Mr Mockler ilso referred to him as "Mad Jack", and made other uncharitable comments.

Mr Mockler is a fairly washbuckling character and he may or may not have checked whether General Events was still alive. Had he not been, no libel. would have been perpetrated because the dead cannot be libelled. I would not want for a second to suggest that Mr Mockler and Messrs Warne, by publishing the book (and custom has it that, although they are involved, printers and booksellers are not usually indicted), did not commit a libel. The courts have adjudicated that they did. What I vould submit is that for a statement or opinion to cease to be libelious, or potentially libelious, merely (yes, merely) because someone has had the misfortune of dying may make legal sense but none in terms of commonsense, letters, objectivity and freedom of expression.

Had Mr Mockler's book been published after General Evett's death, his family and friends clearly would have been upset by the untrue things said about him but, parodoxically, because they could in law do nothing about it, Mr Mockler's assessment would have been but one in the common nool of views about General Evetts. Another author could have refuted Mr Mockler with appropriate evidence and argument, both in the public prints and in a book. It is becoming easier all the

It was widely noticed the other time for those who believe writ and take action; and, the libel laws being in the condition they are, for them to have a sporting chance of winning, and What was less commented having a book withdrawn from fairly well-known historian, is. alive or dead, the idea of free expression is surely brought into question. Publishers at present are in a

dilemma about libel, both because sending manuscripts to be read by experienced libel lawyers is increasingly expensive and because lawvers are being more tentative in advising. Novels are not even immune. One going the rounds of publishers is written by a respected and successful author who, until her recent divorce, was married to a figure in the public eye. The novel is about a divorce. The former husband declines to say whether, when the book is published, he will sue for libel, and publishers decline to sign it up without his assurance that he will not sue. It has been put to him that the figure he may (or may not) choose to identify with is so disreputable that it would serve him extremely ill to say "! believe that character is based on me, and I should like to know whether the law agrees".

Meanwhile, Faber & Faber here, and one or two publishers in New York, have extended their insurance policies to embrace any claims made against authors of the books they publish as, traditionally and invariably, authors have no money when damages are

awarded against them.
The libel laws should be amended so that if, for instance, Mr Mockler wrote what he did about General Evetts in good faith, as a responsible writer believing what he wrote to be true, that should be taken substantially into account. And people should not believe a scrupulous novelist is impugning their public or private reputations. Novelists may not be the souls of discretion, and fiction is written for various reasons, but not simply to bring into disrepute former husbands,

Promenade Concerts

Hippolyte et Aricie Albert Hall/Radio 3

Rameau's glorious, long-prepared first opera arrived at the Proms on Saturday from Aix, where it was seen by Hilary Finch for this page. The chorus, orchestra and conductor remained the same, and so did many of the principals, but of course we were without the production by Pier-Luigi Pizzi and instead into the dread territory of the "semi-staged" performance. With singers in evening dress gesturing vaguely, the effect was of a game of charades entered upon without much zest. It was best to keep one's eyes on the libretto, generously provided with the programme, and let the music

tell its own story.
This it did. The problems of the Rameau style are enormous, involving, besides all the period conventions, a quite special fusion of luxurious sophistication with an almost naive directness. These are characters who belong in a highly formal world, bounded by rules that had lasted for three generations in French opera, and moved by the same emotions of noble selfsacrifice, love, jealonsy and distress that had become ever more refined in their expression; and yet Rameau makes them speak afresh, with luminous candour. It is a fragile combination, requiring from

BBCSO/Davies Albert Hall/Radio 3

Before Friday night the American conductor Dennis Russell Davies had not appeared in front of an English audience. It was a bold and admirable decision for him to conduct a work by another musician who deserves more attention here than he gets, Hans Werner

His Ariosi, written in 1963, is a deeply felt personal lament for a broken love affair, using lines by Tasso. It is extravagant, but only through its boldness in exposing an emotion that most of us have to endure in one form or another at some time.

In the composer's words, it is frame the two purely instrumental interludes are surely too intimate to encompass the scale such terminology implies Rather, these are fragmented songs, with a soprano and a solo violinist depicting respectively the spurned and the errant of opening "Qual rigidad o qual pinto", whose slowly descending and overlapping scales create an atmosphere of primeval force, to the anger which

the singers both polished ornateness and a palpitating vulnerability.

John Aier and Rachel Yakar as the title couple achieved this excellently. So, too, did Suzanne Flowers in the terrible prettiness of Diana's music, the goddess careless of human beings in her pursuit of sport and amour propre: Jennifer Smith, who had been Diana in Aix, moved to the centre of the action as Phaedra, and brought to the role a stylishly cool yet penetrating characterization matched by beautifully poised singing. She discovered the emptiness of spirit in Rameau's Phaedra, and also, in her quick-moving marvellous. scene with Hippolytus, the nerviness. There was also a new Theseus in Ulrik Cold, a towering figure who could not save the lame second act but became splendid later in the

opera, allowing a natural voice to sound through the embellishments of the vocal music. Splendid support came from others, including Jules Bastin as three paternal divinities and

Jean-Claude Orliac displaying a tight, light tenor in various small parts. The Monteverdi Choir fielded a small, lively and exact team, and the English Baroque Soloists, under John Eliot Gardiner, showed they know every yearning sigh in the score, every tripping dance step. Paul Griffiths

precedes the final yearning for

Isobel Buchanan sang with an aptly darkish voice, although there could have been more rapture and, in places, more accuracy in her reading. Ralph Holmes, the violinist, gave his part with an appropriate capriciousness, here tender, there wilful, while Mr Davies and the **BBC Symphony Orchestra were** meticulous and sensitive to the gloriously wrought textures.

Earlier, we had been given, in Schubert's "Unfinished" Symphony, a fair indication of Mr Davies's extraordinary ability. There, he chose spacious tempos and kept every detail in immaculate perspective, never allowing a tune to blossom too rapidly and never losing the symphonic in nature, although effect of a wind chord or string the three sung movements that tremolando through understate effect of a wind chord or string ment, exaggeration or careless

Such attention to detail equally benefited Stravinsky's Rite of Spring. Far from depicting an uncontrolled brutality, which it sometimes seems to do, the work was heard as a couple in fragments of picture of a highly stylized ceremony. And how refreshing melodies. The mood ranges ceremony. And now retreshing from the desolation of the to hear all the violins' semiquavers at the end of Part I, not to mention the host of other, usually submerged, details.

John, Paul, George, Ringo . . . and Bert Young Vic

Up to now the repertoire of sure-fire touring-pocketmusical-for-kids revivals has consisted mainly of Joseph, Joseph, Godspell, and Joseph. But Willy Russell's Beatle musical of 1974 now shows that it was overdue for revival and should have been there all the time. Its irony and bitterness ensure that it is not performance-proof, but David Toguri's production, however technically polished and fast, has not left its brains at the stage door.

It would benefit from a stronger ending than the present one, which leaves Bert in a passive role, harking back to the great days of the group he cheered and refusing to recog-nize what music has become. But the show's central idea is indestructible and would work even for a Martian audience not knowing one end of a guitar from the other.

Talent working itself up from nothing, achieving success which can barely be comprehended, finding itself at the mercy of the publicity that depends on that and watching everything senselessly crum-bling away: that will go on happening in the age of the new groups, and it hardly needs the sight of a "plastic man" taking heir place to make an audience

their Fokine triple bill, Festival Ballet are probably not 100 worried about their notices, but I think their revival of Scheherazade would have been more about those in the tenth row? favourably reviewed all round if they had put out the second cast on the first night. Lucia Truglia and Ben van Cauwenbergh

> Truglia was one of two Italian dancers I saw as Zobeide, the other being Renata Calderini, who made her debut on Saturday afternoon. Those two could hardly be more unlike in their interpretations, but they share a whole-hearted quality and they are unafraid to let the audience see that the ballet is about sexual desire.

unable to do.

Truglia makes the point in the opening passage by the way she fondles the ankle of the Shah, at whose feet she is lying. Once her master is away and her favourite slave out of his cell, she knows how to give the corny old routines the shock

value that first made the ballet's reputation back in 1910.

Whereas Tuglia Zobcide as a hot-blooded woman. Calderini makes her a little girl. That is not what the choreographer intended, but it does make sense: explaining the Shah's patronising fondness. her quick pique at the slightest neglect and the amazed delight with which she gazes at the Golden Slave just like a new

Maurizio Bellezza, as her enthusiastic plaything, danced eagerly but began to lose stamina towards the end. and he does the eccentric steps better than the classical ones. Van Cauwenbergh has become a powerful, robust dancer who complemented Truglia's performance effectively. Michael Pink brought an alert authority to Shah Sharyar, and the matinee trio of Odaliques actually managed to make their comic dance look convincing as

harem entertainment.

John Percival

Television

Grimly authentic

Time was when the Mersey bid fair to become our own Swannee River. Along its banks the quaintly underprivileged grittily survived with lugubrious humour, wry resilience and a patois recognizably English but delightfully idiosyncratic. They even evolved their own music For a time, after their discovery

in the Sixties, they were lovable. Conventional wisdom (ie television) has now relocated Merseyside on the Styx, in one of the less suburban circles of hell. The first episode of One Summer (Channel 4) plunged us into a cross between The Blackboard Jungle and West Side Story, where apathetic passers-by refuse aid to the mugged, juvenile gangs bran-dish knives and hot curries over disputed territory, and even the most sympathetic teachers are robbed by schoolboys whose smooth organization and impeccable teamwork mark them out as future candidates for the Queen's Award to Industry.

Billy is streetwise, contem-tuous of school though dissatisfied with the aimless bragadoccio of the gang ethos, adept at pilfering ciggies, holding up the habitues of the local and scrambling out of the classroom window and over the wall when he decides he has had enough of school for one day. His home is depicted with a vehemence that initially teeters dangerously near Monty Python send-up. Bingo-obsessed Mum emerges from near-catatonic trance to revile the family: Billy and sister exchange sibling badinage: unheeded television competes inexorably with baby's screams. An urban equivalent of Cold Comfort Farm would be like this. But the producer Keith

Richardson, has an eye for the desperate toughness of rundown urban life grinding to a halt as we know from Harry's Game: and the director, Gordon Flemyng, coaxes awesomely convincing performances from both the humans and the landscape of Liverpool itself. Grubby, dusty, stale, this is a sea of vandalized estates and demolition sites where bored and hopeless youth spoils for a fight or resorts to violence for sheer self-preservation.

Dave Morrissey's Billy, tactfully conveying the first stirrings of bovine sensitivity and narticulate yearnings for something better, leads a frighteningly authentic cast. His flight to Wales in search of an idyllic memory will be hard put to it, in the next four episodes, to live up to the grim promise of this powerful semi-documentary

cial Union made pretax profits of £14m. Brokers believe that the half year will show profits of between £25m and £30m, against £14.2m last time, while about £60m is thought possible

for the whole year. Last year Commercial Union made an underwriting loss of nearly £200m in America.

But the company has trim-med staff levels, bad weather losses are considerably smaller and there have been significant rate increases in personal lines on which the group has been concentrating its expansion in America.

General Accident, which made profits of £8.9m in the first quarter, is expected to produce between £29m and £33m for the half year, against £6.2m in the same period last year. It has been hit in Britain by heavy car insurance claims, a field in which it is the largest

Therefore it has mised its car rates three times in the last year and this should be reflected increasingly in profits this year. In the oil sector. Royal Duich/Shell and Ultramar report second quarter figures on

Brokers expect second quar-ter net profits to be a higher than the £508m reported for the first quarter despite the fact that they will not have benefited as £46m.

year has proved no exception.

The dollar is rampaging through the foreign exchange

markets, notwithstanding mas-

sive central bank intervention.

threatening interest rates and

halting economic recovery in Britain and the rest of Europe.

The British monetary auth-

orities have braced themselves

as they have done in the past,

by letting the exchange rate take the strain. But too sharp a slide

in sterling could panic the

markets into pushing interest

Ultramar is expected to produce net income for the second year quarter of about £20m to leave half year profits virtually unchanged at about

package a month ago.

The consensus among City

Sterling M3, the main money

measure, is expected to rise by

would still leave sterling M3

Thursday also sees half year results from TI Group, one of Britain's biggest engineering

At the annual meeting in

Optimism on M3 figure

Financial upheavals seem to depend on two key sets of be less than half the £2,500m occur in the summer when the figures to be published tomor-recorded in June. people who habitually deal with row on money supply growth But the details of the them are on holiday, and this and central Government bor- borrowing figures will be studied closely for clues on the rowing last month. Exceptionally bad figures for course of Government spend-June caused a virtual gilts strike ing, which has been running and precipitated the Chancel-lor's £1,000m emergency cuts

well above plans. Last month's retail prices index, released on Friday, is likely to show inflation pushing analysts is that iast month's above 4 per cent after its spring figures will look significantly better.

Other figures out this week

include: final June retail sales and credit business and July 0.5 to 1 per cent compared to wholesale prices (today); last 1.7 per cent in June, though this month's car production (tomormonth's car production (tomorrow); and June industrial rates up.

above target, while Governwhether this happens may ment borrowing is predicted to (Friday).

But the high street boom will have had a significant impact on the group's consumer products division and this is likely to make this tentative forecast look conservative.

interest is going to centre on what the chairman says about the second half for which there is at present a wide range of brokers forecasts. Brokers expect between £18m and £25m for the full year.

Analysts admit to being at a loss when it comes to forecasting accurately the profits of Ocean Transport and Trading which reports half year figures with Ellerman Lines, the privale shipping group, on Tues-day. Ocean Transport has a heavy exposure to the bulk trade on the West African routes.

It also has a consistently lossmaking carrier. Profits of about £5m. against £11.8m are fore-

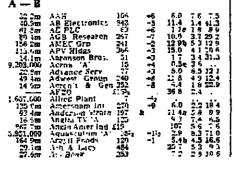

BOC is expected to report pretax profits up to £10m. lower than the £72m recorded for the first half of last year when it reports figures on Thursday.

after the success - albeit perhaps temporary - in cooling down inflation to see real interest rates at their present levels.

There is no question that higher rates will throttle the infant recovery. But risky as the ex-

change rate course might be, the Government will probably be obliged to place much of the emphasis there.

Even if the next set of money figures is encouraging, the underlying growth remains faster than the authorities would like.

It is true that private and corporate loan demand could be cyclically weak over the next 12 months,

on interest rates There comes a stage in but in that case tighter restrictions on the money supply could also hinder recovery.

City Editor's Comment

Options run out

The temptation to let sterling bear the brunt may paradoxically be increased by the fact that inflation will rise again next year anyway. It may not matter much politically whether price rises are 7 or 8 per cent by the end of the next

In any event, the Government must accept that the bottom of the interest and inflation rate cycle has been passed. If base rates can be held to only 12 per cent by the end of next year the Government should not

In that event, ironically, real interest rates would be appreciably less than today. The shape of the yield curve would depend greatly on how the markets viewed inflation long term, but the higher short term nominal rates seem likely to bring gross domestic product growth down to

below 2 per cent again. The size of the Government's problem, therefore, is that even if it lets the pound - the least rigid variable - depreciate, interest ratea will go up by enough to raise the spectre of the recovery petering out

in 1985. Inflation will rise faster, and hopes of reducing the growth rate of unemployment, let alone cutting the number of jobless absoluetly, will be dashed. What will be the options then?

IN BRIEF

 Nigeria has reached agreement with the International Monetary Fund on a loan package to help it out of its economic crisis, the transport minister, Mr Umaru Dikko said yesterday. He said the IMF had not insisted on a devaluation.

Imperial Continental Gas Association

Salient points from the speech of Mr. F. E. Zollinger, Chairman, at the Annual General Meeting on 5th August 1983.

Profit and Dividend

The Group's attributable profit of £29.148 million for the year ended 31st March 1983 was fractionally above the previous year (£28.651 million) and constitutes the highest net profit ever achieved by IC Gas. The proposed rate of dividend for the year is 10.6p per £1 stock uni (1982 9.2p per £1 stock unit). The final dividend of 7.6p is payable on 19th August 1983.

Belgian Gas and Electricity

The efforts of the Martens Government to restore Belgium's economic health have achieved some success. Unemployment remains high but would appear to have passed its peak, the rise in labour costs has been substantially moderated and the rate of inflation has of

late declined appreciably. The results of the Antwerpse Gasmaatschappij (AGM) remained satisfactory. The mild weather led to a lower volume of gas sales, but the modernisation of the distribution network undertaken in previous years reduced operating

Economic conditions had a detrimental effect on UNERG whose sales of electricity and gas declined. Nevertheless its profit showed a respectable advance, enabling UNERG to raise its dividend. This result was primarily achieved through concentrated efforts by the electricity sector to improve its productivity.

Petrofina

Petrofina's profit rose by 15%, demonstrating its ability to operate successfully during a period when the oil industry had to contend with exceptionally difficult conditions. Moreover, its record shows consistency.

Qil Operations

For Century Power and Light the year was one of steady progress. Final checking procedures on the Maureen production platform are being completed and, all being well, the field will come on stream within the next few weeks. Early in 1984, a daily output of 90,000 barrels is foreseen.

The Hewett gas field may be entering a new phase, the indications being that its productive life will be longer than previously expected. Similarly, the higher prices which the British Gas Corporation now concedes make the Audrey gas field potentially more interesting. Furthermore, recent market developments and especially the improved tax climate render the Andrew field financially more attractive.

A controlling stake was recently acquired in Amcana Oil Corporation in order to obtain the nucleus of an organisation in the United States. This provides a team of experienced oil men which should allow activities to be expanded

Calor Group

Calor had to contend with the combined effect of economic recession and an abnormally mild winter and its sales fell in volume for the first time in many years. The rise in pre-tax profit demonstrates that Calor's persistent efforts to render its operations more efficient have borne

The campaign to provide domestic central heating, hot water and cooking facilities from a bulk tank or large cylinder has been well received and its potential appears to be greater than originally envisaged. Market penetration of Autogas has been less rapid. Calor will persevere with both ventures to reduce the disparity between summer and winter sales.

CompAir Group

The depressed state of the world economy weighed particularly heavily on CompAir. Steps to rationalise its production methods and thereby reduce costs have already shown their effect in a 40% profit improvement in the United Kingdom and similar measures are being introduced in a number of overseas companies.

Simultaneously CompAir's emphasis on research and development is being maintained, resulting in the introduction of a wide range of new equipment to meet the highest technical standards and to increase market share. These policies will without doubt prove positive once the economic revival has become established

Prospects

Over the past four years, some £300 million has been invested in new fixed assets and subsidiary companies. Once the clouds on the economic horizon begin to lift, the benefits already obtained from these measures in the shape of improved efficiency and lower production costs, can justifiably be expected to gather momentum.

It is in this context as much as that of first oil production that the Directors have recommended a 15% increase in the dividend.

Copies of the full Speech and Annual Report may be obtained from the Registrars, Hill Samuel Registrars Limited, 6 Greencoat Place, London SW1P 1PL.

Call for unitary tax to be abolished

By Michael Prest

President Reagan is under increasing pressure to decide within the next two or three months whether to abolish unitary taxation. It is possible, however, that Mr Reagan will prefer compromise legislation which would exempt foreign companies from the unitary taxes levied by American states.

Under unitary taxation otherwise known as worldwide combined reporting, a government taxes a company within its jurisdiction on the percentage its operations represent of the worldwide sales, payroll, assets or profits of the group of

which that company is part.

The result can be much higher tax bills because companies normally pay tax only on their local profits, and that tax can be offset against tax psyable in their country or state of

Mr Reagan will be briefed on the issue by the Cabinet Council on Economic Affairs, which consists of representatives of he main departments of state and members of the President's

The unitary tax dispute crupted again in June when the United States Supreme Court apheld the right of states to levy axes by this method in ontainer Corporation California.

A clause in the double taxation treaty between Britain and the United States, which would have abolished unitary tax. was rejected by Congress in

The President now finds nimself at the centre of a repaganda war being fought wween foreign opponents of initary texation, including 60 critish companies, and partisans of states rights.

The Council on Economic Allairs might decide that the US Solicitor General should file an unicus curiae brief in support of Container Corporation's petition for a re-hearing of the Sunreme Court case.

Unitary taxation has become the latest trade issue to cause friction between the United States and its partners. Britain. the EEC, Japan and American multinationals have protested about the "extratemitoriality"

The British Embassy in Washington is devoting considerable time and effort to building support on Capitol Hill Mr Donald Regan, the US Treasury Secretary, is believed to have told the British Ambassador to Washington a month ago that the Administration will consider legislation to reverse the Supreme Court

City institutions in change - 1: The Bank of England by Peter Wilson-Smith and Graham Searjeant

When Mr Robin Leigh-Pember vien with a known to the National Westminster Bank, was appointed as the new Governor of the Bank of England, he was naturally deinged with queries about his views on monetary control, the future of sterling and like economic matters of moment. They have periodically thrust the Bank of England into the limelight for at least a gener-

As the present seasonal currency uproar demonstrates, the search for the new appoieconomic mind was largely an anachronism, a relic of the days when the Governor could have a decisive influence on one half of a government's economic strategy

The Governor's American counterpart, the chairman of the Federal Reserve Board, still the rederal Reserve Board, Sun plays this role. In Britain, the Governor has long been an agent of the Chancellor's will. In the past few years, the control operated by the Treasury, since it discovered money, has become much more detailed

Yet paradoxically, the spread of a new philosophy from Downing satreet, in changing the role of the Bank of England seems sure to make Mr Leigh-Pemberton a much more directly-powerful figure than his

Planted at the centre of the square mile, the Bank was traditionally seen as the government's representative in the City and the City's representa-tive in Whitehall, doubling as an informal head monitor - to bankers in particular, and financial markets in general.

In the generation of the managed economy, this infor-mal role became dwarfed by the sheer technical business of managing and manipulating sterling, interest rates and the debt markets so vital to government borrowing in ever arger amounts.

That role became increasingly impossible, as occasional disastrous mistakes on the exchange rate demonstrated so clearly in 1976. Yet it lasted into the Thatcher era, when phase one monetarism left the Bank with the awesome task of removing inflation simply by

the manipulation of markets. The Bank has never got the hang of managing the money supply to this day, producing endless clever schemes that merely end in distortion. But the lesson was at last learnt. And with it, is coming an undramatic revolution in the role of the Bank of England.

It will manipulate less and ess, but the new era, given over to free market forces, will give it a supervisory role of far greater authority than ever before: not so much the head monitor, more the cat keeping the City

mice in their place.

Why the new Governor will have an increased authority

The more powerful Leigh-Pemberton: the cat keeping the City mice in their place

market have already seen this new muscular role at work. For the baronially independent Stock Exchange, whose settlement with government last month owed something to Bank support on high, it is just beginning. For building beginning. societies, it is surely not far

Indeed, it may soon not be an exaggeration to see the Bank of England as an ever-so-British, nod-and-wink equivalent of America's bureaucratic and all-embracing Securities and Exchange Commission.

The Bank of England will not abandon its own ways. Traditionally, its power in the City rested on what bank insiders call "customary authority". The influence of this personal contact - not so easy in an era of worldwide dealing by hundreds of banks - and partly on the personal standing of the Governor, doubtless enhanced by the imperial, not to say imperious, manner of the latelyretired Lord Richardson.

In areas such as the discount market, where the Bank can hold the power of commercial life or death, this is quite sufficient. But others may question whether the emperor

has clothes. When the Bank arranged a marriage between Standard Chartered and the Royal Bank of Scotland, the Hongkong and

Shanghai Bank simply presented the market with a higher bid. The Monopolies Commission, in vetoing both bids, barely saved Lord Richardson's

The "customary authority" is still much used, usually with great effect. The appointment of Mr lan Hay Davison earlier this ar as chief executive of Lloyd's was a classic case of the Governor bending ears and exerting pressure, although he had no specific authority to do

Formally, insurance comes within the remit of the Department of Trade. But when Lord Richardson, exasperated with the succession of scandals at Lloyd's and their possible sideeffects on the City's good name, should appoint an outside chief executive, it happened within months. And it was the Governor, rather than Sir Peter Green, the Lloyd's chairman, who offered the job to Mr Hay

Davison.

In the June issue of the Bank's Quarterly Bulletin, a review article on the Stock Exchange's Unlisted Securities Market said that the market's success might be tarnished by too many speculative issues. Since then, the Stock Exchange has suddenly started rejecting a significant proportion of wouldbe new entrants.
Lloyd's was in trouble and

the Stock Exchange caught at a painstaking. It has acheived sensitive moment. The balance of power, however, is sometimes different. When banking supervisor Mr Peter Cooke appeared to suggest that the clearing banks should be cauwith dividend rises. several bank chiefs - most notably the chairman of Barclays - made it publicly clear that this was a matter for them.

The Bank hastily agreed, explaining that it had been

matic episode led to immediate

reforms and much more sys-

also laid the ground for the far-

reaching reorganization of the Bank pushed through in 1980

On the other side, it created

by Lord Richardson.

The big pension funds and insurance companies are likewise no pushover. The Bank of England has for years been trying to chivvy the big investing institutions as well as ations. Here, Lord Richardson the clearing banks into taking a tive attitude towards financing British industry, whether by making longer-term commitments, aiding rescue plans or providing the seed corn for new-generation companies.

Perhaps the most remarkable feature of this exercise is that it should take place ar all and that it should have been stepped up. most discreetly, during the phase of the present Government's hands-off attitude to industrial collapse. But the process of persuasion - first. Lord Benson and latterly, through Mr. David Walker, one of the Banks new directors, has been long and

been far more important. The Stock Exchange settlement, to obviate restrictive practice litigation, gives the central bank a similar role plus general duty to supervise reform and development.

The brokers and jobbers may soon find that the Bank is no mere protector from outside

interference. The Bank was less than happy with the way the Exchange adapted - or failed to adapt - to the modern world. It will probably use its influence to promote orderly change to make the Exchange more securities trading without any exaggerated regard for the Exchange's treasured split functions and monopolies.

set off another change in this central City institution that was, to be of great significance for the future. It led the Bank of England's supervisory powers to be, enshined in the 1979 Banking Act, adding formal, statutory rule to "enstomary authority".

Likewise, the building societies want a new act of parliament to extend their scope. This would provide an opportunity, unlikely to be missed, to bring these indepen-dent giants of saving, hitherto ithin the Bank of England's formal orbit.

Finally, the Gower report on investor protection is likely to ecommend much more comprehensive surpervision of a range of activities from trusts and licensed dealing in securities to commodity trading. This would be through a combination of reformed protection of investment laws and self-

The Bank of England already plays a part. It keeps a watchful eye on commodity markets as a relic of exchange control monitoring Further, a Bank Depart-ment of Trade joint review Persuasion, let alone a nod of board was set up in 1976 to keep watch over the securities The Bank really learnt this business. It led to the represenin 1973 when its tative Council for the Securities Industry, in which the Bank traditional methods wholly dominates: it appoints chair-man, deputy chairman and failed to stem speculative lending and the subsequent collapse of many fringe and several large banks. This trauthree lay members as well as organizing the appointment of a director-general who now doubles up on the CSI and the ternatic bank supervision. It Takeover Panel.

But Professor Gower thinks the CSI has not been wholly successful and the bank is likely to take a still stronger role in a beefed-up organization.

Hard times for Texas economy

Houston (NYT) - While America as a whole appears to be recovering from recession. the once-booming economy of

exception. The unemployment rate for Cexas grew to 8 per cent from .7 per cent last month, making it the only important industrial state to show an increase, according to the Federal Bureau

of Labour Statistics. The figure for Texas disguises enormous variations within the state. Unemployment is worst in the areas that depend on the lepressed oil industry, such as Houston.

According to the Texas Employment Commission, unemployment in the Houston area reached 10.1 per cent in lone, the highest since the state began compiling such figures.

Even worse off are border cities like Brownsville, Hartingen, Laredo and El Paso, whose economies have been recling since the devaluation of the Mexican peso last year. Laredo unemployment was 27.2 per cent in June. But unemployment in the Dallas-Fort Worth area, whose

economy is diversified and is based on banking, finance, electronics and military contracts, is just 5.7 per cent.

Also doing well are Austin,
with 4 per cent, and San Antonio, with 6.3 per cent.

The state has reported that the 11-county Dallas-Fort Worth area has overtaken Houston as the leading employment centre, with 1.69 million workers against Houston's 1.64

Parts of Texas have never benefited greatly from the state's resources and ironically, they find they are far too dependent on oil, given the worldwide surplus.

Unemployment in Texas hit a peak of 9 per cent in March. then rose again last month. The south-west regional com-missioner for the Bureau of Labour Statistics, Mr Bryan Richey, based in Dallas, said the increase was a temporary

But Texas is better off than all nine other main industrial states excent Maccochusetts. whose unemployment rate was 5.9 per cent. Michigan remains the highest, with 12.1 per cent, while New York, with 8.5 per cent, and New Jersey, with an unchanged 8.4 per cent, are still slightly worse off than Texas.

Like God and motherhood, concern that exchange rate suggesting that exchange mare But the penalties for being stable exchange rates are now movements have often not been kets, unaided, or not good at wrong on your own can perceived as "a good thing", but justified by changes in the making such rational assess- severe. So the conventional Like God and motherhood, stable exchange rates are now perceived as "a good thing", but unlike the other two, debate rages over how stability can be achieved.

Perhaps four years of monetarism should have prepared us for the answer now proffered by the unfettered free market brigade – it will all be all right once inflation is heaten This is

of time. Moreover, if you could

abolish inflation overnight there would be other fundamental factors demanding assessment and a currency market response. Variatons and discrepancies between countries in the growth of real expenditure, irrespective of the rate of inflation, can have marked effects on the balance of payments, and hence on the exchange rate.

Similarly, competitiveness can shift because of domestic factors unconnected with inflation, such as technological progress. Countries may also make different choices about the stance of their monetary and fiscal policies - whatever the rate of inflation.

Each of these factors is highly relevant to the exchange markets and each of them therefore properly requires assessment by foreign exchange operators.

So the key question about our current exchange rate regime is whether foreign exchange markets are good at making rational assessments of economic funda-

If they are, then the exchange rate problem may effectively disappear once (if?) inflation is beaten. But if they are not, then the problems of excessive volatibity and disequilibrium of rates will recur, with the focus of attention simply transferred from inflation to some other

There are several factors.

ments. Above all, there is the monumental uncertainty about the future exchange rate when there is no exchange rate policy to anchor its value.

One way of dealing with this.

uncertainty is to avoid it altogether by curtailing or pulling out of operations whose outcome depends crucially on what happens to so capricious a variable as the exchange rate. This may well be the way

Uncertainty about the future exchange rate will remain if there is no policy to anchor its value

industrialists respond (thus limiting the growth of world trade and, with it, our prosperity) but it does not offer much of a solution for pro-fessional investors or currency operators. They incline towards a second way of dealing with uncertainty behaving as though it did not exist by latching on to some fashionable idea, theory, or variable, and running with it for all it is worth before dumping it for another idea as

soon as it has had its day. This goes hand in hand with short-time horizons. Investors making a big play in the currency view but rather limit their crystal ball gazing to the

near future.

Then there is the structure of the foreign exchange markets. They are dominated by prossional dealers Being wrong about a currency

Development agency seeks more state backing

Cooperatives flourishing, despite Meriden

The Triumph motorcycle worker cooperative at Meriden, near Coventry, probably the best known of Mr Wedgwood Benn's creations, has, eight years, got through £16m in government and other funds. Now, it is being put into the hands of the liquidator.

That sort of performance gives industrial and commercial cooperatives a bad name. admits Mr George Jones, the Unilever executive who in March last year was seconded to be Director of the Cooperat-

ive Development Agency. But the state of the art in creating cooperatives in a wide variety of ways has moved on a long way since the days of ill-conceived Meridens, Mr Jones says. So has the agency under Mr Jones, which is why the Government is now being asked to back a new thrust by the agency beyond its present

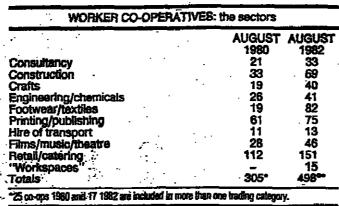

When the agency started life in 1978 there were 180 industrial and service worker

cooperatives. By last year the number had risen to nearly 590 but in the 12 months since then the birthrate has jampe by nearly half. There are now 900 cooperatives employing 9,000 people: some of these enterprises have up to 1,000 workers but the average has

Until last year the four biggest categories of cooperative were distribution-extering-food; printing-publishing, construction (mostly building and house renovation) and engineering electronics chemicals. The main growth in the past year has been in the services sector, particularly in

The biggest manufacturing category is clothing. The whole foods boom has produced 150 cooperatives.

Mr Jones has a whole new lexicon for the structure of cooperatives. Newly-seeded cooperatives are still an are the conversions or partici-

nation cooperatives where a company is bought out by where workers take up some shares, then soak up more over a period of time.

At Richard Baxendale, the reston-based manufacturers of Baxi home heating appliances, this private company has formed a trust which has ught shares that will gradually pass to the employees to Jones: "It is what this country

village's only pub or shop to running a bus service. There is the co-operative franchise operation: the inco-operative which started at Farnham, Ѕштеу, Surrey, when four school-leavers offered themselves to do any job going so long as it was relatively safe. The agency helped to set up the co-operative and now that

successful ground rules have been evolved on pricing and materials costs, the idea is being franchised elsewhere Among cooperatives the failure rate is running at about 10 per cent, according to Mr Jones. That compares favourably with the small-business

failure rate, he argues, especially as cooperatives emerge from the "white" economy while many small businesses get an initial uplift from operating at first within the "black" economy.

The greatest need of those in cooperatives is attaining business skills, according to Mr Jones. It is largely to beet up the agency's efforts in this field that Mr Jones is seeking more state backing. At present, the agency gets £200,000 a year from the Government, another £50,000 from EEC sources for use in assisted areas, and the equivalent of about another £50,000 from

Derek Harris

Top salaries offered to key staff

By Andrew Cornelius

British companies are increasingly prepared to pay top international market salaries to ittract key executives. Mr David S Joys, executive vice-president of Russell Reynolds Associates, a leading international executive search agency notes the trend in the company's annual review pub-

lished today. Last year, he says, there was an increase in the level of salaries which companies were prepared to pay in order to attract top performers:

In particular there was a surge in demand for executives to fill jobs with a salary of £50,000 a year and above.

There was also strong demand, the agency says, for world-class executives in the Middle East

Salaries of between £50,000 and £125,000 with an attractive package of fringe beneits were being offered to top executives as companies responded to tougher economic conditions Russell Reynolds says.

White House strikes back at the markets

The Federal Reserve and the US administration are moving ply down in anticipation of a in on the financial markets decline in the booming USwith de facto price controls aimed at undermining the power of the markets to house building industry. in an attempt to put cosmetic pating on the upward frustrate their intentions.

A revolt of the financial markets in the last two years or so has brought some nasty results for the central bank and the administration. High real interest rates and the First, the banks have been strong dollar are the consetold that they must not raise quence of a collective decision the prime rate, now at 10.5 per by participants in the financial markets that never again will they be robbed by inflationary

etary polici Between 1977 and 1982, to take one example of what happened to holders of financial assets, the real value of US Treasury Bonds was toss is still etched into the collective consciousness of the

So when then the Federal Reserve started its explosive money growth programme in the middle of last year, the financial markets were quick to take measures to protect themselves. Bond prices stopped rising in October, and by May they were falling. By this week, the 103, 2012 Bellweather US Treasury Bond, which had been 102 in

early May, was down to 88. Short-term interest rates have risen sharply since May, so narrowing the banks' profit margins. Instead of the usual margin of about 200 basis points over the 90-day certifi-cate of deposit rate, the banks are down to about 100 basis

The high real interest rates have stimulated the powerful demand for dollars, based on the irresistible attraction of dollar securities as compared with non-dollar securities.

in the second quarter, real final sales rose at an annual rate of 5.5 per cent, but domestic final sales (that is, excluding the effect of the yawning trade deficit) rose 8.3

per cent. The administration fears the rising interest rates which have resulted from this revolt of the financial markets. Morteage interest rates have risen more than 100 basis

sending lumber foreres shar-

trend of interest rates, the central bank and the Adminsitration have taken three steps towards price controls on

cent, for the time being. The banks are at present beholden to the Administration because the White House is attempting to secure passage of an \$8bn additional U.S. contribution to the international Monetary Fund - the so-called bail-out for the banks. The banks are therefore not about to raise the prime rate, but the pressure is mounting. Recently Mr John McGillicuddy, chairman of Manufacturers Hanover Trust, said his bank could hold the line on the prime rate as long as the Federal Funds

rate was 91/2 per cent or less. Several times in the past week funds have traded at 9 % and even at 9 %.
Second, the White House intervened twice before the July meeting of the Federal Open Market Committee (the

Fed's supreme monetary policy-making body) to demand that the Federal Reserve should not raise the discount rate. As Federal funds are rontinely trading at 91/2 per cent and the discount rate is 8\$1/2 per cent, it is clear that the discount rate has become an irrelevancy at that level and that the central bank has to impose credit rationing on the banks instead of using the pricing mechanism

Third, the intervention in the foreign exchange markets, if pursued with force and determination (something that is not happening), would close off an important element in the financial markets' revolt. It could not, however, stop that revolt expressing itself in still higher US interest rates. The possibilities of domestic credit controls or foreign exchange controls would then be left open to the authorities

Poor countries may take twice as much grain by year 2000

By Michael Prest

Grain consumption by the countries might have to fall poorest countries could almost further. by the end of the century, but the increase would consumption still be insufficient to eliminate hunger and malnutrition, the International Wheat Council

assuming the world economy, population and grain trade continue to grow along recent trends, total grain consumption in low-income developing countries will expand from 262 million tonnes in 1980 to 500 million tonnes by the turn of Grain consumpting the process of the particularly has been developed as the consumption of the particularly has been developed as the particular has be

the century.

Over the same period, total world grain consumption will rise by half to 2,180 million tonnes, a much slower rate of increase than in the past two decades. The council therefore estimates that world grain trade will amount to 265 million growth tonnes. by the year 2000, develop compared with 209 million will go million.

More than half the trade is tonnes.

More than nair the trade is likely to be exports from developed grain producers such as North America and Australia to poor countries. But the IWC gives a warning "If these could not be financed, or the port and inadequate to handle such a large volume of grain, the prospects for alleviating food shortages would be even wor-

The council believes, moreover, that some of the poorest countries, particularly in Africa, will depend on food aid for main producing countries will years to come. The volume of cereals food aid fell in the 1970s when prices were high, but countries might not then be without some continuing aid consumption in very proper countries. consumption in very poor council says.

Breaking down bv groups, the council, which represents grain producers and consumers, including centrally says in a report on world grain planned economies, says that supply and demand to the year demand in all developing 2000.

and the year demand in all developing countries could rise from 437 The council forecasts that, million tonnes to 818 million

tonnes At the same time, demand in the centrally planned economies, of which the Soviet Union particularly has been a heavy importer of grain, could rise

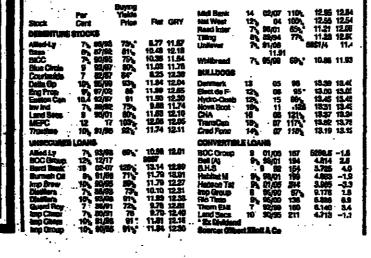

Grain consumption per capita has passed its peak, and greater efficiency in the use of grain, notably for cattle feed, will contain consumption to about 810 million tonnes compared with 570 million tonnes.

Slower economic growth and almost stagnant population growth mean that demand in developed market economies will go up by less than 100 million tonnes to 446 million

If demand is difficult to project because of changes in income, dietary habits, and population growth rates and composition, grain production is even harder to forecast.

Centrally planned economies, however, should increase their output from 549 million tonnes to 855 tonnes. Developed importing countries would eliminate imports by raising crops from 62 million tonnes to 90 million tonnes.

Notice is hereay given to the holders of outstanding 5% Convertible Guaranteed Debentures Due 1992. (the "Debentures") of Borden Overseas Capital Corporation N.V. (the "Company") that in accordance with terms of the Indenture dated as of September 1, 1972 (the "Indenture") among the Company, Borden, Inc., as Guarantor (the "Guarantor"), the Bank of America National Trust and Savings Association, as Trustee, the Company has elected to redeem all of the ontstanding Debentures on August 31, 1983 (the "Redemption Date") at a redemption price of 1014 % of the principal amount thereof plus accrued interest from September 1, 1982 to August 31, 1983. Payment of the redemption price and accrued interest, which will aggregate \$1,062.36 for each \$1.000 principal amount of Debentures (the "Redemption Price"), will be made upon presentation and surrender of Debentures, together with the September 1, 1983 and all subsequent interest coupons attached, at the option of the holder either (a) at Citibank, N.A., Receive and Deliver Department, III Wall Street, 5th Floor, New York, NY 10043, or (b) subject to any laws or regulations applicable thereto in the country of any such office, at the offices of the additional Paying and Conversion Agents set forth below.

On the Redemption Pate the Redemption Price will become due and payable

On the Redemption Date the Redemption Price will become due and payable upon each Debenture. No interest will accrue on the Debentures on and after August 31, 1983.

CONVERSION OR SALE ALTERNATIVES

Debentureholders have, as alternatives to redemption, the right to sell their Debentures through usual brokerage facilities or, on or before the close of business on August 31, 1983 to convert such Debentures into Common Stock of the Guarantor. The right to convert the principal of the Debentures to be redeemed will terminate at the close of business on August 31, 1983.

The Debentures are presently convertible into Common Stock of the Guarantor at the price of \$31.50 per share, resulting in a conversion rate of approximately 31.75 shares of Common Stock per \$1,000 in principal amount of the Debentures. The Guarantor will pay a cash adjustment in United States dollars in lieu of fractional shares in accordance with Section 3.03 of the Indenture.

So long as the market price of the Common Stock exceeds \$33.46 per share, the market value of the shares of Common Stock into which the Debentures are convertible is greater than the Redemption Price. On July 18, 1983, the closing price of the Guarantor's Common Stock on the New York Stock Exchange as reported by the Western Edition of the July 19, 1983 Wall Street Journal was

To convert Debentures to Common Stock, the Debentures, with the September 1, 1983 and all subsequent interest coupons attached, together with written notice of election executed by the holder that the holder elects to convert such Debenture, and specifying the name or names in which the shares of stock deliverable upon conversion shall be registered, with the address(es) of the person(s) so named, must be delivered to either (a) the New York office of Citibank, N.A., mentioned in the first paragraph of this notice, or (b) subject to any laws or regulations applicable thereto in the country of any such office, to the offices of the additional Conversion Agents set forth below.

International Signal & Control Group PLC

(Incorporated in England and Wales on 7th September, 1982 under the Companies Acts 1948 to 1981 No. 1662614)

Offer for Sale by Tender ROBERT FLEMING & CO. LIMITED

34,600,000 "A" ordinary shares of US\$0.10 each

at a minimum tender price of

125p per share

the price tendered being payable in full on application

The "A" ordinary shares now offered for sale are uniform in all respects with the ordinary shares previously issued and listed on The Stock Exchange, London and the Luxembourg Stock Exchange except that, until 17th February, 1984, they are subject to the restrictions as to registration by or on behalf of North American Persons set out below.

The Application List for the shares now offered for sale will open at 10.00 a.m. on Friday, 12th August, 1983 and may be closed at any time thereafter.

The shares of ISC have not been registered under the United States Securities Act of 1933, as amended, and none of the "A" ordinary shares now being offered for disposed of, directly or indirectly, in the United States of America, its territories or possessions ("the USA") or in Canada or to nationals or residents thereof, the estates of such persons, or any corporation or other entity organised under any law of the USA or Canada or any political subdivision thereof (collectively "North American ") at any time prior to 17th February, 1984. Every applicant for, or renounced ordinary shares comprised in this Offer for Sale and every applying for registration in respect of "A" ordinary shares of ISC prior to 17th February, 1984 will be required to make a declaration in the form contained in the ordinary shares by North American Persons, nationality declarations will be required in connection with all transfers of shares of ISC. Furthermore, no person receiving a copy of this Offer for Sale and/or an Application Form in any territory other than the United Kingdom or the Grand Duchy of Luxembourg may treat the same as constituting an invitation to him, nor should be in any event use such Application Form, unless, in the relevant territory, such an invitation could lawfully be made to him and such Form could lawfully be used without compliance with any registration or other legal requirements. It is the responsibility of any person outside the United Kingdom or the Grand Duchy of Luxembourg wishing to make an application hereunder to satisfy himself as to full observance of the laws of the relevant territory in connection therewith, including the need to obtain any governmental or other consents which may be required and the observance of any other formalities to be observed in such territory.

Preference will be given, in respect of up to 10 million "A" ordinary shares of ISC (28-9 per cent. of the shares being offered for sale), to applications made by shareholders of ISC on the Register at the close of business on 29th July, 1983 (other han shareholders who are, or are believed to be, North American Persons).

INDEBTEDNESS

At the close of business on 30th June, 1983, ISC and its subsidiaries had outstanding rowings or indebtedness in the nature of borrowings, including bank overdrafts, as

- (i) revolving credit loan facilities (unsecured) with banks under which the principal amount then owing was \$11-5 million;
- lease finance obligations totalling \$0-8 million;
- (iii) other loans (unsecured) totalling \$0-1 million; and contingent liabilities under advance payment guarantees, performance bonds and letters of credit issued by their bankers in the normal course of business in the amount of \$46.0 million, of which \$18-8 million was secured by bank deposits.
- ISC Electronics Inc., a subsidiary of ISC, is contingently liable in respect of a bank loan in the amount of \$0.7 million made to a third party; the subsidiary has the benefit of an indemnity from Parent Enterprises, Inc. (a company of which Mr. J. H. Guerin is the sole shareholder) in respect of this loan.
- At the same date, ISC and its subsidiaries had aggregate cash balances of \$19-8 million, of which \$18-8 million was held on interest bearing fixed deposit as security in respect of advance payment guarantees and performance bonds.
- At the close of business on 30th June, 1983, The Marquardt Company had outstanding borrowings or indebtedness in the nature of borrowings, including bank overdrafts, as
- (i) a note payable (secured) of \$2-6 million; and (ii) lease finance obligations totalling \$0.7 million.

Save as aforesaid and apart from intra-company borrowings, neither ISC or any of its subsidiaries nor The Marquardt Company or its subsidiary had at that date any loan capital tincluding term loans; outstanding, or created but unissued, or had outstanding other borrowings or indebtedness in the nature of borrowings, including bank overdrafts and liabilities under acceptances tother than normal trade bills or acceptance credits, outstanding mortgages, charges, hire purchase commitments or guarantees or other material contingent liabilities.

The following is the text of a letter to Robert Fleming which has been received from the

Dear Sirs.

ISC Electronics Inc., a wholly owned US subsidiary of ISC, has conditionally agreed to acquire the entire issued share capital of Marquardt. This letter provides information, first on the Existing Group and secondly on Marquardt, together with some information on the Enlarged

THE EXISTING GROUP

ISC has been listed on The Stock Exchange, London and on the Luxembourg Stock Exchange since October 1982. It is the holding company for a number of wholly owned subsidiaries in the USA and of a wholly owned subsidiary in the UK.

The business of the Existing Group had its origins in 1971 when Mr. James H. Guerin established a company in Lancaster, Pennsylvania, the aim of which was to obtain US Government work for communication devices and other electronic equipment and to identify and exploit commercial opportunities arising from such work. Contracts with the US Navy and the Federal Aviation Administration for the supply of electronic equipment were first obtained in late 1971. Tenders were made for government projects which included electronic test and control systems, and in the summer of 1972 orders were obtained from the US Navy for parts for inclusion in its missile programmes. Expertise expanded to include the telemetry technology which currently forms part of the business of the Existing Group's US Military Division. The first major complete

INTRODUCTION

A subsidiary of ISC has agreed to acquire the entire issued and outstanding share capital of Marquardt for completion immediately after this

The Existing Group

- The Existing Group is principally engaged in:-
- the marketing outside the USA of high value security, defence, communications and electronic warfare total systems;
- the marketing to certain large customers outside the USA of sub systems and components, and also products for which the Existing oup has exclusive marketing rights; and
- the design and production of medium to high technology electronic systems and equipment for the US Government.

The first two of the above categories form the business of the Existing Group's International Division, and the third is carried on by the US Military Division. Further information as to the categorisation between total systems, sub systems and components is given in the section "Business" under the heading "The Existing Group".

Marquardt

- Marquardt is engaged in:-
 - dynamics, including the production of propulsion units for missiles, satellites, space vehicles and other aerospace
- air launched weapons systems, including programmes for the US
- Government; and aerospace component manufacturing, including sub-contract

work on airframe sections and components.

systems contracts, involving applications derived from computerised test systems, were awarded in 1975. In the same year, the US Military Division set up an office in Washington D.C. in connection with tendering for US Government work.

A separate division was set up to deal with overseas trade in 1973. In 1975 the operation was transferred to a wholly owned corporation to take advantage of the tax regulations of the US Internal Revenue Code relating to exporters. Initially, overseas sales related principally to the provision of electronic test equipment, control devices and electronic components. The International Division also established a separate office in Washington D.C. in early 1980 to obtain export licences and to keep the International Division informed as to the current stance of the US Government towards the sale of equipment and the transfer of technology to various countries. An English company (previously called ESI London PLC) was established in 1979 to promote sales outside the USA.

BUSINESS

The two operating divisions of the Existing Group are the International Division (carried on Lancaster, Pennsylvania and in London; and the US Military Division (carried on in

The International Division now contributes the major part of the sales and gross profit of the rations of the Existing Group, as is shown by the following analyses for the five years ended

DEFINITIONS

In this document, except where the context requires otherwise, the following words and expressions have the following meanings:-

- International Signal & Control Group PLC — The Marquardt Company Marquardt the Existing Group - ISC and its subsidiaries prior to the acquisition of the Enlarged Group - ISC and its subsidiaries after the acquisition of Marmerdt Robert Floming - Robert Flaming & Co. Limited US or USA United States of America

\$. US\$ or dollars and cents — Dollars and cents in the currency of the USA The following table sets out the breakdown of sales by principal continental area for the five years ended 31st March, 1983:—

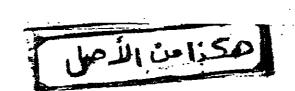

- United Kingdom

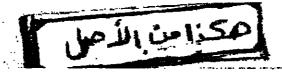

Total non USA 100 ton 100

The nature of the Existing Group's business is such that it tends to deal, on the basis of relatively large contracts, with a relatively small number of customers.

In relation to sales of sub systems and components (as set out in the table below) one group of customers under common control accounted for 42 per cent. of total sales (of all categories) the year ended 31st March, 1963 and anoticustomer for 5 per cent. of such sales (13 per cent. for the year ended 31st March, 1962).

In relation to sales of total systems (as set out in the table below) in the year ended Sist-March, 1983 one customer secounted for 19 per cent. of total sales and two others for 8 per cent. and 5 per cent. respectively. These sales were in respect of new contracts and so sales were made to these customers in earlier years.

International Signal & Control Group PLC

The state of the s

Three factors, in particular, remain crucial to the success of the Existing Group. Exports from the USA and the implementation of technology transfer agreements are subject to approval by the appropriate US Government agencies. Although the Existing Group has no reason to anticipate any substantial changes in current US policy, such changes in relation to relevant product classifications or destinations could be very significant to the Existing Group. Secondly, the Existing Group operates in very sensitive areas where secrecy as to the nature and extent of contracts and in more sense as to the librative of the nature of preparations. contracts and in many cases as to the identity of the customers themselves is of paramount importance. Should any breach of confidentiality occur, and the Existing Group takes stringent precautions that it should not, the results could be most detrimental to many areas of its business. This is particularly the case in view of the current importance to the Existing Group of its largest customers. Thirdly, the Existing Group does business with customers in certain countries a change in whose political or economic circumstances may have an adverse impact on /ISION

INTERNATIONAL DIVISION

international Division sales for the five years ended 31st March, 1983 may be analysed by

	1979 \$000	Years e 1980 3 000	nded 31 st Mar 1981 \$ 000	ch 1982 \$000	: 1983 \$000

Total Systems

Total systems are those for which the International Division is the prime centractor for concept, design, development, supply, installation, on-site testing and maintenance. In certain cases, the International Division will supply such total systems on a turnkey basis. In other cases, it is involved in the transfer of technology, whereby the customer acquires the ability to manufacture equipment itself. A total system is one which stands on its own and requires little, if any, additional peripheral equipment or adjunctive sub systems.

The contract value of each total system is several million dollars and it will therefore be noted from the above table that relatively few such system contracts were obtained in the five years ended 31st March, 1983. In the last such year, contracts relating to three major programmes were secured and these accounted for substantially all of the increase in sales of

The Existing Group is marketing total systems in the principal areas set out below:—

The International Division is involved in the design, supply and implementation of complete security systems for government and commercial use. These include systems for detecting and preventing intrusion. Each system is tailored to meet the specific requirements of the customer and systems that have been supplied include those for the protection of large installations (such as building complexes, oil fields and airports) and border areas. Features to be found in these systems include computerised control centres, card and keyboard access control equipment, acoustic or seismic sensors, closed circuit televisions and metal or explosive detectors utilised as appropriate to provide a comprehensive security capability. A modular approach is adopted to ensure that the system can be readily updated.

The International Division has entered into contracts for the supply of systems and the transfer of technology relating to production capabilities for an aircraft delivered special purpose ordnance device and a range of other ordnance systems. In cartain of these contracts the systems are assembled in facilities directly under the Existing Group's control. In other cases subcontractors are used, including Marquardt.

(c) Communications and Electronic Warfare

The communications systems marketed in the five years to 31st March, 1983 were tactical munication mampack radio systems utilising RF of YPF digitally-synthesized transcrivers.

Electronic warfare systems form a key element of any modern military operation. They are exigned to perform a wide range of functions including surveillance of opposing forces radio manunications, the pertial or total disruption of their transmission, and the dislocation of any manunication or other electronic devices used by an opposing force in its aircraft, missile, land

of the control of the

A sub system does not stand alone and normally works in conjunction with an existing or proposed total system held by the customer. In this case, the customer provides a specification for the operation of the sub system and the International Division provides a sub system to fulfil this role. The responsibility of the International Division is limited to the provision of this sub-system to meet that specification without having the responsibility for the performance of the total system. Examples of this are mini-computers to act as control elements in large test stations already installed; RF signal generators to act as atimalli for in-process that systems already in place in radio factories, large power converters to adapt systems purchased from other sources by tion in sophisticated electronic network systems used in fixed and mobile station operations (including HF or VHF receivers, monitor receivers, processors and appropriate antennae).

The International Division is required to expend varying degrees of engineering time to document, adapt, inspect and support final test and acceptance at the installation site. It is normally involved in consultation with the client to establish the design and performance parameters and advise on how integration with the client's total system can best be achieved.

Component Procurement Services

The International Division is active in providing certain oversess clients with a wide range of electronic components and equipment, the majority of which are manufactured in the USA. It does not normally stock these components but initials orders upon receipt of a firm order. With certain orders, engineering specifications have to be prepared by the International Division to ensure that the component complies with the customer's performance requirements. Examples of components include thin film and thick film integrated circuits, discrete transistors, transactorised monolithic circuits, inductors and capacitors. Technical inspections are performed when received by the environment.

when required by the customer.

The Existing Group has established, through its UK subsidiary, a branch to stock and distribute components. These components size purchased both from the Existing Group's US sources and also from a wide range of other suppliers, including French and Japanese and the second second

Exclusive Marketing Rights

The International Division markets certain systems including security, ordnance and communication devices for which it has exclusive marketing rights outside the USA. The majority of these products are manufactured in the USA.

Marketing for International Operations

The current marketing strategy of the international Division has two sims: identification of customers and utilisation of internal technical expertise augmented by suppliers of electronic products and technologies. Potential customers are those foreign governments or other institutions which have sufficient funds, have a requirement for a relevant system or product and, where necessary, are likely to qualify for a US export licence.

The International Division seeks to identify available technology and hardware which would meet the requirements of potential customers and which, in the case of US products, it is thought will be approved by the CS Government for export to the country involved. The International Division employs approximately 130 people.

Export Licences

The export of goods or technology from the USA by the International Division requires an export licence. The ability to obtain such licences is assential to the business of the International Division.

The export of goods or technology of military or defence significance is regulated by the US Department of State in furtherance of the security and foreign policy of the United States. The export of certain other goods or technology is regulated by the US Department of Commerce to protect the demestic economy and to further US foreign policy and national seturity. The Department of Defence also reviews certain proposed exports for national security purposes. The altimate destinations and use of the goods or data are important considerations in both licensing procedures and are often incorporated into the terms of the licence.

In addition, the business of the International Division may be affected, either favourably or broughly, by embargoes of other trade restrictions imposed by the USA or other countries.

During the year suded 31st March, 1983, about 78 per cent. of the dollar value of the goods and technology exported by the International Division was covered by licences issued by the Commerce Department, and the belance was covered by licences issued by the State

Failure to comply with these licensing requirements, or to observe embargues and other trade restrictions, including material breaches of the terms of the licences, could have a material adverse effect, on the business of the International Division

US MILITARY DIVISION

The US Military Division designs and manufactures a range of medium to high technology electronic miditary equipment and products systems primarily for the US Government, concentrating on contracts which involve the development for full manufacture of products at the prototype stage, rather than the development of its own products. However, some test at the prototype stage, rather than the development of its own products. However, some test equipment has been designed and developed in house. The US Military Division has to meet equipment has been designed and developed in house. The US Military Division has to meet stringent US Government quality requirements and therefore a significant amount of product testing in carried out to ensure a high degree of reliability.

In the year ended 31st March, 1983 approximately 74 per cent. of the US Military Division output was sold directly to the US Defense Department. Most of the remainder was sold in other US corporations acting as prime contractors to the US Defense Department.

The fact that this Division is a supplier to the US Defense Department is of importance to the distinty of the International Division when marketing systems outside the USA. In addition, tachnological capability of the Division is of benefit to the international operations.

the technological capability of the Division is of benefit to the international operations.

The US Military Division's instense is obtained mainly by hidding competitively in the US military equipment market for emitracts put out to tender by the various military and Defense military enough and market for emitracts put out to tender by the various military and Defense Department are normalized as a five year basis with annual reviews and amendments, Details of specific mally determined on a five year basis with annual reviews and in advants. In view of the contracts to be put out to tender are generally known about 12 months in advants. In view of the contracts to be put out to tender are generally known about 12 months in advants. In view of the nations of the market and the products, no advertising or publicity campuigns are undertaken.

The US Military Division amplies some 500 people and occupies some 75 000 square feet of manufacturing and office space in Lancaster, Pennsylvania.

Products of the product of the second of the Programmes parmelly spain several points with makin of the early work being devoted to developing probably passes are reflering those photolypes for efficient production and testing. The specific areas in which the US Military Division currently operates are as follows:

(i) Sensor Systems

The US Military Division currently produces and markets PEWS (Pistoon Early Warning System), a seismic and magnetic sensor system which monitors activity within an area and transmits data to a receiver which enables the target to be identified as either one or a group of men or vehicles. Contracts are in progress for the production of other advanced sensor systems.

(ii) Telemetry Systems

Various types of DKT data transmitting sets are produced for the US Navy. These are carried on the missile during development and testing in order to transmit back information on its performance. They may also be used to test missiles in government stores on a sample basis.

(iii) Electronic Fuzes

Puges are electronic detonating devices which usually include a target detecting system. In the late 1970s, fuzz programmes accounted for a significant proportion of the work carried on by the US Military Division. Specific projects included the M-81? system used on the Chaparral missile and parts of the Shrike and Sparrow missile fuzes.

(iv) Communication Systems

Communications contracts include the AN/GRA-114 radio data link sound ranging system and the TD-1065 high speed data buffer, both produced for the US Army. The AN/GRA-114 picks up the sound of enemy artillery fire and locates its source, and the TD-1065 scrambles data or voice patterns for transmission over existing US Army communications systems. The Existing Group has recently received its first export order for sound ranging systems.

(v) Test Equipment

Test equipment projects have included a sub-contract, in the mid 1970s, from a major US defence contractor to design and develop equipment to test sub systems of the C-4 Trident Missile. Expertise resulting from these projects continues to be developed in the design of specialised automatic test equipment primarily for in-house use.

(vi) Other Products

The Directors of ISC consider that there has been a tendency in recent years for prime contractors on larger government defence projects to increase the amount of work sub-contracted to other businesses. The US Military Division, benefiting from its government qualifications and experience, has gained several major sub-contracts with US prime defence contractors. This involves the production of a variety of standard electronic modules for use in specialised computer-related and other systems.

RELATIONSHIPS WITH CUSTOMERS

The International Division has longstanding and close relationships with many of its customers and is required by them to maintain strict confidentiality regarding contracts. In particular, in many cases, the Existing Group cannot disclose the identity of the customer, the subject of the contract or the location at which the products or services supplied by the Existing Group are to be used. Extended credit is advanced to certain of these longstanding customers.

The US Military Division has received security clearance from the US Defense Department and complies fully with that Department's requirements of confidentiality and security.

RELATIONSHIPS WITH SUPPLIERS

The International Division is dependent on outside suppliers for a large part of the constituent elements of its systems and sub systems. Although delays in delivery, or the supply of defective parts, by outside suppliers could scriously hamper progress on a particular project, the International Division has not in the past experienced difficulties of this nature. As far as the US Military Division is concerned, the Directors of ISC consider that there is no significant risk to its operations from dependence on any one supplier.

RESEARCH AND DEVELOPMENT

Research and development is carried on principally by the US Military Division, which has traditionally concentrated more on re-design and modification than on pure research. To enhance the Existing Group's capabilities in selected areas, an Advanced Systems sub-division has been established. Expenditure which does not relate to defence contracts funded by the US Government is written off in the financial statements in the year in which it is incurred. Certain work is currently being carried out on the development of thin film and ring core magnetometers for application in sensitive fuzes and sensors.

A budget of 2 per cent. of total sales has been allocated to augment the US Government research and development programmes undertaken by the US Military Division.

COMPETITION

The Existing Group faces considerable competition both within the USA and internationally in all areas of its operations. While it is expected that competition based on improving technology will continue to be significant to the Existing Group's operations, the Directors of ISC believe that the position established by it, combined with the anticipated growth in demand for the systems and products of the type supplied by the Existing Group throughout the world, should enable it to meet such competition.

PRINCIPAL PREMISES

The US Military Division and the International Division operate from separate leasehold premises in Lancaster, Pennsylvania. The latter division also operates from leasehold premises in London and in Basingstoke. Full details of these are set out in paragraph 6 of Appendix 5.

ORGANISATION, DIRECTORS AND EMPLOYEES

The Board of ISC is responsible for the overall direction of the activities of the Existing Group, but the management of the divisions are responsible for their day-to-day operations. In order to maintain the security clearance with the US Defense Department, the share capital of the subsidiary through which the US Military Division operates is subject to an irrevocable proxy in favour of three persons approved by the Department who are also directors of that subsidiary (see material contract (viii) in paragraph 16(a) of Appendix 5).

Mr. James H. Guerin (aged 53) founded the original business of the Existing Group in 1971 and is the Executive Chairman of ISC. He has a Master of Science degree in Electrical Engineering and has over 25 years of experience in that field. Prior to 1971 he was General Manager, Systems Division, of Hamilton Watch Company directing over 1,600 personnel in the development and manufacture of ordnance, electronic devices and systems and prior to that the Engineering Department Manager for a portion of the Poseidon missile system for Lockheed Wissiles and Space Company

Mr. Carl H. Dreyer (aged 53) has been with ISC or predecessor companies since they were founded and is Vice-President of Administration and Corporate Secretary of the Existing Group's US holding company. He has a Master of Science degree in Electrical Engineering and over 23 years of experience in that field. He was previously Director of Product Assurance for Hamilton Watch Company and United Aircraft Corporation and prior to that he was involved with quality engineering at Honeywell, Inc.

Mr. John M. Fox (aged 70) has been a non-executive Director of ISC and a predecessor company since 1981. He is Chairman of SCA Services Inc. He retired as a Director of Inter-national Business Machines Corporation (IBM) in April 1983.

Mr. John G. Hartley (aged 36) has been Managing Director of the Existing Group's UK sidiary since 1979. He has an Honours Degree in Economics. Previously he was a self-bloyed management consultant and also held a number of advisory and executive posts in turing industry in the United Kingdom.

Mr. John A. Heywood (aged 45) has been a non-executive Director since 1982. He was a Joint Managing Director of Jardine, Matheson & Co., Limited until July 1982, with special responsibility for international operations, having been employed by that company in the Far East for 20

Mr. Staart M. Pindell Jur (aged 44) has been with ISC or predecessor companies since 1974 and has been Vice-President and General Manager of the International Division since its inception. He has a Backelor of Science degree in Electrical Engineering and has over 20 years of experience, and holds several patents, in the electronics field. Before this, he was President of Novox, Inc., a firm which manufactured electrical and electronic instruments and, prior to that, the Manager of Product Development in the Instruments Division of Hamilton Watch Company.

Mr. Joseph H. Zilligen (aged 42) is Finance Director of ISC and was Vice-President, Finance, and Treasurer of its predecessor company from 1980. He was previously a management consultant with Arthur Young & Company and Treasurer of The J. B. Baker Company.

The Group employs some 640 people. Industrial relations have been good, although there was a one month strike by production employees in the US Military Division in 1981 when alternative arrangements were made to continue production. After brief qualifying periods a non-contributory pension scheme and life, medical expenses and long term disability insurance are available to all employees in the USA and the United Kingdom.

PAST PROFITS

There is set out below a summary of the results of the current operations of the Existing oup, on the historical cost basis, before extraordinary items arising from the offer for sale in October 1982, for the five years ended 31st March, 1983, which has been extracted from the tants' Report in Appendix 1. The Existing Group draws up its financial statements in dollars, as this is its principal operating currency.

V.... anday 91.4 March

					NGSCI 3121 MC	
		1979 \$000	1980 \$000	1981 \$000	1982 \$000	1983 \$00 0
Sales Cost of sales		26,567 (19,753)	36,519 (27,575)	51,586 (37,050)	75,752 (56,227)	107,488 (76,404)
Gross profit Overbands Other operating inco		6,814 (3,698) 19)	8,944 (5,390) 328	14,536 (6,885) 315	19,525 (8,319) 154	31,076 (12,438) 124
Operating profit interest receivable interest payable		3,307 100 (1,475)	3,882 135 (2,472)	7,966 110 (3,893)	11,360 (6,042)	18,762 616 (4,282)
Profit on ordinary ac Taxation	tivities before texetion	1,932 (449)	1,545 (327)	4,183 (1,278)	5,318 (2,317)	15,096 (6,856)
Profit on ordinary a	stivilies effer texation	1,483	1,218	2,905	3,001	8,240

During the period under review, the growth in profit has been largely due to the expansion in inces of the international Division. In the four years to 31st March, 1982, gross profit margins remained relatively constant overall on the increased sales. Further significant growth in the International Division occurred in the year to 31st March, 1983 and, although the sales of the US Military Division increased, turnover and profit fell short of budget. Production and shipments of the US Military Division did not meet the production plan and in addition some difficulties were ared in the timing of suppliers' deliveries.

Interest costs increased during the period to 31st March, 1982 reflecting the expansion of trade on extended credit terms, particularly with customers of the International Division. The year to 31st March, 1983 benefited from the moneys raised from the offer for sale in October 1982. Special factors relating to the taxation charge are discussed in Note 4 to the Accountants' Report in Appendix L

MARQUARDT

Marquardi was established in California in 1944 and began operations as a sub-contractor to the University of Southern California on a subscnic ramjet propulsion development programme for the US Navy. Marquardt was a public company from 1952 to 1968 when it was acquired by CCI Corporation ("CCI") of Tules. Oklahoms. Marquardt operated as a division of CCI from 1968 until May 1974 but, following a reorganisation as of that date, Marquardt has operated as an autonomous subsidiary of CCL.

Marquardt's original work on ramjets led to an involvement in dynamics engineering during the 1950s including ram air power turbine driven units. Subsequently Marquardt developed a range of liquid fuelled rockets for space use.

The dynamics engineering described above required sophisticated manufacturing techniques which were capable of being adapted for other uses. In the 1960s, Marquardt developed a second principal product area, air launched weapons systems. This involved the establishment of special manufacturing techniques and processes for the afficient production of high volume, low cost weapon casings for ordnance systems and components. Marquardt's third principal product area, serospace component manufacturing, was also established to take advantage of Marquardt's production facilities, a number of sub-contracts have been completed for various US space companies.

The following table sets out an analysis of Marquardt's turnover and gross profit for the five

PRODUCTS

1. Dynamics

Marquardt is engaged in three principal areas of dynamics engineering:-

a) Rocket Propulsion Systems

Marquardi's work on liquid fuelled rockets has concentrated on low thrust systems used in precision control applications. Marquardt has not been involved in main rocket engines for missiles or satellite launchers. Liquid fuelled rockets fall into two main categories, monopropellant and bipropellant. In the first type, thrust is provided by the reaction of a simple liquid fuel with a catalyst. Such systems are relatively simple and were used on earlier, lighter satellites which were sent into a low orbit up to some 150 miles above the Earth. Their main drawback is that they have lower performance than bipropellant rockets and the reaction with the fuel gradually degrades the catalyst. With the trend towards larger, more sophisticated and more expensive satellites being launched into geosynchronous arbit approximately 23,000 miles above the Earth (an orbit in which the speed of the satellite round the Earth matches the speed of rotation of the Earth itself, the satellite remaining in the same place relative to the Earth, systems with a longer-life have been sought. This has led to a concentration on bipropellant motors where thrust is produced by the interaction of two different liquids. Such systems can have a life of up to 10 years which is necessary to justify the cost of putting large satellites into geosynchronous orbits. In the early 1970s Marquardt took the decision to develop a family of bipropellant rockets for satellite application, having anticipated the trend towards larger satellites. This is now Marquardt's dominant technology in rocket motors though monopropellant units are still produced for specialised uses.

Marquardt's first operational engine flew on the US Lumar Orbiter which circumnavigated. Marquardt's work on liquid fuelled rockets has concentrated on low thrust systems used in

Marquardt's first operational engine flew on the US Lunar Orbiter which circumnavigated the Moon in 1966 and since then its rocket engines have been used on every manned US space mission. Over 400 Marquardt engines were supplied to Rockwell International for the Apollo programme. The Space Shuttle carries 44 precision attitude control rocket engines developed and manufactured by Marquardt. Apart from its contribution to the manned space programme, Marquardt also provides reaction control rockets for a number of different satellites including US meteorological and communications satellites and the British Aerospace L-SAT.

Marquardt currently manufactures an extensive range of bipropellant and monopropellant precision reaction control rockets with thrusts ranging from 0-010 lbs to 1800 lbs. It is also engaged in the research, design, development and production of new propulsion methods including programmes sponsored by the National Aeronautic and Space Agency ("NASA") and the US. Defense Department.

b) Turbo Products

Marquardt has been a leading developer and producer of ram air powered turbine driven units, controls and accessories since 1948. More than 20,000 units of both fixed-pitch and variable-pitch turbines have been delivered by Marquardt for a broad range of military and commercial aircraft applications including missiles, target systems and pod assemblies. Products break down into two broad categories:—

(i) Target Tow Reels—Marquardt produces two varieties of reeling machines which provide for the recovery of tow cable and targets used in air-to-air and ground-to-air weapons training exercises. Both models are capable of supersonic target towing. The

(ii) Ram Air Turbines—These devices provide either primary or emergency hydraulic, electrical or mechanical power for aircraft, pods or missiles. Examples of Marquardt's products are the ram air turbine to provide emergency power for the DC10 civil airliner and a ram air powered turbine generator which provides primary power for the electronic counter-measures pod mounted on F-4 Phantom aircraft.

Airbreathing Propulsion

Marquardt's original business in ramiets is now the smallest activity in terms of sales but it remains a key technology. The ramjet concept is considered to be one of the simplest, most costefficient propulsion systems ever devised for flight within the Earth's atmosphere. The ramjet
uses fixed components (as opposed to rotating parts in a turbine) to compress air which is forced into the engine by its forward motion. The ramjet therefore needs forward velocity to start its operating cycle. Once operating, compressed air passes to a combustion chamber where fuel is burned and the resultant hot gas expands to high velocity in a nozzle, providing high speed

The initial velocity required by a ramjet is provided by a booster rocket and most modern ramjet powered missiles use the integral rocket ramjet ("RR") concept. In this system a solid propellant charge in the combustion chamber accelerates the unit to ramjet operating speed. At that point, when the propellant has been used up, the rocket components are jettisoned and the engine operates as a pure ramiet.

There are a number of versions of this system in which the ramjet uses either solid or liquid fuels. Ramjets are effective up to about five times the speed of sound, and a further variant, known as the supersonic combustion ramjet, will operate at still higher speeds. Marquardt has recently successfully developed and flight tested a liquid fuelled IRR.

Marquardt has designed, developed and produced over 2,300 ramjets for US military applications, mainly for missile and target drone propulsion. Marquardt's current programmes are primarily concentrated on the development of propulsion systems for the next generation of strategic and tectical missiles, These programmes include development of the cruise engine for the US Navy's supersonic anti-ship missile target and a variety of liquid and solid faelled IRRs les, Marquardt has developed an IRR to power the advanced strategic air launched missile (ASALM). Development of this engine is continuing for new applications such as long range surface-to-air and air-to-air missiles. The Directors of ISC believe that there is a current trend towards hypersonic missiles and that Marquardt's technology in ramjets is likely to prove of increasing importance.

2. Air Launched Weapons

Marquardi's capabilities in air launched weapons technology cover the production of air-borne externally carried free fall weapons or casings for such weapons, anti-tank and anti-aircraft warheads and assemblies, shaped charges, dispensers and sub-munitions components.

Marquardt's production expertise has proved especially valuable in the light of the increasing tendency of modern weapons systems to be packed with sub-munitions. For example, one aircraft delivered special purpose ordinance system manufactured by Marquardt has resulted in a production run of more than 90,000 wespons and 20 million sub-munitions. Marquardt has also been involved in the TOW (Tube launched, Optically tracked, Wire guided) anti-tank weapon and Sidewinder (sir-to-air missile) programmes.

3. Aerospace Component Manufacturing

Marquardt offers a wide range of advanced manufacturing services from highly specialised protetype construction to high volume, low cost fabrication of precision aerospace and ordnance structures, assemblies and components. Major programmes which have been undertaken in this area have included multiple bomb ejector racks, of which 2,736 were produced for F-111 aircraft, flaptracks for Boeing 737 civil-aircraft and sub-assemblies for landing gear. Currently Marquardt manufactures a prime structural component for the B-1 bomber and the launch motor case for the TOW anti-tank weepon. It has been the sole producer of TOW motor cases since 1970 and over 350,000 have been made.

MARKETS

Marquardt's customers have been predominantly the US Government and Government agencies (in particular NASA). Sales by category of customer, in percentage terms, for the past

RESEARCH AND DEVELOPMENT

Marquardi's restarch and development is principally undertaken in the course of its contracts with, and funded by, NASA and the US Department of Defence. Marquardt has its ownfacilities for testing an breathing and rocket engine systems and related components.

International Signal & Control ____Group PLC____

COMPETITION

Although the Directors of ISC believe that there is no other US corporation with a range of products and activities directly comparable with Marquardt's, Marquardt faces considerable competition both within the USA and internationally in all areas of its operations. Certain of Marquardt's competitors are significantly larger in terms of turnover and financial resources. However, the Directors of ISC are confident that Marquardt's technical expertise in its three main product areas of operation will enable it to expand in the future.

Marquardt owns the freehold of a 56 acre site at Van Nuys. California. north of Los Angeles. which is utilised almost entirely by Marquardt. Manufacturing space extends to 220,000 square feet, warehousing 140,000 square feet and engineering 120,000 square feet. The site includes a 13 acre test facility for airbreathing and rocket propulsion systems and can accommodate significant expansion of the present facilities without the requirement to purchase of lease

ORGANISATION, SENIOR OFFICERS AND EMPLOYEES Organisation

In order to maintain the security clearance with the US Defense Department, the share capital of Marquardt will, after its acquisition by ISC Electronics Inc., be subject to an irrevoca-ble proxy in favour of three persons approved by the Department who will be directors of Marquardt (see future contract (i) in paragraph 16(b) of Appendix 5).

Mr. K. E. Woodgrift (aged 48) is President and Chief Executive Officer of Marquardt. He has been employed by Marquardt since 1957 and has a Bachelor of Science degree in Mechanical Engineering. He has entered into a 5 year service agreement with that company, which will take effect on completion of the acquisition of Marquardt.

Mr. J. A. Marossy (aged 49) is Senior Vice President. Finance and Administration. He has been in charge of Marquardt's finances since 1979 and has a Master of Science degree in Business

Mr. A. N. Thomas (aged 60) is Vice President. Engineering. He has been employed by Marquardt since 1959 and has a Master of Science degree in Aeronautical Engineering.

Marquardt has approximately 850 employees. There is no trade union at Marquardt, which has an excellent record of industrial relations.

PAST PROFITS

There is set out below a summary of the profits of Marquardt on the historical cost basis for the five years ended 30th April, 1983, which has been extracted from the Accountants' Report in

		Years et	nded 30th Ap	ril .	
Sales Cost of sales	1979 \$000 61,150 (52,392)	1980 \$000 56,155 (47,821)	\$000 48.037 (39,646)	3000 50,545 (41,199)	1983 \$000 65,837 (54,189)

3- Ab - 5 4- 20th 41 1	000 45		dogline in	anles sainis	

In the four years to 30th April, 1982, there was an overall decline in sales, arising partly from reduced US Government spending on airbreathing products and partly from a commercial decision by Marquardt to reduce its air launched weapons production. However, the impact on profits before taxation was reduced by improved profit margins and interest benefits from the positive cash flow of Marquardt. With the significant improvement in sales in the year ended 30th April, 1983, compared with the previous years, together with the holding of margins and the continued improvement in net interest receivable, profits before taxation increased by some 66 per cent. on those for the previous year.

THE ENLARGED GROUP

TERMS OF THE ACQUISITION OF MARQUARDT

Under an agreement made between CCI (the holder of the entire issued share capital of Marquardt) and ISC Electronics Inc. (a wholly owned US subsidiary of ISC) dated 12th July. 1983. CCI conditionally agreed to sell to ISC Electronics Inc. the whole of the issued and outstanding shart capital of Marquardt. ISC has guaranteed the obligations of ISC Electronics Inc. under the agreement. The principal element of the consideration for the acquisition is the cash sum of \$43.5 million, of which \$39.5 million is payable to CCI on completion and \$4 million is payable to an Escrow Agent to be paid by such Agent to CCI (without interest) on the first anniversary of completion. The other element of the consideration is the issue to CCI by ISC of 600,000 new ordinary shares of \$0.10 each to be allotted credited as fully paid.

Mr. K. E. Woodgrift is the President and Chief Executive Officer of Marquardt and is a stockholder in CCI. He has agreed that, upon the acquisition of Marquardt, he will sever his connection with CCI and he has entered into a five year service contract with Marquardt, to take he acquisition, to continue to serve as its Presid Officer. Under this contract, he will receive a payment of \$500,000 before 31st December, 1983. Mr. Woodgrift is currently the holder of 1,900 shares of common stock of CCL representing approximately 3 per cent. of the issued and outstanding share capital thereof. CCI has agreed to purchase these shares in exchange for the transfer to Mr. Woodgrift of the 600,000 new ordinary shares of ISC to be allotted to CCI under the acquisition agreement. To the extent that the value of the 1,900 CCI shares may be less than the value of these new ordinary shares. Mr. Woodgrift will have received a benefit which will have been given to him in consideration of his assistance in the formation of the Enlarged Group.

The acquisition agreement is conditional (inter alia) upon the implementation of the Offer for Sale referred to herein. Completion of the acquisition is expected to take place on 15th August, 1983. The agreement contains warranties and indemnities on the part of CCI as to the financial, trading and taxation position of Marquardt. In addition. CCI and its principal officers have covenanted not to compete with Marquardt for the five years following completion.

Further details of the agreement for the acquisition of Marquardt and the arrangements with Mr. Woodgrift are set out in paragraph 12 of Appendix 5.

BENEFITS OF THE ACQUISITION

The Directors believe that the acquisition of Marquardt will have the following benefits:—

1. The acquisition will substantially increase the scale of operations in the USA and will result in a strengthened technology base. Moreover, Marquardt's product range is complementary to that of the Existing Group.

2. The expansion of US operations should enhance ISC's reputation internationally.

Marquardt's experience in developing business within the USA will be of value while at the same time the Existing Group's international marketing expertise can be of assistance in developing sales outside the USA for Marquardt's products.

4. Marquardt has a sound balance sheet, a good record of recent profits growth and cash generation and a strong management team. It is proposed that the present management will continue after the acquisition.

5. In the longer term there are significant benefits to be derived from a combination of the Existing Group's predominantly electronics technology with the aerospace and defence manufacturing capabilities of Marquardt.

PRO FORMA STATISTICS AT THE MINIMUM TENDER PRICE

The following pro forma figures illustrate the effect of the acquisition of Marquardt on the Existing Group. They are extracted from the unaudited pro forms statements set out in Appendix 3, which combine the results and not assets of the Existing Group for the year to 31st March. 1983 with those of Marquardt for the year to 30th April, 1983, as shown in each case by the respective Accountants' Reports. The number of shares used to calculate the proforms combined earnings per share and combined net assets per share respectively is set out in Appendix 3.

Minimum tender price Earnings per share Existing Group for the year ended 31st March, 1983 \$0.090 (6.0p) pro forma combined \$0.094 (6.2p). Historic price earnings ratio -- Existing Group
-- pro forma combined 20.2 times Net assets per share Existing Group as at 31st March, 1983
 pre forms combined

Forecast gross dividend yield on the basis of the forecast total dividends of \$0.02 (and related tax credit) per share for the year ending 31st March, 1984 To the extent that the striking price is higher than the minimum tender price, the proforms

\$0.85 (56p)

combined earnings per share will increase, as illustrated in Appendix 3. For the purpose of calculating earnings and not assets per share and dividend yield; dollar unts have been translated to their sterling equivalents at the rate of \$1.51 - £1.00. The above figures should be read in conjunction with the pro forms statements in

THE OFFER FOR SALE

Of the 34,600,000 "A" ordinary shares now being offered for sale, 24,344,000 are new shares to be issued by ISC to raise, at the minimum tender price, £28.7 million, after expenses, to finance the purchase of Marquardt. If such shares are subscribed at above the minimum tender price, the additional proceeds of the Offer for Sale will be used for the general working capital purposes of the Enlarged Group.

The balance of 10,256,000 "A" ordinary shares is being sold by six shareholders of ISC. Mr. Guerin is disposing of 8 million of these shares and three other directors of ISC or its subsidiaries are disposing of a total of 1,456,000 shares. Mr. Guerin is selling shares in order to reduce borrowings which were assumed or incurred by him in connection with the reconstruction which led to the establishment of the present group structure in October 1982. After the Offer for Sale, led to the continue to have a beneficial interest in 21,200,944 ordinary shares which will represent the present of all the shares in the same to the continue to the present of the present 15.5 per cent. of all the shares in issue after the Offer for Sale. The three other directors are raising funds to meet personal tax liabilities, to repay borrowings or to settle other liabilities arising out of the same reconstruction. All the vender shareholders, as well as the Directors of ISC who are not selling shares and Mr. Woodgrift, have undertaken not to sell any shares, or further shares, before 17th August, 1984 without the consent of Robert Fleming.

If it becomes apparent that the conditions precedent to completion of the agreement for the acquisition of Marquardt cannot or will not be satisfied and that the acquisition will not therefore be completed on 15th August, 1983, the Offer for Sale will be terminated and all application moneys will be returned to applicants without interest by post at the risk of the persons entitled thereto. Moneye to be returned will be posted by not later than 18th August,

DIVIDENDS

The Directors of ISC expect, in the absence of unforeseen circumstances, to recommend total dividends of \$0.02 per share in respect of the year ending 31st March, 1984. This is equivalent to \$0.04 per share prior to the scrip issue authorised on 5th August, 1983. A dividend has been declared of \$0.0225 per share for the period ended 31st March, 1983, payable to ordinary shareholders on the Register at the close of husiness on 13th July, 1983. Had the share capital of ISC in existence at 31st March, 1983 been in existence throughout the year ended on that date. the Directors would have recommended a dividend of \$0.0325 per share. All dividends are stated exclusive of the related tax credit.

It is expected that in future years interim and final dividends will be payable in January and : August respectively. All dividends will be declared in dollars but will be paid in sterling unless shareholders elect to receive payment in dollars.

CURRENT TRADING AND PROSPECTS

The results both of the Existing Group for the year to 31st March, 1983 and of Marquardt for the year to 30th April, 1983 exceed the corresponding figures for the previous accounting periods. The Existing Group's sales increased to \$107.5 million (from \$75.8 million) and pre-tax profits to \$15.1 million (from \$5.3 million) while Marquardt's sales increased to \$65.8 million (from \$50.5 million) and pre-tax profits to \$5.6 million (from \$3.4 million). Furthermore the Existing Group a order book, which includes contracts spanning several years and new orders obtained in Europe and the Far East, stood at the record level of \$160 million at 31st March, 1983; Marquardt's order. book at 30th April, 1983, similarly at a record level, was \$101 million.

The Directors of ISC believe that the acquisition of Marquardt will result in an enlarged group with considerable growth prospects both within the USA and elsewhere in the world. The Directors of ISC continue to look forward to the future with confidence.

JAMES H. GUERIN

APPENDIX 1

ACCOUNTANTS' REPORT ON ISC The Directors. nternational Signal & Control Group PLC. 17a Curson Street, lon W1Y 7FE

Robert Fleming & Co. Limited.

Gentlemen.

International Signal & Control Group PLC ("ISC") was incorporated in England and Wales on 7th September, 1982. ISC Electronics line. "Electronics" was incorporated in Delaware on 27th August, 1982 and acquired the entire issued share capital of International Signal & Control Corp. ("Corp") and its investments in its subsidiaries including the 50.2 per cent. holding of Corp in ISC London PLC ("ISCL"), formerly ESI London PLC, on 21st September, 1982. On the same date, ISC acquired a majority of the share capital of Electronics by an issue of shares of ISC. Following the completion of the offer for sale, published on 15th October, 1982, ISC acquired the remaining shares in ISCL and in Electronics. ISC thus controls the entire issued share capitals of Corp. ISCL and the other corporations then owned by Electronics except for the share capitals of certain subsidiaries of Electronics which, with certain assets owned by Corp. together called "the Commercial Operations", were sold at not book value to Parent Enterprises, Inc. (a company of which Mr. J. H. Guerin is the sole shareholder). The Commercial Operations were not involved in the mainstream business activities of Electronics or its subsidiaries. For the purpose of this report, ISC and its subsidiaries, excluding the Commercial Operations, are referred to as the "Existing Group"

We have examined the consolidated financial statements of ISC for the year ended 31st March, 1983 and of

We have examined the consolidated financial statements of ISC for the year ended 31st March, 1983 and of Corp for the four years ended 31st March, 1982 which include the results of ISCL since its incorporation on 14th August, 1979. Our examination of these statements has been in accordance with generally accepted auditing standards. We have made adjustments to the consolidated financial statements principally:

(i) to eliminate the results of subsidiary companies and divisions, including the Commercial Opera-tions, disposed of during the period under review; and

We have suchted the consolidated financial statements of ISC for the year ended 31st March. 1983. Mesers. Peat, Marwick, Mitchell & Co., Philadelphia, Pennsylvania acted as auditors of the consolidated financial statements of Corp for the two years ended 31st March, 1982. Prior to that date the consolidated financial statements of Corp were audited by another firm. The auditors of ISCL for the period from its incorporation to 31st March, 1981 and the year ended 31st March, 1982 were a firm other than ourselves.

The historical cost financial information which follows has been prepared on the basis of the accounting policies of ISC set out below, which are in accordance with UK generally accepted accounting principles, and from the audited consolidated financial statements of ISC and Corp after making such adhistments as we nation has been presented in US dollars as this represe principal operating currency of the Existing Group. In our opinion this financial information gives a true and fair view of the state of affairs of ISC and the Existing Group at 31st March. 1983 and of the profits and sources and applications of funds of the Existing Group for the five years ended on that date.

In our opinion the current cost accounts set out below have been properly prepared in accounts Statement of Standard Accounting Practice No. 16 on the basis of the account

No audited accounts have been made up for ISC or any of its subsidiaries in respect of any period

NOTES TO THE FINANCIAL STATEMENTS

Summary of significant accounting policies

ancial statement presentation

The foregoing financial statements have been receased in US dollars on the historical cost basis. All lifecant intra-company transactions and balances have been eliminated on consolidation.

Profit recognition on contracts is determined by reference to each production programme. A programme consists of all executed contracts for the manufacture or delivery of specific products or services. Where additional contracts are subsequently added to a programme, the programme total contract value is increased accordingly. Estimated costs to complete the required number of units yet to be delivered are recalculated to include the newly added units, and overall programme profits are estimated. The amount of estimated profits recognized at each accounting date is determined by reference to the proportion of the costs incurred, equivalent units completed or labour hours up to that date, compared to the total estimated programme costs, equivalent units or labour hours. This method of accounting for contracts has the effect of equalising profit manufacture including the interact of setting up and leaving costs asset the shell account of the contracture.

equivalent units or tabour nours. Anis method or accounting for contracts has the effect of equalising profit margins, including the impact of setting up and learning costs, over the whole period of the programme. Estimated losses on programmes are provided in full as soon as they are identified. Sales are recorded as billings are made which is on a regular basis consistent with programme costs. Variations from contract specification and claims are recognised as additional sales when sufficient information is available to promotion and country are recognized as automated suits with sufficient information is electronic probable acceptance by the customer and the determination of a reasonable est delitional raises. usics saves. usion of fixed assets

tion is provided based on the following estimated metal lives of smets using the straight-line

	≥ ."	Average estimated uneful life
Plant, machinery and tooling Transportation and office equipment	$\mathcal{Q}_{\mathcal{A}}^{\mathcal{A}} \hookrightarrow \mathcal{A}_{\mathcal{A}}^{\mathcal{A}}$	
Lessehold improvements		10 years

Finance leases, that is those leases where rights approximating to ownership of the assets are vested in Existing Group companies, are recorded in the balance sheet as assets and depreciated over their estimated useful lives. Costs on operating leases are charged against profits as they across.

Deferred charges, which are included in the balance sheet with intangible fixed assets, consist principally of borrowing commitment fees, marketing rights and assembly set up costs. Borrowing commitment fees are amortised over the team of the related debt. Marketing rights are amortised on the straight line besis over the horier of five years or the life of the related marketing agreement. Assembly set up costs are amortised over

Deferred taxation is provided in respect of all short term timing differences and of all other timing differences of material amount other than those which can be demonstrated with reasonable probability to continue in the future.

Research and development costs

Research and development costs incurred for specific contracts are charged to contracts in progress. Other arch and development costs are written off as incurred.

Assets and liabilities denominated in currencies other than US dollars are translated into US dollars at

exchange rates in effect at the balance sheet date. Profits and losses on trading transactions not entered into in US defiars are translated at syerage rates of exchange for the accounting period. The functional currency of each of the Existing Group companies is considered to be US deliars. Accordingly, all exchange differences are dealt with in arriving at operating profit.

Sales comprise amounts billed (excluding advance contract deposits not represented by work performed to third parties in respect of equipment shipped for international sales and progress billings for US military

For the years ended 3 ist.March, 1981, 31st March, 1982 and 31st March, 1983, certain customers under common control accounted respectively for 49 per cent., 57 per cent, and 42 per cent. of sales. At 31st March. 1983; 50 per cent. of sales. At 31st March. 1983; 50 per cent. of trade debtors by value related to these customers. In addition, for the year ended 31st March. 1983 another customer accounted for 19 per cent. of sales.

3. Profit on ordinary activities before taxation This is stated after charging the following:-Years ended 31st March 1979 1980 1981 1982 \$000 \$000 \$000 \$000 264 317 400 468

1981 **3**000 1,272 (20) The overall US taxation charge is lower than the standard taxation rate because of the favourable US

Years en

ded 31st March

federal taxation treatment applicable to one of the Existing Group companies arising from its status as a Domestic International Sales Corporation ("DISC"). Federal taxes have not been provided on earnings of approximately \$12.8 million retained in the DISC at 31st March, 1983 since such taxes will only be chargeable

approximately \$12.8 million retained in the DISC at \$1st March, 1983 since such taxes will only be chargeable if these earnings are distributed or the DISC status is not retained. The Directors of ISC have indicated that they intend that these earnings should be permanently retained in the DISC.

The US taxation charged in the above analysis arises principally from Pennsylvania state taxes. The UK taxation charges for the years ended 31st March, 1981, 1982 and 1983 respectively include amounts of \$132,000, \$967,000 and \$1,132,000, which relate to the sterling reported profits of ISCL, which were significantly greater than those recorded in dollars for inclusion in the Existing Group's accounts. This areas principally from the decline in value of sterling against the US dollar during these years. Accordingly, the UK taxation charge is greater than the standard rate of UK taxation applicable to the earnings of ISCL included in the above profit and loss accounts of the Existing Group. included in the above profit and loss accounts of the Existing Group.

The extraordinary items in the year ended 31st March, 1983 arose from the offer for sale published on 15th October, 1982, as follows:— 1,510

The profit of the Existing Group for the year ended 31st March, 1983 after extraordinary items, but before transfer of the issue expenses to share premium account, is \$4,619,000. Dividends payable in respect of the five years ended 31st March, 1983 relate to ISC and ISCL

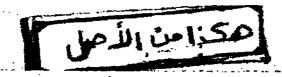

Earnings per share Examings per share for the years ended \$1st March, 1982 and 1983 are based respectively on earnings of \$3,450,000 and \$9,335,000 and a weighted average number of shares in issue in each year of 71.4 million and 92.4 million. The earnings are calculated as the profit on ordinary activities after texation, after making a notional interest adjustment to reflect the proceeds from the exercise of warrants and options as if such exercise had occurred at the beginning of the economic periods. The weighted average number of shares in issue is computed on the basis that all shares in 1880 arising from the reorganisation which resulted in the establishment of the Existing Group were in existence at the beginning of the respective accounting periods, except that the 1982 figure reflects the new shares in ISCL subscribed for each in December 1981. A further adjustment to the weighted average number of shares is made to reflect the 1-far-1 scrip issue, anthorised on 5th Adgust, 1983.

The capital structure of Corp during the three years ended 31st March, 1981 makes the presentation of comparable carnings per share data impracticable for these years.

5. Fixed assets Fixed spects of the Existing Group at 51st March, 1983 were as follows:—

The pro forms statement of combined net assets comprises the summation of the consolidated net assets of the Existing Group at 31st March. 1983 and the net assets of Marquardt at 30th April. 1983

The combined net assets of the Existing Group and Marquardt have been adjusted on the assumption that the estimated net proceeds of the Offer for Sale of new "A" ordinary shares amount to \$43.5 million and are used to acquire the entire issued share capital of Marquardt, and on the basic that the amount due to Marquardt from its former parent at 30th April. 1983 will have been waived before completion of the

Net assets per share for the Existing Group at 31st March, 1983 are calculated on the basis of net essets of \$71,565,000 and shares in issue at that date, adjusted for the 1-for-1 scrip issue, of 111.5 million Combined net assets per share are calculated on the basis of combined net assets of \$116,220,000 and 136-4 million shares, being the number of shares in issue following the Offer for Sale.

APPENDIX 4 APPRAISEDS VALUATION

AFFIRMATING TABOATION
The Directors.
International Signal & Control Group PLC.
17a Curzon Street.

150 East Colorado Boulevard

California 91 105,

London WIY 7FE. England Gentlemen. We have made an investigation and appraisal of the plant, property and equipment of The Marquardt I ompany "Marquardt". These assets were appraised by us in connection with the planned purchase by ISC Electronics line, your wholly owned United States subsidiary, of the entire issued there capital of Marquardt. The appraisal was made for the purpose of expressing an opinion of the fair market value of these assets as of

April 30, 1983 to serve as a guide in financial reporting on the assets under the UK Statement of Standard The term "fair market value" as used in this letter is defined as the estimated amount at which the

property would exchange between a willing buyer and a willing seller, norther being under computation to buyer to soll, each having reasonable knowledge of all relevant facts, with equity to both, and with both buyer and seller contemplating retention of the facilities for continued use as an operating dusiness enterprise The property appraised consists of land, buildings and improvements and plant and equipment including effective furniture and equipment and vehicles associated with a going concern Supplies, materials on hand, and all other assets of a current nature and intangible assets, if any are not included in this report. The assets

rescribed above are those reported to us as the property of Marquardt.

Marquardt's facility is located in Van Nuys. California in the Los Angeles Basin. The manufacturing clant is located on 56.3 scree of land and comprises approximately 480,000 square feet of buildings. In arriving at our opinion of value, we inspected the plant, property and equipment, investigated local in tree conditions, interviewed members of Marquardt's management and work force, and took into account other relevant matters, including financial information provided by Marquardt and other pertinent industry cata, in forming our conclusions We have not carried out a structural survey of the assets appraised and no

Allowance is made for expenditure which such a survey may reveal is required
It is our opinion, based on the investigation and analysis outlined above, that the fair market value of the
property appraised, as of April 30, 1983, is FIFTY MILLION DOLLARS (\$50,000,000). This amount is
sustributed as follows:—

The Marquardt Company

Summary of Fair Market Values Asset Classification Fair Market Value

APPENDIX 5

STATUTORY AND GENERAL INFORMATION

 SHARE CAPITAL (a) Share capital of ISC

The following table shows the authorised and issued share capital after the Offer for Sale:-

lesued or to be issued as fully paid

16.000,000

in ordinary shares of \$0 10 each in "A" ordinary shares of \$0 10 each 10.133,778

s

111 ISC was incorporated on 7th September. 1982, with an authorised share capital of 100,000,000 onlinary shares of \$1 00 each of which 2 shares were ussued for cash at par. On 9th September, 1982, each ordinary share of \$1 00 was sub-divided into 10 ordinary shares of \$0 10 each and 925,000,000 of such shares, which were then unissued, were cancelled resulting in an authorised share capital of \$7,500,000. On 21s September, 1982, 14,100,000 ordinary shares were issued, credited as fully paid, as consideration for the acquisition of a majority interest in ISC Electronics Inc. "Electronics" from Mr. J. H. Guerin. Pursuant to an offer for sale of tinter also: 17,039,846 ordinary shares of ISC made in October 1982 at a price of 155p per share. all such shares were allotted at that price. After completion of that offer for sale, 26.257,026 ordinary shares were issued, credited as fully paid, as consideration for the acquisition of the balance of the issued share capital of Electronics and 12,450,000 ordinary shares were issued, credited as fully paid, as consideration for the acquisition of the whole of the issued share capital of ISC London PLC "ISCL" not then owned by ISC or its

(ii) On 31st March, 1983, the date to which the latest audited accounts of ISC were made up. ISC had an authorised share capital of \$7,500,000 divided into 75 million ordinary shares of \$0.10 each, of which 55,716,892 were issued fully paid or credited as fully paid

(iii) On 5th August, 1983, the authorised share capital was increased to \$16,000,000, divided into
 1:55,400,000 ordinary shares and 34,600,000 "A" ordinary shares of which, following a 1-for-1 scrip issue,
 [01] \$37,784 ordinary shares and 10,256,000 "A" ordinary shares were issued fully paid or credited as fully

(10) ISC will issue 24,344,000 new "A" ordinary shares fully paid pursuant to this Offer for Sale. repletion of the acquisition of Marquardt. ISC will issue 600,000 ordinary shares credited as fully paid to Ct I, being part of the consideration for the acquiention of Marquardt (b) Share Capital of Marquardt

Marquardt was incorporated in the state of Delaware, USA, on 26th April, 1974. The share capital of Marquardt is as follows:-

Authorised

100,000 in shares of common stock of \$100 par value 1.000 (c) "A" ordinary shares After 17th February, 1984 the "A" ordinary shares of \$0 10 each of ISC will rank part passu with the

ordinary shares in the capital of ISC and will thereupon be redesignated as ordinary chares. Share certificates for "A" ordinary shares will remain valid after 17th February, 1984 but will be exchanged, without charge, for certificates referring to ordinary shares upon application to ISC's Registrars by bolders of those shares. All rufficates issued after 17th February, 1984 in respect of transfers of former "A" ordinary shares will refer to

Save as mentioned above, no Director of ISC has a service contract with ISC or any subsidiary thereof, or Marquardt or its subsidiary

(e) The aggregate emoluments of the Directors in the period ended 31st March, 1983 were \$209,000 and the amoluments payable to the Directors for the period ending 31st March, 1984 under the arrangements in force at the date hereof are estimated to amount to \$655,000.

4. MAJOR SHAREHOLDINGS

Save for Mr. Guerin's beneficial and non-beneficial interests referred to above which will together represent 16.6 per cent. of the issued share capital of ISC following this Offer for Sale, the Directors are not aware of any person holding or beneficially interested in 5 per cent. or more of the issued share capital of ISC.

Full individual accounts of the US incorporated subsidiaries of ISC and of Marquardt and its subsidiary are not required to be delivered to the Registrar of Companies as such companies are not registered under the Companies Acta 1948 to 1981 or earlier applicable legislation.

Full individual accounts relating to the financial period ended 31st March, 1983 in respect of ISC and ISCL have been prepared but have not been delivered in the Registrar of Companies. Subject to this, full individual accounts, relating to each financial period to which the financial information concerning ISCL relates, have been so delivered. The auditors of each such company have made a report under Section 14 of the Companies Act 1967 in respect of each such set of accounts, whether delivered or not delivered, and each such report was an unqualified report within the meaning of Section 43 of the Companies Act 1980.

In the case of the properties in the USA the tenant is required to pay, in addition to the current rent stated, all the outgoings of the landlord, attributable to the relevant property sincluding, in certain cases, interest and taxes!

Zeep has options to renew this lease on 30th June, 1835 and 30th June, 1830, in each case for a forther period of five years at a rent equal to the rent currently payable as adjusted by the McGraw-Hill Engineering News—Record Suilding Cost Index.

There premises are expected to be occupied in December, 1883.

There premises are expected to be occupied in September, 1983.

7. SUMMARY OF CERTAIN PROVISIONS OF THE ARTICLES OF ASSOCIATION OF ISC The Articles of Association ("the Articles") of ISC contain provisions, inter clin, to the following effect:-

A shareholder may be required to notify ISC of any interests in ISC's issued share capital pursuant to Section 74 of the Companies Act 1981 and ISC may suspend a shareholder's voting rights should be fail to give ISC the necessary notification within 42 days of being required so to do by ISC or should the Directors not be satisfied that the information given is true and accurate in all respects and ISC has served notice to that effect on the registered holder of the shares.

Quorum

A quorum at general meetings shall be not less than three members present in person or by proxy.

Subject to the restriction mentioned above and any special rights or restrictions as to voting attached to any shares or in accordance with the Articles, on a show of hands every member present in person and entitled

to vote shall have one vote only and on a poll every momber present in person or by proxy and entitled to vote shall have one vote for every share held by him. No such special rights or restrictions apply at the date hereof. Untraced Shareholders

151 may sell the sh

member or other person has not cashed warrants or cheques sent by ISC over a period of 12 years and ISC has not, after giving notice in the Press, received indication of the whereabouts or existence of the member or other person. ISC shall be obliged to account for the proceeds of sale to the person entitled thereto.

(a) There is no shareholding qualification for Directors of ISC.

the Directors are subject to retirement on reaching the age of seventy years but are eligible for re-election year by year thereafter

ic) The aggregate fees of the Directors shall not exceed \$75,000 per annum or such higher amount as ISC by ordinary resolution may from time to time determine. Such remuneration shall be divided among the Directors as they shall agree or, in default of agreement, equally. Any Director who renders any special or extra services to ISC may be paid such extra remuneration by way of salary, participation in profits or otherwise as the Directors may determine.

(d) The Directors may from time to time appoint any one or more of them to be the holder of an e office on such terms and for such period as they may determine. Any Director so appointed to the office of managing director shall not be subject to retirement by rotation and shall receive such remune Directors may determine

161 At every Annual General Meeting, one third of the Directors who are subject to retirement by rotation shall retire from office. A retiring Director shall be eligible for re-election.

(f) Any Director may hold office as a Director or other officer of, or be otherwise interested in, any other company of which ISC is a member or in which ISC is otherwise interested and no such Director shall unless otherwise agreed be liable to account for any remuneration or other benefits receivable by him as a Director or fficer of, or by virtue of his interest in, any such other company.

(g) The Directors may confer upon any Director appointed to an executive office any of the powers reisable by them as Directors, upon such terms and conditions and with such restrictions as they think fit. and may revoke or vary any such powers.

thi The Directors may establish and maintain any pension, superannuation, benevolent or life assurance fund, scheme or arrangement twhether contributory or otherwise! for the benefit of any present or former employee or Director of ISC, its holding company or subsidiary or predecessors in business provided that, in the case of a Director, he holds or has held an executive position or agreement for service with ISC or such other company as aforesaid, and for the wives, widows, families and dependents of any such persons.

(1) Save as provided in the Articles of Association, a Director shall not vote on any resolution of the Board m respect of any contract or arrangement or other proposal in which he is interested (otherwise than by virtue of his interest in shares or debentures or other securities of or otherwise through ISC) nor shall he be counted in the quarum at a meeting in relation to any resolution on which he is debarred from voting. However, a Director shall be entitled to vote and be counted in the quorum in respect of any resolution concerning the following

ti) the groung of any security or indemnity to him in respect of money lent or obligations incurred by him at the request of or for the benefit of ISC or any of its subsidiaries;

tii) the groung of any security or indemnity to a third party in respect of a debt or obligation of ISC or any of its subsidiaries for which he himself has assumed responsibility in whole or in part under a guarantee or indemnity or by the giving of security,

(iii) any proposal concerning an offer of shares or debentures or other securities of or by ISC or any of its subsidiaries for subscription or purchase in which offer he is or is to be interested as a participant in the underwriting or sub-underwriting thereof; (iv) any proposal concerning any other company in which he is interested directly or indirectly and whether as an officer or shareholder or otherwise however, provided that he together with any person connected with him is not the holder of or beneficially interested in 1 per cent, or more of any

class of the equity share capital of such company for of any third company through which his interes is derived) or of the voting rights available to members of the relevant company;

(w) any proposal concerning the adoption, modification or operation of a superamusation fund or retirement benefits scheme under which he may benefit and which has been approved by or is subject to and conditional upon approval by the Board of Inland Revenue for taxation p

(vi) any contract arrangement or proposal for the benefit of employees of the Group under which the Director benefits in a similar manner as the employees and does not accord to say Director-as such any Director benefits in a similar manner as the employees and does not accord to my Director as such any privilege or advantage not generally accorded to the employees to which the scheme or fund relates. ISC may by ordinary resolution suspend or relax any of these provisions to any extent or ratify any transaction not duly authorised by reason of a contravention of these provisions.

The Directors shall not register any person as a holder of a share unless they have been furnished with a declaration signed by or on behalf of the prospective holder stating whether or not such registration would result in such share being held by a North American Person.

The Directors shall restrict the borrowings of ISC so as to secure that, save with the previous sanction of an ordinary resolution, no money shall be burrowed if the aggregate principal amount outstanding of all moneys borrowed by the Group texcluding inter-Group borrowings) then exceeds or would as a result of such borrowing corrowed by the through concluding inter-through potrowings) these exceeds are used as a result of such controling exceed an amount equal to twice the aggregate of the amount haid up on the share capital of ISC and the amount standing to the credit of the consolidated capital and revenue reserves of ISC as shown by the latest audited consolidated balance shart of ISC but excluding any sum or sums of money intended to be applied and actually applied within six months of the date of borrowing in the repayment (with or without premium) of any moneys then already borrowed or secured and then outstanding all of which shall be subject to such adjustment as may be necessary in respect of any variation in the paid up there capital or consolidated capital reserves of ISC since the date of its latest audited balance sheet or such adjustment as the suditors consider necessary. Amounts borrowed in respect of contracts to the extent of credit insurance thereon shall be deemed not to be

Liquidation

The capital of ISC consists of ordinary shares and "A" ordinary shares. In the event of liquidation, all lers will rank pari passu in respect of the proceeds of liquidation, if any, after all liabilities of ISC.

& AGENERAL MEETINGS OF ISC The Annual General Meeting in each year must be beld within seven months inflowing the close of each accounting reference period of ISC. 18. TRADING IN ISC SHARES ON THE LUXEMBOURG STOCK EXCHANGE

10. TRADING IN ISC SHARES ON THE LUXEMBOURG STOCK EXCHANGE

Trading in ISC shares on the Luxembourg Stock Exchange will be in accordance with its rules and ...

regulations and subject to the payment of normal brokerage fees. A sales of ISC shares, when instructing the broker, will have to execute a share transfer form. Brokers are required to check the identity and legal capacity for both purchasers and sellers. Every Wednesday, ISC's transfer agent in Luxembourg will register transfers of ISC shares made on the Luxembourg Stock Exchange during the preceding week and will send, without y delay, a new share cartificate to the purchaser's broker and a confirmation card to the selling broker, if appropriate, with a cartificate for any ISC shares which have not been included in the cale, thereby informing the propriate, with a cartificate for any ISC shares which have not been included in the cale, thereby informing appropriate, with a commission of the transfer. The brokers will settle the bargain within 3 days of the receipt of the extificate and confirmation of completion.

Mesons, Pest, Marwick, Mitchell & Co. have given and have not withdrawn their written consent to the issue of this document with the inclusion herein of their Reports and the references to them in the form and context in which they respectively appear. The American Appraisal Company has given and has not withdrawn its written consent to the issue of this document with the inclusion herein of its Report and the ces to it in the form and context in which they respectively appear.

12. SUMMARY OF THE AGREEMENT FOR THE ACQUISITION OF MARQUARDIS AND ARRANGEMENTS WITH ME, WOODGRIFT

Agreement for the acquisition of Marquardt (a) Dated as of 12th July, 1983.

(i) CCI Corporation (*CCF)
(ii) ISC Electronics Inc. (*Electronics*)

(c) Purchase consideration and escrew agree The consideration for the acquisition of the entire issued share capital of Marquardt is the cash sum of \$42.5 million ("Cash Purchase Price") and the allotment to CCI of 600,000 ordinary shares of \$0.10 each of ISC credited as fully paid ("Stock Purchase Price"). The Cash Purchase Price is payable as to \$39.5 million to CXI at completion, the balance of \$4 million being payable at completion to an Escrew Agent to be paid by such Agent Isobject to certain conditions) to CGI without interest on the first aumiversary of completion. Interest is payable to CCI at Manufacturers Hanover Trust Company's prime rate on \$38.5 million from 28th July, 1983—until completion.

The Stock Purchase Price is subject to the restriction that CCI is required to apply the same in acquiring

from Mr. K. E. Woodgrift his holding of 1,900 shares of common stock of CCL

(d) Inter company indebtedne The Agreement states that the indebtedness of CCI to Marquardt at 30th April, 1983 has been forgiven by Marquardt. To the extent that the indebtedness of CCI to Marquardt in respect of transactions occurring after 30th April, 1983 has not been repaid by CCI to Marquardt prior to completion, the amount thereof outstanding at completion will be credited against the Cash Purchase Price.

· (e) Warranties and indemnities The Agreement contains warranties and indemnities on the part of CCT as to the organization and standing of Marquardt, its share capital and ownership, the accuracy of the financial statements of Marquardt for the five years ended on 30th April. 1983 and as to the assets and liabilities and the financial trading and by reation position of Marquardt. CCTs irability under the warranties and indemnities is not limited in time or to maximum amount but, save in respect of known and intentional misrepresentations on the part of CCT is abject to the following limitations:—

(i) CCI shall not be liable in respect of any single claim not exceeding \$25,000 or for claims exce

\$25,000 to the extent that the aggregate of such claims does not exceed \$100.000;

(ii) to the extent that claims exceeding \$25,000 individually exceed, in the aggregate, \$100,000 but do not exceed \$1,000,000, CCPs liability is limited to 50 per cent, of the aggregate amount of the

excess over \$100,000. In Non-competition covenants

CCI has given the following coverants:-

(i) neither CCI nor any of its principal afficers will compete directly or indirectly with either selectronics or Marquardt in any part of the world for a period of five years from completion in any aspect of the business carried on by Marquardt during the last nine years.

(iii) neither CCI nor any of its principal efficers will prejudice any of the accounts, patronage, customers and goodwill of Marquardt for a period of five years after completion; (iii) neither CCI nor any of its principal officers will at any time divulge secret or confidential information concerning any method or operations of Marquardt.

(g) Conditions

The Agreement is conditional, unter also, upon the following:—

(i) the approval of the shareholders of ISC in General Meeting:

(ii) the raising by ISC of sufficient finance to enable Electronics to complete the Agreement on terms and conditions satisfactory to it and the admission to listing by the Council of The Stack
Exchange, London of the "A" ordinary shares and the one ordinary shares comprising the Stack
Purchase Price:

(iii) the execution of the Proxy Agreement referred to in sub-paragraph (i) of paragraph 16 b) below

(h) Completion Subject to the Agreement becoming unconditional, completion of the acquisition will take place on

15th August, 1983 (i) Guarantee

The performance of the obligations of Electronics under the Agreement has been guaranteed by ISC Arrangements with Mr. Woodgrift

The Agreement between CCI and Electronics relating to the acquisition of the entire is The Agreement between CC1 and Electronics retaining to the acquisition of the active assumed state capital of Marquardt treferred to above includes a provision that the 600,000 ordinary shares of 30-10 each of SC to be assued to CC1 as part of the purchase consideration for blarquardt be transferred by CC1 to Mr K. E. Woodgrift in exchange for Mr. Woodgrift's holding of 1.900 shares of common stock of CC1. The 600,000 ordinary shares of the Company, which will rank pari passu with the ordinary shares of ISC, will represent 0-4 per cont. of the shares in issue after the Offer for Sale. Mr. Woodgrift has also undertaken to CC1 and Robert Company. fleming that he will not, without the consent of Robert Fleming, sell or otherwise dispose of any shares of ISC before 17th August, 1984

The service contract entered into between Marquardt and Mr. Woodgrift is for a period commencing on the date of completion of the acquisition of Marquardt until 31st July, 1988. Under this contract, Mr. Woodgrift's salary, which will be subject to annual review, is at the rate of 3120,000 p.a. and a further sum of \$500,000 is namely before 31st December 1983. payable before 31st December, 1983

18. OFFER FOR SALE AGREEMENT

An Agreement has been entered into dated 13th July, 1983 between ISC (1), J. H. Guerin and the other persons named therein as vandors ("the vendors") (2), J. H. Guerin and the other persons named therein as Directors ("the Directors") (3), K. E. Woodgrift (4) and Robert Fleming (5) which provides, inter alia, for Robert Flowing to subscribe 24.344,000 "A" ordinary shares to be issued by ISC ("the new shares") and to purchase ary shares to be sold by the vendors ("the sale shares"). Robert Fleming will subscribe the new shares at the striking price and will receive a commission (exclusive of VAT) of 2 per cent. of the minimum tender price of the new shares in respect of the first 30 days of its commitment thereunder plus vs per cent. for sk or part thereof beyond the initial period of 30 days until the sub-underwriters are notified of theu liability or, if later, the date upon which dealings commence in the new shares on The Stock Exchange. Robert Pleming will purchase the sale shares at the striking price less a deduction calculated on the same basis as the commission to be charged in respect of the new shares. Robert Fleming will pay sub-underwriting commissions to persons who have agreed to sub-underwrite the Offer for Sale and a fee to i., Messel & Co., stockbrokers to to persons who have agreed to sub-underwrite the Offier for Sale and a fee to 1. Messel & Co., stockbrokers to the Offier for Sale (together, in each case, with VAT thereon). ISC will pay other costs and expenses of and incidental to the Offier for Sale and the application for the admission of the new shares to the Official List and to the Luxembourg Stock Exchange including a fee to Robert Fleming, Robert Fleming's legal fees and other expenses, the costs and expenses of the Reporting Accountants and the costs of printing, advertising and circulating the Offier for Sale. The vendors will make a contribution of Ve per cent, of the minimum tender prote of the sale shares being sold by each vendor to these costs and expenses (in addition to the deduction referred to above). In the case of Mr. S. M. Pindell Jur, his contribution will be at the rate of Verper cent. The vendors, the tors who are not selling shares and Mr. K. E. Woodgrift have undertaken not to dispose of ordinary shares

before 17th August, 1984 without the consent of Robert Fleming.

The Agreement will be terminated if, before the opening of the subscription lists, it becomes apparent that the agreement to sequire Marquardt will not be completed. If thereafter it becomes apparent that that agreement will not be completed, ISC and Robert Fleming will procure that all application moneys are

agreement will not be completed, ISC and Robert Pleming will returned and no shares will be sold pursuant to this Offer for Sale.

The vendors of "A" ordinary shares, and the number of shares being sold by them respectively, are as being sold J. H. Guerin 8.000,000 C. H. Dreyer S. M. Pindell Jnr 520,000 R. Holmberg 720,000 409,000 E. Guerin 400,000

14. WORKING CAPITAL

The Directors of ISC are of the opinion that, after the Offer for Sale, having regard to the net proceeds of the Offer for Sale and taking into account available bank and other facilities, the Enlarged Group will have ent working capital for its present requirements.

In an action brought by General Dynamics Corporation against CCI in the Superior Court of the State of California relating to an alleged breach of contract by Marquardt (when it was division and not a subsidiary of CCI), judgment was given against CCI for approximately \$158,600 plus interest of approximately \$39,000. An appeal against judgment has been lodged. Although this action is against CCI, any ultimate liability will Marquardt's account.

On 5th January, 1981, Astrolite Alloys Corporation filed an action against Marquardt in the Sup On oth January, 1981, Astronue Anoys Corporation nies an action against marquaire in the supplied of the State of California. The suit, as amended, claims damages in a sum, details of which are to be furnished at a latter date, for breach of contract on the supply of certain materials. The suit also claims \$250,000 in general damages and \$1,000,000 in punitive damages for breach of implied covenant of good faith and fair dealing. Marquards believes that the suit, which has been dermant for about one year; is unlikely to

result in liability in excess of 35,100.

Seve as mentioned above, neither ISC or any of its subsidiaries nor Marquardt or its subsidiary is engaged in any litigation or arbitration of material importance as known to the Directors of ISC to be pending or threatened against ISC or any of its subsidiaries or Marquardt

16. CONTRACTS

(a) Material Contracts

The following contracts, not being contracts in the ordinary course of business, have been entered into by half of ISC or its subsidiaries or Marquardt in the period of two years immediately preceding the date of this Offer for Saic and are or may be material-

An Agreement dated 18th June, 1982 made between J. H. Guerin (1), W. J. Zylka (2) and Corp (3) whereby Mr. Guerin acquired from Mr. Zylka the latter's holding of 800,000 shares of common stoc Corp together with his stock option and anti-dilution rights in respect of shares of cor

An Agreement dated 13th August, 1982 made between Corp (1) and J. H. Guerin (2) whereby Mr. Guerin agreed to the cancellation of the stock option and the release of the anti-dilution rights acquired from Mr. Zylka in consideration for the issue to him credited as fully paid of 400,000 charge of common stock of Corp.

(iii) An offer document dated 10th September, 1982 by Electronics and ISC to the holders of the stock and ISC to the holders of the stock and ISC to the holders of the stock of

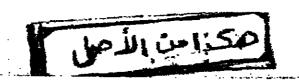

warrants of Corp under which, inter aim, Electronics offered to acquire all the outstanding stock of Corp in exchange for the allotment of shares in Electronics and ISC offered to acquire all the resulting stock of Electronics (other than the stock the subject of material contract (ix)) in exchange for the ent of shares in ISC. (iv) A letter agreement dated 10th September, 1982 concluded on 21st September, 1982, whereby Corp offered to cancel stock options in respect of a total of 144,000 shares of common stock of Corp for payments totalling in aggregate \$372,225 being \$4.65 per share less the respective exercise prices of

ch options. (v). An Agreement dated 10th September, 1982 made between Corp (1); Electronics (2), ISC (3) and Parker Chapin Fletten & Klimpi (POFK) (4) whereby PCFK was appointed to act as dustodien in counsellon with the exchange offer made pursuant to the offer document dated 10th September, 1982. ion with the exchange offer made pursuant to the offer docume being material contract (iii) above.

(vi) An Agreement dated 21st September, 1982 made between J. H. Guerin (1) and ISC (2) relating to the C sequilation by ISC from Mr. Guerin of a controlling interest in Electronics in exchange for the

Stock Beech at 83p a share and after touching 89p ended the week at 88p.

Mr Max Lewinsohn, chairman of Southwest Resources. continues to keep things on the boil for his shareholders. On Friday the group announced it had secured a six-year prospecting licence, with an option for a

138p

nearly 1,000 acres in Cornwall from the Duchy of Cornwall. The area is next to the group's Redmoor Mine licence covering 5,700 acres being developed as a un and tungsten prospect. At present all the group's profits arrive from its oil and gas interests on both sides of the Atlantic.

Recently Southwest Resources announced a share scrip and a consolidation of four 10p shares into one 40p share to help their marketability in New York, where they are quoted on the over-the-counter market. Mr Lewinsohn is now rumoured to be looking at the Far East where the group already has substantial interests. The shares ended the week 6p higher at 74 in their new form.

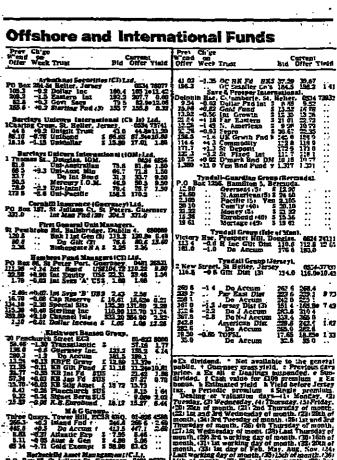

Brokers Panmure Gordon have recently published a circular on the company rec-ommending the shares as a buy. They estimate that the share price does not accurately represent the large tin and ore reserves in Cornwall or the oil and gas potential in the United States, Thailand and the North

Although the shares must be regarded as speculative, Panmure Gordon regards the risks as limited and the potential rewards "highly significant". For the current year they are looking for pretax profits of £1.5m against £1m last time.

Michael Clark

connection with the issue or sale of any part of their respective capitals. (c) No sense of shares of ISC will be made which would effectively after the central of ISC without its prior approval in general meeting. (d) In the two years preceding the date of this Offer for Sale, there have been no transactions bet

CCT and Marquardt, other than intra-company loans made by Marquardt to CCI and transactions in the normal course of business, in which CCI had any inforest, direct or indirect. (e) The address of the principal place of business of CCI is 1904 North Sheridan Road, Tules, Oklahoma

18. MINIMUM SUBSCRIPTION, EXPENSES AND NET PROCEEDS OF THE ISSUE The minimum amount which, in the opinion of the Directors, will be required to be raised by the issue of the "A" ordinary shares now being offered for sale is \$30,480,000 which; in relation to the matters specified in paragraph A(z) of Part I of the Fourth Schedule to the Companies Act 1948, is made up as follows:purchase price of property - £28,872,000; preliminary expenses and commissions . 2550,000 (exclusive of VAT, where applicable).

purposes and communication of matters in (i) or till above - nil; and ting control of manager borrowed in respect of matters in (i) or till above - nil; and ting commissing commissing commission of the Offer for Sale other than underwriting commissions. sions). 1908,000.

The expenses of the Offer for Sale of approximately 11 A million (exclusive of VAT) are payable by ISC, save for a contribution towards such expenses by the vendor charabelderias mentioned in paragraph 13 above. Save for a contribution towards such expenses by the vendor charabelderias mentioned in paragraph 13 above. Taking into account this centribution, the net proceeds of the issue of the 24,344,000 new "A" ordinary shares of ISC are expected to amount to approximately 228.7 million at the minimum tender price and will increase by 6182 are expected to amount to approximately 228.7 million at the minimum tender price and will increase by 6182,440 for every 1p by which the striking price per share exceeds the minimum tender price of the purchase price of Marquirott and the expenses of the Offer for Sale referred to above and the aggregate of the purchase price of Marquirott and the expenses of the Offer for Sale which will be funded, from the cash resources of the Existing Group, but, if the striking price exceeds the minimum tender order, there will be no such abortfall. um impder price, there will be no such shortfall.

and the control of th

IR. TAXATION

(a) Shareholders and potential shareholders should consult their own professional advisers in respect of taxation consequences of acquiring, holding and disposing of ISC stares.

(b) The state of California charges taxation on businesses on a unitary basis, that is to say, tax is charged

partly by reference to the worldwide income of the group of which the business is a member. The acquisition of Marquardt could, therefore, result in an increased tax charge on Marquardt in respect of the income of other members of the Enlarged Group, but, on the basis of the pre-tax profits of the Existing Group for the period ended 31st March, 1983 and of Marquardt for the year ended 30th April, 1983, the Directors of ISC do not believe that the increase in tax charge would be material. 20. REGISTRATION OF DOCUMENTS

The documents attached to the copies of the Offer for Sale delivered to the Registrar of Companies for registration were the signed written consents referred to in paragraph 11 above, copies of the material contracts referred to in paragraph 16(a) above, copies of the Application Form and Preferential Application Form together with the letter to ISC shareholders enclosing the Preferential Application Form and the 21. STATUTORY DETAILS CONCERNING ROBERT FLEMING

PROCEDURE FOR APPLICATION

The Boyal Bank of Scotland plc, New Issues Department, 24 Lombard Street, London BC3V 9BA will receive applications, which must be for a minimum of 400 shares and in multiples of 200 shares up to 1,000 shares, thereafter in multiples of 500 shares up to 10,000 shares, thereafter in multiples of 5,000 shares. Applications must be made in sterling at the minimum tender price of 1,25 pence per share or at any higher price per share which is a whole multiple of 1 pence.

Applications must be made on the Application Forms provided (photocopies will Applications must be made on the Application ratins provided (photocopies with not be accepted) and must each be accompanied by a separate sterling cheque or banker's draft for the full amount of the price tendered, which must be drawn on a branch in England, Scotland, Wales, Northern Ireland, the Channel Islands or the Isle of Man of a bank which is either a member of the London or Scotlish Clearing Houses or which has arranged for its cheques and banker's drafts to be cleared through the facilities provided by the members of those clearing houses and must bear the approvided and the second of th

prists sorting code number in the top right hand corner.

Cheques banker's drafts must be made payable to "The Royal Bank of Scotland plc" and . Cheques/banker's drafts must be made payable to: The Royal Bank of Scotland plc" and crossed "Not Negotiable". The right is reserved to present all cheques/banker's drafts for payment on receipt and to reject or scale down any application, in particular multiple or suspected multiple applications at any one price. Application moneys will be held in a separate account pending allocation or return of application moneys or any excess thereof. It is intended to clear the cheques of successful applicants and the right is reserved to retain Letters of Accounters and surplus employed property predding such clearance. The completion and delivered to retain a retain and delivered to retain a re Acceptance and surplus application moneys pending such clearance. Due completion and delivery of an Application Form accompanied by a cheque will constitute a warranty that the cheque will be honoured on first presentation; attention is drawn to the declaration in the Application. Form to that effect: Applications will be irrevocable until Thursday, 16th August, 1983 and may only be revoked after that date to the extent not accepted prior to that date.

Subject as aforesaid and as mentioned below, applications will be accepted on the following

All shares for which applications are wholly or partly accepted will be sold at the same price ("the Striking Price"), which will not be less than the minimum tender price of 125 pence per share. The Striking Price will not necessarily be the highest price at which sufficient applications (including applications at higher prices) are received to cover the total number of shares offered under the Offer for Sale. Robert Fleming will have discretion in deciding the Striking Price and the basis of allocation but will have regard to the need to maintain a

satisfactory market in the shares. Applications for shares at prices less than the Striking Price will receive no allocation of Striking Price will be the minimum tender price of 125 pence per share: The Striking Price and the besis of allocation will be announced on or as soon as possible

after Friday, 12th August, 1983.
It is proposed that 10 million of the shares to be comprised in the Offer for Sele will be reserved for applications on pink Preferential Application Forms from shareholders on the Register of the Company at the close of business on 29th July, 1983. Shares for which such applications on Preferential Application Forms are wholly or partly accepted will be sold at the Striking Price. If there are such applications in excess of 10 million shares, the excess will be

allocated as if the application had been made on an ordinary Application Form: Owing to United States securities laws such forms cannot be sent to North American Persons as defined above. The shares being offered for sale have not been registered under the United States Securities Act of 1933; attention is drawn to the declaration in the Application Form in et of North American Persons. No application will be accepted from any person

who is unable to make this declaration or who gives an address in North America. Acceptance of applications is conditional on the Council of The Stock Exchange, London admitting to the Official List the share capital of ISC now being issued and also on the Luxembourg Stock Exchange granting listing of such share capital, in each case by no later than Wednesday, 17th August, 1983. If these conditions are not inhilled by that date or if the Agreement for the acquisition of Marquardt is not completed; then the Offer for Sale will be reministed. In either case, monage raid in instant of amiliantical will be reministed. In either case, monage raid in instant of amiliantical will be

Agreement for the acquisition of Marquardt is not completed, then the Offer for Sale will be terminated. In either case, moneys paid in respect of applications will be returned. If any application is not accepted or is accepted for fewer shares than the humber applied for or is made at a price higher than the Striking Price, the application moneys or the balance of such moneys, as the case may be, will be returned, without interest. It is expected that Letters of Abteptance will be posted by increasing applicants on Wednesday. 17th August, 1983:

All chapters and documents will be sent by post at the rith of persons entitled thereto.

Arrangements have been made for the registration by ISC of the shares now offered for sale in the names of applicants or persons in whose favour Letters of Acceptance have been renounced free of stamp duty, provided that, in cases of renunciation. Letters of Acceptance (duly completed in accordance with the instructions contained therein) are lodged for registration not later than Priday, 23rd September, 1983. Befinitive share certificates will be nosted on Friday 14th Friday, 23rd September, 1983. Definitive share certificates will be posted on Friday, 14th the garden of the second of the

Sutton's sights on first big win

Brown battles back

Los Angeles (Reuter). - Hai Almost all the contenders lost, intron, of United States, who ground as the greens became more baked and brown as the day wore list this year, could move into a on. Only Larry Nelson, with a 68, virtually unassailable position if he and the former Masters champion, wins the \$100.000 United States Fuzzy Zoeller (67) made any PGA championship first prize at the progress. Fought's 71 earned him third place on 207, one ahead of Lietzke, Pat McGowan and the U.S. third round but steadied himself for open champion. Nelson. Jack a 72, which gave him a 10-under-par Nicklaus never got his game going total of 203, a two-stroke lead over and matched par with a 71

sipaway.

"My round was like the weather,
a little rugged", the 25-year-old
Sutton remarked, referring to the
blazing sunshine that scorched the
course after an early-morning
thundershower that caused an 80minute delay. Describing how he
managed to recover from his bad
spells, he said: "I got angry with
myself and said "Come on, let's get
going" ". Sutton, like many other
golfers, expressed surprise that the
greens were so hard in spite of the
morning rain. "The 10th green was
like walking on bricks", he said.

Bruce Lietzke observed that "four
of five greens, especially over the
back nine, were as close to death as
I've seen. Several of them weren':
greens but "browns'. They looked
stick, but we were leaving them
short."

last green to win the £80,000 Dutch-Open, sponsored by KLM, on the

Kennemer course here yesterday. It completed a fine recovery from being three shots behind his playing partner. Vaughan Somers, of

partner, Vaughan Somers, of Australia, with eight holes to play, and gave him a 69 for a total of 274,

spanned, use Cantzares, who equalled the course record with 65, shared second place. Glenn Rainh, from Bognor Regis, who before yesterday had won only £347 this season, took 74 to tie for fourth

place with an Australian, Wayne Grady (72).

two reasons. This was his first

since ae took the Carrolls Irish Open title five years ago. And the £13,330 first prize increases his earnings this season to almost £40,000, which will surely be enough to secure him a place in the European Ryder Cup team against the United States in Florida this Decoher

appeared in the match he was fined 1,000 and banned from inter-

ctory on the European circuit since he took the Carrolls Irish

occasion he stayed in command of his own destiny in spite of missing from one foot at the second hote and then taking a six at the 429 yards ninth.

When Brown dropped another shot at the tenth, Somers, with his confidence high following a run of

three successive birdies from the fifth, was three strokes ciear. Brown however pitched to 3ft for a birdie at the long 12th and then

holed from 20ft for a birdie at the 14th. At the 16th (515 yards) he found the green with two quite beautiful shots, driving the ball long

and straight and following with a two-iron which set up his third

birdie in five holes and enabled him to draw level with Somers. Then his nerve held firm on the last green after Somers had narrowly missed.

Canizares, twice beaten in playoff this season; had six birdies in his last eight holes. He can take consolation in knowing he is virtually certain of a place in the Ryder Cyntegram.

Arnoux eases clear

after Piquet falters

From John Blunsden, Hockenheim

CRICKET: RANDALL, MARKS AND DILLEY OUT: GATTING, FOSTER AND SMITH IN

England choose Smith for Test 12 after Smith chooses England

South Africans.

first cricketer from Natal to play

for England. The two Greigs,

awkwardly. Had he been in

form he might have coped with

them, but he has not been in the

runs. In 10 of his last 18 Test

in the best of all ways - that is, by scoring more runs than anyone else - Christopher Smith, of Hampshire, has forced his way into the England 12 for the third Test match against New Zealand, starting at Lord's on Thursday. Neil Foster and Mike Gatting, who were not in England's losing side at Headingley, are also included. Marks, Dilley and Randall are

it looks as if a batsman will have to be left out, presumably either Smith or Fowler. A less likely option would be to stand Gatting down and bat Tavare at number three. The position of first wicket down, though, is best filled by someone who more easily moves up a gear than Tavaré.

Athough, like Allan Lamb, a first-generation South African, Smith qualified for England by virtue of his English parentage and the fact that he has been resident here, albeit intermit-tently, for the last four years. When they first made the game their livelihood, Lamb and Smith made it quite clear that they wanted to play Test cricket.

Realizing that there was only the slenderest of chances of their being able to do that for South Africa, they decided to throw in their lot with England. Had van der Bijl, Kirsten, McEwan and Rice done the same they, too, might now be in same they, too, might now be in C J Tavare (Kent) the England side. Is there, I R W Taylor (Derby)

not be the simple basic requirement for wearing an England

With the regulations as they are, Smith well deserves his chance. For Natal last winter he singing the praises of the averaged under 25. For Hampshire this summer he is averaging 62.37. He is looking solid, determined and acquisi-tive. He will do no flashing about. If, as I imagine he will be, Fowler is the one to be left out, he can consider himself unlucky, having averaged 36 in his six Test matches and made his first 100 for England barely three weeks ago. What he knows, though, is that he must sort himself out outside the off

Smith has a younger brother, Robin, who also wants to play for England. Christopher is 24 and Robin 19. It is two years since I first heard Robin being

BOURNEMOUTH: New Zealand need 60 runs to beat Hampshire.

Hampshire disappointed a good crowd at sunny Dean Park yesterday with irresolute batting in their second innings against the New Zealand touring team. By the end the New Zealanders were on the brink of their third win in six threelay matches against the counties. lampshire's shortcomings on a lightly worn pitch were unexpected emembering their recent good form n the championship and NatWest rophy and on a day when Chris Smith's inclusion in the England twelve became known.

Smith himself was the centre of attention throughout from the crowd and media. But when Hampshire batted he looked atterly out of touch during a stay of 75 minutes before he was fourth out. edging a catch to the wicketkeeper as he aimed to drive. Terry, his opening partner, had gone the same way in the third over. Nicholas hooked his first ball for six before giving mid-wicket a catch.

Robin Smith edged a catch to the third slip, Franklin, who parried it for the first slip. Bracewell, to run retire for treatment after being struck on the right thumb by Sneddon but returned to play soundly before he was bowled attempting a forcing stroke on the back foot. Cowley and Pocock resisted for a time but the wickets continued to fall. Tremlett and Stevenson added 44 but Hampshire were all our after only two hours

The New Zealanders, who resumed at 118 for four in reply to Hampshire's 149, finished with a first innings lead of 95 on a pitch that continued to give some help to seam bowlers. Nicholas, not for the unpress P.J Sels and R. J. Sels and R.

knows the vernacular is correct. Looking down their scoreboard of

Saturday, what is most noticeable - apart from Barlow having carried his bat for 44 - is that numbers five,

six, seven and eight contributed one run to the leaders' 83.

Essex, in pursuit, and mindful no doubt of their recent collapses, moved Hardie down the order.

Since Fosh retired prematurely, they have needed a letihander. Perhaps

they have found a worthy one in their own backyard of East Ham:

Gladwin, making his first appearance of the season, scored 61, 23

Another to carry his bat was Andy Lloyd. He defied Clarke who.

like Pringle, returned a seven-wicket, career-best analysis. War-wickshire, though, can hardly be countenanced as championship

Neither can Kent, who toiled on

Then there was the small matter Kapil Dev.

the first day of Canterbury week. The band did not strike up during play, as if aware of the serious

contenders any more.

nature of things.

Essex built up a substantial lead.

Northants routed by Garner

Joel Garner, the West Indian fast bowler, took four for 22 to lead Somerset to an overwhelming 10-wicket victory at Weston-super-Mare with seven overs to spare Garner's opening burst proved decisive after Northamptonshire had been put in.

In the course of 11 deliveries in his first three overs, he dismissed Wayne Larkins, Allan Lamb and Kapil Dev for four runs. From 19 out trying to sweep. He has had a good tour but if New Zealand are wondering if they can add stability to their batting for the Lord's Test, it was Gray's performance which for three they never recovered, Canterbury: Kent crushed Worces-Casterbury: Kent crushed Worcestershire by 108 runs to sustain their
challenge for the title. Put into bat at
Canterbury they reached 228 for
eight thanks to a career best in the
competition of 95 by Chris
Cowdrey.

He batted 69 minutes, received
74 balls and bit 11 fours to rescue
Kent from 50 for three.

Worrestership collapsed to 59 for

Worcestershire collapsed to 59 for five as Eldine Baptiste took three for Leicestershire: A changeless century

from Leicestershire's Nigel Briers proved too much for neighbours Nottinghamshire, who went down FALL OF WICKETS: 1-2, 2-25, 3-41, 4-45, 5-67, 6-64, 7-107, 8-151, 9-153, 10-154. BOWLING: Enciden, 11-1-51-2; Checheld, 6-4-3-1; M D Crome, 6-2-21-3; Tracy, 6-1-36-0; Bracewell, 6.1-1-26-2; Gray, 2-1by 26 runs at Grace Road. Briers' unbeaten 101. made in aly 96 minutes with two sixes and seven fours, helped Leicestershire to

240 for three. THE OVAL: Dennis Amiss scored a commanding 60 to guide Warwickshire to a five-wicket victory against Surrey. Apart from a difficult stumping chance for reserve wicket keeper Alec Stewart. when he was 43, Amiss was never in difficulty until he was caught on the

difficulty until he was caught on the square leg boundary.

Surrey threatened more than they achieved in being dismissed for 157 and Arniss made the target look simple while sharing stands of 44 with Alvin Kallicharran and 43 with FALL OF WICKETS: 1-19, 2-89, 3-89, 4-191, 5-177, 6-186, 7-188, 8-185, 9-237, 10-244. the stylsh Robin Dyer.

Sussex salvage win after early collapse

By Alen Ross EAST BOURNE. Sussex beat Derby-

shire by 2 runs. The last hopes Sussex had of last nine wickets for 38 runs, a sequence of events that has become customary. But Derbyshire. on a pitch not much to the batsmen's liking, followed a similar pattern, and Sussex scrambled home by two On a typically breezy, occasion-

ally sunny seaside afternoon, with not a seat to be had. Sussex got off to a flying start. After twenty overs they were 80 for no wicket, with Mendis 50. At 82 Mendis was caught on the leg side by Taylor off Miller after which runs became as rare as grouse look like being.

Imran could only score in singles and off his first real hit he was caught on the square leg boundary.
Parker, who opened with Mendis,
was never properly in touch. He
scampered between the wickets in
his usual fashion but when he was in the 36th over he had acquired only 46.

No one else, against tidy, mostly medium paced Derbyshire bowling, struck a decent blow. Barnett set his fields skilfully and almost everything went to hand. Derbyshire made a methodical

enough start for Sussex's two crocks, Imran and Greig, to be called up for action. Barnett was caught at cover at 27 and at 66 Hampshire played

and with 15 overs left Derbyshire needed 59.

Derbyshire's lengthy tail kept Sussex hanging on, but no balls and salvaging something from a disastrous season looked like going up in smoke at the Saffrons yesterday, 109 driving at Reeve, and then three smoke at the Saffrons vesterday, 109 driving at Reeve. and then three for one at one time, they lost their wickets fell at 120, the second to 2 superb catch by Reeve in the gully. With five overs left Derbyshire needed 26, and off the last over six.

Lancashire fall for it

HEADINGLEY: Yorkshire (4 pts) beat Lancashire by 4 wickets. Yorkshire are a Janus-faced team this year, and it is hard to reconcile the fallible mob who appear from Monday to Saturday with the efficient, table-topping side which we see on Sundays. Yesterday, to the delight of the twelve and a half the delight of the twerve and a han thousand crowd, they outplayed and more importantly completely out-witted Lancashire as Illingworth contrived to hide his lack of front line seam bowlers so effectively that against a team featuring Boycott as an opening bowler Laucashire at one stage had acquired just 109 runs in 34 overs for the loss of seven wickets.

If Lancashire felt they had fallen

for cricket's equivalent of the three card trick, they would have some justice in assertion. But to lose your money to a card sharp requires some connaivance, if only of excessive naivety on the victim's part, and so it was on this occasion. Most telling of all in this story of self-destruction, witting or unwit-ting, was the fall of Clive Lloyd to Boycott's weekday opening partner.
O'Shangnessy and Illingworth conspired to keep Lloyd away from the
strike for 17 out of 18 deliveries.
Finally Lancashire's remaining hope did get to the receiving end only hole out in his attempt to make up for lost time, giving Moxon a most

Middlesex make it a double

By Simon O'Hagan CHELMSFORD: Middlesex (4pts) beat Essex by four wickets.

Two weeks after their enthralling Benson and Hedges Cup final, Essex and Middlesex yesterday contrived a finish similar in character and result. This time it was found wanting at the sweaty hands stage as Middlesex moved to a victory that keeps them in contention for the John Player League title.

Twenty runs were needed when Phillip began the thirty eighth over. It was not to be his day. During the Esses innings he had been pror in the order to increase the run rate but his batting had been notable only for the number of leg byes which resulted from it. Now, with the ball, he lost his accuracy just when it was needed, his over yielding 11 runs. With nine now needed and Downton, the Middlesex wicket

keeper growing in confidence, the destiny of the match was decided. From Lever's next over all nine came. Downton linishing on 35 not under the circumstances arguably the best innings of the day. Middlesex would have found victory easier had they not conceded 52 runs off the last four overs of the Essex innings. Until then the Essex

bassmen had been unable to take advantage of either wide open spaces on one side of the round or the short boundary on the other. Young Gladwin went to a careless stroke in the second over and this was all the encouragement the Middlesex bowlers needed. Pringle showed a surprising delicacy for a man of his bulk in

making 34, but it was left to Fletcher and East to give their total any respectability as they launched into aniel and Cowans almost after it had seemed too late.
With a total Middlesex must have

though; was probably beyond them they batted steadily but without ever assuming control. Barlow made an unspectacular 56 but when he was dismissed to make the score 135 for five in the 30th over their cause

Spencer's fast finish covered from a poor start to overtally Lavado and capture the lead. Fie finished a convincing winner, 6.3!

Spencer, on a Honda, won the Swedish 500cc Grand Prix from his fellow American, Kenny Roberts, in a dramatic finish yesterday. Spencer, the world championship leader, swept past the outside of Roberts's Vamaha on the final curve for his sixth grand prix win of the season. The world championship will now

be decided in the final race at San Marino on Septembr 4 with Spencer Marino on Septembr 4 with Spencer and Roberts the only men who can win it. Spencer, aged 21, from Louisiana, was the early leader. He was overtaken by Roberts on the fourth lap but the two men stayed wheel for the remainder of the race.

Roberts is chasing his fourth world title before retiring. His victory last weekend in the British earned urit was his fifth success of grand prix was his lifth success of the season but vesterday's defeat was a setback to his title ambitions.

The French rider, Christian Sarron, won the final 250cc grand prix of the season on Saturday to finish second overall behind the 1983 world champion, Carlos Lavado, of Venezuela.

YACHTING Fastnet plod bodes ill

for record times By John Nicholls It seems fairly clear from the therefore, was leading by a wide reported positions of competing margin on corrected time. achts that records are not going to

be broken in this year's Fastnet race. Since the start on Saturday morning, the 224 entries have plodded slowly along the south-west coast of England and were spread the whereabouts of the other entries are known only if they are spotted by observers as they pass headlands on the course.

Although it could not be confirmed vesterday, it is safe to

assume that one or other of the Class A yachts, Condor (Bob Bell, Bermuda) or Sebastiane (Andre Viant, France) is leading the fleet. A Condor holds the record time for the Fastnet of a few minutes under three days, established in the gale-wrecked race of 1979. Unless the leading boats now receive strong, following winds for the remainder of the race, that record will stand for at least another two years. In the Admiral's Cup race,

sponsored by Champagne Mumm, Moonduster was leading the class, which by midday yesterday, was spread over 40 miles. One would expect Moonduster (Denis Doyle. Ireland) to be among the leaders by virtue of her size and scratch rating. What was surprising was that Black Topic (Dixon Atkinson) of Britain was close to her. She is one of the lowest rated of the 44 boats and,

Equally surprising was the reported position of Indulgence (Graham Walker), so far the highest-scoring British boat in the series. She was among the tailcoast of England and were spread coders, so somewhere must have hit between the Scilly Isles and the Lizard last night. Only the predominantly northerly wind.

Admiral's Cup contenders within ETCHELLS: J. More like Flying Britons From a Special Correspondent, Long Beach

British crews climbed the win-ner's rostrum three times at the through from eighth. The Amen-cans, Randy Smyth and Jay Glasser,

closing ceremony of the Long Beach Olympic Regatta, which ended on Saurday, taking gold, silver and bronze medals in Flying Dutchman, Tornado and 470 classes. Jo Richards and Peter Allam clinched the Flying Dutchman despite a prerace decision to play safe. Drawn into a duel with Bengt Hagender and Magnus Sjell, who were finally passed at the last leeward mark, they swept on to win by 40 seconds as the Swedish pair cansized. It is the third time British Flying

Dutchman crews have dominated this regatta. Four of the world's finest crews, including Rodney Pattisson, and the previous year's winner John Loveday, enter the fray in the autum, giving Britain a good chance of winning a gold at Los Angeles in 1984. Rob White and David Campell-

James also won their sixth race in the Tornado class after battling

misjudged the lay line and narrowly failed to make the finish in one Their desperate last-minute tack could not cut off White's and James's final dash. With a day in hand, American and British crews settled for first and second. Mike Holnes and Ossie Stewart rallied from minth overall in the 470s after a 20th place in the sixth race to third overall in a class in which the New Zealanders have a stranglebold

stranglehold.

Wembley tastes the real thing

the most important thing. It's the only thing."

Before the game I asked Bud Grant, the Minnesota coach, what his priorities were. He fixed me with a stare of about the length and

temperature of a Minnesota winter.

You come to win," he said, finally

The only thing was accomplished. Minnesota won this pre-season exhibition game, 28-10, before a crowd of 32,847.

Using mainly first-string players, Minnesota built an 18-7 first-half lead, Kramer threw two touchdown

Minnesota Vikings.. St Louis Cardinals10

Vince Lombardi may be dead, but his spirit still roams the National Football League, it seems. On Saturday it visited Wembley.

Lombardi's Green Bay Packers were the outstanding team of the era in which professional football was m which professional notions was just becoming accepted as the extraordinarily popular mass enter-tainment it remains today. His consuming passion for his team and his obsessive desire for its prefection were widely celebrated at the time but, 15 years later, after a season disrupted by a players' strike and a scandal over widespread cocaine abuse, they seem a relic of a more certain and uniform age.

The core of his philosophy he expressed in a phrase he may or

BOWLS Red Arrows no match

for Hill By Gordon Allan

They call the Bournemouth Open trounament the Royal Ascot of bowls, Ray Hill, a Weish inter national from Aberavon, won the singles in thoroughbred style at Meyrick Park on Saturday when he teat John Evans, an England international from Torquay, 21-7 in

It was Evans's third match of the day, with a fourth to come. He had already played his singles semi-final and a triples semi-final - about four and a half hours of effort and concentration in the sun. Hill, on the other hand, had played only his singles semi-final, and was the

fresher player.

Evans made no excuses. He knows and respects Hill too much for that, in a match played in exemplary spirit, Hill maintained a ine and length that rarely wavered After a steady start. Evans could maintain neither. Hill kept control of the mat and therefore of the match, and at the odd moments of danger he was well able to look after

In the morning, during which the Red Arrows fore to and fro overhead, Hill had a headache that affected his power of focusing. But in spite of much shading of the eyes, and peering down the green, he beat John McVicar 21-5 - testimony to his instinctive skill, not to mention, as someone said, a good memory.

There was consolation for Evans

in

A daughter of that successful sire, Bluishing Groom, she is expected to win the Oxton Maiden Fillies Stakes, at the expense of the Aga Khan's reposition Shediling.

Again's first appearance as a three-year-old, after showing considerable promise with two victories from

stewards. This has left quite a gap at the top in riding arrangements this week, with Pat Eddery very much the man in demand.

At Phoenix Park on Saturday Eddery was forced to deny rumours that he would be riding for the Maktoum brothers, instead of Vincent O'Brien next season.

Press reports suggested that Eddery had been offered a \$750,000 Goodwood. Amorous, should gain Eddery had been offered a £750,000 Goodwood, Amorous, should gain retainer, plus a share in the sale of swift compensation in the Nottingstallions by the Maktoums, but this bam Stewards Cup.

King Persian in command

By Our Irish Racing Corresponde

The extension of the Heiaz "57" display his full potential. Before Phoenix Stakes from five to six furlongs at Phoenix Park on Gowran Park. Browne, who had his Saturday was the deciding factor in the success of the Liam Browne, trained King Persian. Not only would he not have won over the traditional trip, but he would not have finished in the first four.

When leaving the starting stalls, King Persian stumbled and was crossed. As a result of this incident, he trailed many lengths behind the leaders, Gala Event and Grey Dream looked certain to win for the Kevin Prendegast stable when he shook off Gala Event 150 yards from home, but King Persian produced an electrifying turn of speed to get up on the post and win by a short head. Another three-quarters of a length his first time.

on the post and win by a short head.

Another three-quarters of a length farther back came Gala Event, the 2-1 favourite. King Persian will need a longer distance and a stiffer track to

A thrilling finish as Mystery Ship (left) holds Calpoppy at Newmarket.

Beaudelaire's sights set on Haydock

Beaudelaire fully justified his furlongs. The seven-year-old bowled place as favourite for the Group 2 along in fifth position before taking Prix Maurice de Gheest at Deauville the lead off Petit Montmorency rnt Maurice de Greest at Deauville yesterday by coming home by half a length in front of Maximova. Robert Sangster sponsors the Vernon Sprint at Haydock Park and hopes Beaudelaire will be his first winner of the six furlong event. Sangster also announced, contrary to press speculation, that Pat Eddery. to press speculation, that Pat Edder will be riding for him and Vincent O'Brien for at least the next two

the leaders and took the advantage with a furlong to run. Still a little green the son of Nijinsky looked around when in the lead but was immediately balanced by Eddery and the pair finally won fairly comfortably at the odds of 18-10 assigns.

carrying 9st 11lb to victory in the at the Group I Prix Jacques Group 2 Prix Kergorlay over 15 Marois in a month's time.

SATURDAY PRIX D'ASTARTE (Group il. £18,298. 1m the lead. off Petit Montmorency halfway up the straight. Kelbomec will next turn out for the Prix Gladiateur which he won in 1982. On Saturday, the 5-4 favourite Ma Biche could only manage sixth place behind Luth Enchantee, Mighty Fly and Falling Star in the one mile Prix D'Astarte. Luth Enchantee had previously only won a maiden and been placed fourth in the group III Prix de la Porte Maillot but in the D'Astarte all the conditions were in her favour. She

CAP (£2,868: 6f) (9)

conditions were in her favour. She had a straight course, firm ground and was able to be tucked in by Maurice Philopperon until the final furiong. Once produced on the outside she showed excellent acceleration to defeat Might Fly by a against. Icegeth and half and the daughter of Kelbomee had no problem in Be My Guest had now earned a tilt

THORIZONS The Times Guide to career training

Keep up your education

employment. Mature students may need great persistence to overcome secial and economic hurdles. But a job in undustry, even with a medium or small employer, does not siam the door to obtaining higher academic

qualifications.
Mr. Frank Nickols, aged 32, an engineer whe starts a three-year PhD course at Southampton University this autumn has proved that it is possible to combine academic and practical disciplines. Mr Nickols is at present not only involved is designing and building advanced robots but also in marketing them.

He belives that a PhD in image processing will help do his job better, and also that the title "doctor" is important in giving him, and the products he designs. "an edge". Accordingly, he as presuaded his employers A M F Legg, a medium-sized company manyfacturing auto-matedequipment for the tobacco industry, to sponsor him through his PhD.

Evidence of past practical achievements was a strong factor in influencing A M F Legg's decision. Although the company is deeply committed to training apprentices, it cannot afford to employ pure-scientists. This policy suits Mr Nickold, who has always had a passionate interest in making ma-chines and systmes work, as well as in

In fact, a strong-minded reluctance to specialize in theory to the exclusion of practice, or in electronics to the exclusion of mechanics in engineering had been continuing throughout Mr Nickols's career. It also led him into

...

Education need not stop with Even though the hurdles are microprocessors and led him to high, getting an advance degree while you work is possible. Patricia Tisdall talks to an engineer who fought the odds

> acute difficulties with the education system. The troubles started shortly after he joined the Royal Air Force as a technical apprentice at the age of 17. Two years into his nine-year term with the RAF he knew he had made a mistake. However, even though Nickols was offered a place at Cambridge, the RAF would not release him until five long years after his first application for a discharge, and then only after a direct appeal to the Air Officer Commanding.
>
> During his spell with the RAF, Mr

> Nickols took a part-time HNC, in which he obtained distinctions. He also did a variety of engineering projects in his spare time, including designing and manufacturing a sort of Miami swamp boat. Although a lot of the years in the RAF were wasted, in his view, he also reckons he learned a great deal. The process of extraction himself was educational in itself: You learn that you can't best the system. You have to communicate and work with it. Let people know what you want to do and get them on your side," he says.
>
> After Cambridge, where he

obtained his first degree in mechanical engineering, he eventually took a job with Lucas where he was happy for two years taking responsibility for designing a miniature transducer. This project made him familiar with

Oliman :

electronics. "I knew then that mechanical engineering wasn't enough I would have to learn electronics to design and build the controls for such machines."

He looked at day release schemes, but decided that a year full-time study was needed, even though Lucas, which was in the depths of the recession in 1981, was unable to help. Despite the fact that he was supporting a wife and two young children, he decided to go ahead with an MSc in Electronics at Cranfield. This was financed with aid from the Manpower Services Commission, granted on the understanding that he would not return to Lucas.

"It wasn't a difficult decision," he says. "You can stay in your job and you've got the security. But if you look at it in the medium to long term, you'll see that you'll lose your attractiveness to employers if you don't keep up with technology."

More important was to get Cranfield to let him do his MSc by research. Here the communication skills he learned in the Air Force came in handy. "I planned the project out in my mind first. Then I sketched out the plan before I went to see my tutor After that it was a matter of getting the tool-maker on my side and organizing a budget." The MSc project led him last autumn to his present job at A M F Legg and so to image processing and, he hopes, to his

Has he any regrets about the route he has taken to get there? There has been financial strain on his wife and family, but on balance he is happy he made the choices he did.

 One of the most notorious of the war criminals still free has been Sushed from South American woodwork by World in Action COLONEL RAUFF'S REFUGE (ITV -8.30 pm) traces the career of the man who masterminded the murders of almost a quarter of a million men, women and children with his specially constructed mobile gas chambers. Water Rauff has been fiving the life of a well-to-do retired businessman in a select suburb of Santiago, the capital of Chile, since he was the subject of an

abortive extradition request by the West German government 20 years ago. World in Action, with unpublished documents has been able to plot Rauff's flight from Milan where he was SS chief at the end of World Wer Two, to the Middle East and eventually to Chile where he lives under the unconcerned eye of

CHOICE

the military dictatorship. Rauff has been secretly filmed by World in Action and briefly interviewed, but for the four weeks the cameraswere camped outside his home. Rauff emerged only twice. One of the more deserving cases in this season of reneats is tonight's Q.E.D.: OLD WIVES'
TALES (BBC2 7.50 pm) in which
Professor Noel Dilly wanders the Cotswolds testing the truth behind old country saws. Surprisingly, a fair number stand up to modern scientific examination but predictably, most of them are proved to be nonsense. Either way. Professor Dilly's investigations make for a most enjoyable half-an-

Another welcome repeat is John

Arden's Giles Cooper Award-wirning play, THE OLD MAN SLEEPS ALONE (Radio 4 8.10 pm) which was commissioned by the BBC as part of their 60th. anniversary celebrations. The play, set in the 12th century, concerns the building of Durham Cathedral. The French master mason in charge of the project is dying and he has to leave the completion of the task to his two young English apprentices. But which of them will inherit the secrets of his craft? His daughter shares his secret and, in a dying wish the Frenchman asks her to impart the knowledge to the apprentice she chooses to marry. Should she wed the abler of the two or the one she would prefer to marry? Linda Cardner plays the daughter with Nigel Anthony and Christian Rodska as the two

Minister quits anti-hunt body

By Hugh Clayton Environment Correspondent

A junior minister has re-signed as patron of the Con-servative Anti-Hunt Council because it opposes government policy. Mr Alan Clark, an policy. Mr Alan Clark, an Under-Secretary of State at the Department of Employment, agreed last month to become patron of the council which wants hunting to be banned.

Mr Clark's role in the council was disclosed in The Times last week after the Government had said in one of its statements about hunting that it did not intend to legislate against it.

Mr Clark decided that his

role as a minister was incompatible with patronage of a pressure group opposed to its policy. But he remains opposed to hunting and does not allow it on his land. Although he shot grouse as a young man, he now and. Although he shot grouse as a young man, he now believes that man has no right to use his intelligence to destroy other life forms for pleasure.

The council, which is open only to members of the Conservative Party many to the council which is open only to members of the council which is open only to members of the conservative Party many to the conservative Party m

Conservative Party, wants to create inside the party a nucleus of opposition to hunting. It has decided not to oppose shooting

and fishing.

Mr Richard Course, executive director of the League
Against Cruel Sports, said that his organization might give the

council money.

O The affair of the hunting mole" has provoked a lively exchange between supporters and opponents of hunting Mr-lan Coghill conservation officer of the British Field Sports Society, denied that he had unwittingly offered Mr Michael Huskisson, a member of the Hunt Saboteur's Association a job as whipper-in with the Three Counties pack of min-

khounds.
Mr Huskisson's efforts to secure evidence of cruety by posing as an enthusiastic humt supporter for a year were disclosed by *The Times* last week. He claimed that Mr Coghill, a joint master of the Three Counties pack, had offered him the post at a hunt

party.

Mr Coghill said: "He would not have made a good whipper-m; he was too morbid".

Mr Huskisson in turn re-lected a claim from Mr Coghill that he tried to persuade hunts to stage incidents, including the "blooding" of a child by the smearing on its face of blood meaning the smearing on its face of blood

Cameras roll for a Civil War replay

enacts battles from the Civil which supports Cromwell. Tug takes tanker hulk out to sea

Castillo de Bellver is not yet officially. Inown but marine experts in Cape Town speculate that as the tanker rode the heavy seas the strain on the horse bull which is designed to huge hull, which is designed to flex proved too much and the

flex, proved too much and the plates fractured amidships.

The inert gases pumped into the holds vented and escaping oil was probably ignited by sparks from grinding metal. The master reported that a flash fire had started running from and after the provides. fore and aft from a position amidships on the port side which would appear to bear his out," a master mariner said in Cape Town.

Cape Town.

A warning was issued last night that the Cape west coast region faced a grave long-term pollution threat. Mr Bill Brick. nell, chief oil poliution control officer of the Department of Transport, said there have to be careful monotoring of the wreck of the Castillo de Bellver for a year or more.

Couple killed in crash

An elderly comple were killed on Saturday night when their car was in a head-on collision with a coach carrying French holidaymakers on the Perth to Sierling road near Aberuthevent. The couple who died were Mr. Francis Johnstone, a refired farmer aged 70 of Kilmarnock, and his wife Agnes, aged of Two people in the coach were hurt and one was detained in Bridge of Earn Hospital.

Rush to help abandoned dog

An Old English sheepdog An Old English sheepdog abandoned in Princes. Street Gardens, Edinburgh had a note and £3 attached to its collar. The note stated: "I am an oldage pensioner and cannot afford him anymore. Please look after him". The dog is at the Edinburgh, Dog and Cat Home. The switchboard there has been jammed with callers offering a home.

Dissidents leave Warsaw (Reuter) - More

than 2,000 dissidents emigrated from Poland with their families during martial law, a govern-ment official said yesterday.

from the front Legacia de la Compania Gulf psychology

That the Iran Tentenant-colonel said will a praidiose theory of his arm, "is Iran, and those are our tanks beating the hell out of them."

He stood overlooking the trenches and barbed wire of the Iranian border like a man ready to plach a hole all the way to Tehran and Ayatollah Khomeini's front door.

Khomein's from door.

From the side and behind its Iraq attiller, bombarded the Iranian border town of Mehran as the fourth armound division, said to mumber 250 tanks moved forward in the first big incursion into Iran for 12 months. The three-pronged down attack on Saturday was dawn attack on Saturday was designed, like so much else in this destiliery three year Gulfwar, more for psychological gain than for strategic advan-

Along the road to the front we counted more than 50 Soviet T54s dug into defensive positions in the parched, rolling landscape. The crews, their faces eithed with line dust, munched watermelons and waved two-fingered vices. tory salutes.

At the border a soldier rushed At the border a souther rushed over to us. "You want to see a body? Come quick. We killed 400 framians four days ago and only lost two men. They are so stupid I think they want to die. They just charged us shouting Allahu Akbar. We chanted it back and then shot them with spaching guns. We them with machine guns. We love God too, but they are

The fraquis stood self-conaciously in their trenches, posing for the cameras beside boxes of hand-grenades and ammunition. One wrapped in bandoleros of buillets, scowled and struck an exaggeratedly aggressive pose with his Kalashnikov rifle before his face dissolved into smiles.

Another, a former clerk in the Health Ministry, said: there aren't any Iranians left after this attack. As if in-herply, an Iranian shell landed nearby, crashing into the side of a small hill.

The assault on Mehran, about 100 miles east off Baghdad, was designed to show the Iranians that Iraq could attack when and whe ift wished, said the Colonet espeaking through an in-terpreter. We want to show them we can take anything we choose"; he added.

But the real reason, accord-

Unrelenting foes: Presi Saddam Husain of Iraq (left) and Ayatollah Khon

the propaganda effect of lean's two incursions into Iraq tast week and to raise morale among the weary million strong traqui forces, frustrated by constantly being on the defensive. The attack was said to be

timed to gain maximum publicity and convince the Iranians and the world that Tehran does not kold the initiative in the war, and to persuade it to negotiate for Given the overwhelming au

superiority, however, with large numbers of MiG23s and helicopter gunships, the Iraqu seemed to be making slow

headway in their attack.

They claimed to have cut off Mehran and seven villages a few miles inside Irah, but. appeared to have met stub-born resistance, with fighting continuing long after the tanks moved in. Even if they take the ground

in what they describe as a limited opration, the Iraqis seem bound soon to withdraw and let the war dissolve itself once again into a stalemate: After starting the conflict and two years of unsuccessful

in the

attacks they decided last year to defend their frontiers and sue for peace.

The frankan terms, however, have been harsh. Available.

lah Khomeini has demanded the replacement of President Saddam Hosain's government with an Islamic republic, and reparations of £60,000m. To achieve these ends the

Iranians have started a war of attrition, launching sporadic raids along the 700 mile border aimed at eroding
